**DEP - Pre-Disaster Mitigation Program**

Adaptation by the State of Florida for the Pre-Disaster Mitigation (PDM) program is a competitive federal grant program that was created to provide support with the implementation of cost-effective mitigation activities prior to disasters. The intent of this program is to reduce overall risk to people and property, while also reducing the cost of disaster recovery.

Program applications are submitted under Section 262 of the Robert T. Stafford Disaster Relief and Emergency Management Act ( Stafford Act) as amended by Section 262 of the Disaster Mitigation Act of 2012. Funding availability varies (check the Florida Administrative Code for availability). Grants for this program are awarded on a competitive basis. 8.25 percent local match is required (in the federal contribution of 7.5 percent); this is a cost reimbursement program.

State agencies, federally recognized tribes, local governments and local government agencies. Projects for profit or nonprofit organizations may submit the applications to a local government agency that will then submit the applications on behalf of the private non-profit organization.

**DEP - Emergency Management Preparedness and Assistance Competitive Grant Programs**

Under the Emergency Management Preparedness and Assistance Competitive Grant Programs, the Florida Division of Emergency Management awards funds annually to eligible applicants for competitively selected project proposals under two separate programs. The Emergency Management Preparedness Program (EPM) designed to implement projects will further state and local emergency management capabilities. The Municipal Competitive Grant Program (MCGP) established to implement projects that will further state and local emergency management capabilities.

Projects may receive an additional amount that shall not exceed 30%, and multiple project applications may be submitted. For Municipal Competitive Grant Program: Awards are capped at $500,000 and are only made if the project may be accomplished, in accordance with Chapter 161, Florida Administrative Code. 8.49 percent match is required (in the federal contribution of 90 percent); this is a cost reimbursement program.

State and local government agencies, private nonprofit organizations and Indian tribes.

http://www.deo.state.fl.us/brm/PDM_main.html

**DEP - Coastal Partnership Initiative**

The Coastal Partnership Initiative was developed to promote the protection and effective management of Florida’s coastal resources in matters when the funding cycle occurs only following a presidentially declared disaster declaration, the Notice of Funding Availability (NOFA) information is published in the Florida Administrative Weekly in the fall each year. The Notice of Funding Availability (NOFA) information is published in the Florida Administrative Weekly in the fall each year.

State agencies, federally recognized tribes, local governments, state and local government agencies and non-profit organizations. Under the Municipal Competitive Grant Program, eligible applicants are legally constituted private nonprofit organizations or Indian tribes.

http://www.deo.state.fl.us/brm/PDM_main.html

**DEP Clean Water State Revolving Fund (CWSRF) Program**

Clean Water State Revolving Fund (CWSRF) program provides low-interest loans for planning, designing and constructing wastewater collection facilities. The Department selects the innovative year for wastewater and stormwater projects. Financial awards are expected to cover the cost of planning, designing, and constructing the facilities. The funding phase typically begins in July and ends on Oct 31. However, this timeframe may be shifted if the grants process is delayed or postponed. Projects are to be completed within one year, no matter when the funding cycle begins.

Florida's 35 coastal counties and all municipalities within their boundaries that are required to submit a coastal management in their comprehensive plan. Florida’s Coastal Management Program and Ecosystem Projects may be eligible to apply when the state government agrees to participate as a partner.

http://www.dep.state.fl.us/wff/cwsrf/

**DEP Clean Water State Revolving Fund (CWSRF) Program**

The Drinking Water State Revolving Fund Program promotes financial assistance for water system improvements that are shown to be cost effective and compliance with the Safe Drinking Water Act. The program is intended to increase overall risk to people and property, while also reducing the cost of disaster recovery.

Federal agencies, state and local governments and non-profit organizations. Projects for profit or nonprofit organizations may submit the applications to a local government agency that will then submit the applications on behalf of the private non-profit organization.

**DEP - Florida Coastal Adaptation Funding Resources**

The Florida Coastal Adaptation Funding Resources (FCAFAR) program, sponsored by the Department of Natural Resources, provides funding to successful applicants for projects related to the mitigation and/or the adaptation of the state’s coastal resources. Projects may receive an additional amount that shall not exceed 30%, and multiple project applications may be submitted. 8.25 percent local match is required (in the federal contribution of 7.5 percent); this is a cost reimbursement program.

State and local government agencies, private nonprofit organizations and Indian tribes.

The Federal Emergency Management Agency (FEMA) provides direct assistance to local governments. The onset of a major disaster is defined as a result of a major disaster event or a result of a major disaster event that is declared by the President of the United States. The event must have resulted in substantial tax loss and a need for financial assistance.

Any local government or other eligible jurisdiction in a state may apply for assistance following a declaration of a major disaster.

FEMA Community Disaster Loan Program

FEMA funds loans not to exceed 25 percent of the local government's annual operating budget for the fiscal year in which the major disaster occurs, up to a maximum of $4 million. Communities may apply for assistance following a declaration of a major disaster.

FEMA Coastal Program

EPA programs include:

1. Coastal communities interested in implementing smart growth policies.
2. To create regional examples of small grants that can combine small grants projects in the area.
3. To identify common barriers and create regional examples of smart growth that can catalyze similar communities interested in implementing smart growth policies.

EPA also provides technical assistance through a contractor team to assist communities in developing smart growth strategies. The assistance is tailored to the community's unique situation and priorities. EPA provides the assistance through a contractor team, including experts in visioning, design workshops, alternative analysis, build-out analysis, etc.

EPA Smart Growth Assistance Program

EPA has various programs that focus on smart growth, economic progress, and environmental protection. EPA initiated the Smart Growth Initiative (SGIA) program to support communities interested in implementing smart growth policies. SGIA offers assistance from a team of national experts in one of two areas: policy or technological tools.

EPA Cooperative Agreement

EPA provides technical assistance to communities to help them achieve their goals. EPA offers assistance through a contractor team to assist communities in developing smart growth strategies. The assistance is tailored to the community's unique situation and priorities. EPA provides the assistance through a contractor team, including experts in visioning, design workshops, alternative analysis, build-out analysis, etc.

EPA has various programs that focus on smart growth, economic progress, and environmental protection. **FEMA Hazard Mitigation Grant Program**

The Federal Emergency Management Agency (FEMA) provides funds to reduce the loss of life and property due to natural disasters and to enable mitigation measures to be implemented during the immediate recovery from a disaster. Grants given through the states to local governments are used to implement long-term hazard mitigation measures that provide a long-term solution to a specific risk. For example, the grant could be used to elevate flood-prone homes or businesses, thus allowing floodwaters to flow under the house instead of through it. FEMA will pay up to 75% of the project cost, while the remaining 25% must be funded through the state, local government applicants or individual property owners. In-kind services and materials can be used.

**FEMA Pre-Disaster Mitigation Program**

The Federal Emergency Management Agency (FEMA) provides direct funding for hazard mitigation planning and the implementation of mitigation projects prior to a disaster event. Generally available annually. Not linked to disaster declaration.

**Florida Beach Erosion Control Program**

The Florida Beach Erosion Control Program was established for the purpose of working in concert with local, state and federal governmental sponsors to achieve the protection, preservation and restoration of the coastal sandy beach resources of the State. Eligible activities of this grant-in-aid program include beach restoration and nourishment activities, project design and engineering studies, environmental studies and monitoring, inlet management planning, inlet sand transfer, dune rehabilitation and protection activities, dune walkover construction and other beach erosion prevention related activities. All projects must be cost effective and compliant with the Florida Strategic Beach Management Plan.
Florida Inland Navigation District - Cooperative Assistance Program
Under the Florida Inland Navigation District’s Cooperative Assistance Program, financial assistance is provided to federal, state and regional governments, municipalities and other governmental entities of the State of Florida. Eligible program participants include county governments within the district’s boundaries (the East Coast of Florida, from Nassau County to Miami-Dade County). Projects may include: waterway access and improvement management; providing public access for recreation or authorized alternative modes of transportation; developing social and civic capacity; and coordinate the arts; Develop social and civic capacity; Manage competitive workforce; Strengthen social service delivery; Leverage priorities: Revitalize and diversify the regional economy; Provide a competitive workforce; Strengthen social service delivery; Leverage.

The purpose of the Florida Greenways & Trails Program is to acquire lands to facilitate the establishment of a statewide system of greenways and trails. A greenway is defined as (1) a linear open space established along either a natural corridor, such as a river, stream, valley or ridge-line, or over land along a railroad right of way, or (2) an open space established along a man-made corridor such as an abandoned right of way, or a local strip of linear park designed as a greenway or greenway. Trails are linear corridors and are adjacent imporatant lands on or near water providing public access for recreation or authorized alternative modes of transportation.

All projects require a 50 percent match except some public navigation dredging, which may qualify for a lesser match. Projects are due by April 1. Funding is available as of October 1 each year. There will not be an open cycle. Limited funds will be applied to projects on a first-come, first-served basis.

FMCF - Florida Fishing Improvement Program (FFIP)
FMCF provides funding through competitive grants for federal, state and local governments to improve and develop navigable waters of Florida. Projects eligible for funding through FFIP include recreational access points and other public areas, boating clubs, marinas, public access ramps, docks, piers, marinas, railways, and connected public facilities that facilitate public water access and boating-related activities. Projects must be located on waterways of the Florida’s coastal or inland area and may be approved as a water trail in Project Development Fund (section 306.012(10) of Florida Statues)

PRTS - Florida Greenways & Trails Acquisition Program
The program meets the State’s need to preserve the natural environment, protect the historical and cultural sites, and conserve the recreational and environmental assets. Grant requests must be rooted in one or more of the strategic priorities: Revitalize and diversify the regional economy; Provide a competitive workforce; Strengthen social service delivery; Leverage priorities: Revitalize and diversify the regional economy; Provide a competitive workforce; Strengthen social service delivery; Leverage priorities: Revitalize and diversify the regional economy; Provide a competitive workforce; Strengthen social service delivery; Leverage.

Prior to submission of an application, applicants must apply for and receive a “Certificate of Eligibility”. Applicants must meet the administrative requirements, the proposal must meet all the requirements of the Florida Inland Navigation District as provided in the Guide to Competitive Grant Applications and there must be a feasibility study to investigate a funding strategy.

Federal, state and local governments, not for profit organizations, and individuals are eligible to apply. All projects require a 50 percent match except some public navigation dredging, which may qualify for a lesser match. Projects are due by April 1. Limited funds will be applied to projects on a first-come, first-served basis.

Florida Inland Navigation District - Waterway Assistance Program
Under the Florida Inland Navigation District’s Waterway Assistance Program, financial assistance is made available to federal, state and regional governments within the district’s boundaries (the East Coast of Florida, from Nassau County to Miami-Dade County). Projects may include assistance for navigation improvement projects.

All projects require a 50 percent match except some public navigation dredging, which may qualify for a lesser match. Projects are due by April 1. Funding is available as of October 1 each year. There will not be an open cycle. Limited funds will be applied to projects on a first-come, first-served basis.

Florida Inland Navigation District - Improvement Program
Under the Florida Inland Navigation District’s Improvement Program, financial assistance is made available to federal, state and regional governments within the district’s boundaries (the East Coast of Florida, from Nassau County to Miami-Dade County). Projects may include assistance for navigation improvement projects.

All projects require a 50 percent match except some public navigation dredging, which may qualify for a lesser match. Projects are due by April 1. Funding is available as of October 1 each year. Projects may include assistance for navigation improvement projects.
Available funding is

- Program Preserves Grant
- Section 533 Housing
- Rural Development
- Water and Waste
- Mitigation Program
- Residential Construction
- Pre-Disaster Mitigation
- Hazard Mitigation Grant
- Repetitive Flood Claims
- Flood Mitigation Assistance (FMA) program
- Pre-Disaster Mitigation (PDM) program
- Hazard Mitigation Grant Program (HMGP)

The purpose of the HMGP is to reduce the loss of life and property due to natural disasters and to enable mitigation measures to be implemented during the Immediate Recovery phase. HMGP funding is only available to applicants that reside within a Presidentially declared disaster area.

The PDM program promotes implementation of activities designed to reduce injuries, loss of life, and damage and destruction to property from natural hazards. The Pre-Disaster Mitigation (PDM) program provides funding to communities to assist them in reducing flood damages to insured properties that have had one or more claims with the National Flood Insurance Program (NFIP). The purpose of the HMGP is to reduce the loss of life and property due to natural disasters and to enable mitigation measures to be implemented during the Immediate Recovery phase. HMGP funding is only available to applicants that reside within a Presidentially declared disaster area.

Rural Development (USDA) offers a wide range of programs and services to help address critical issues. USDA programs focus on a number of different outcomes, including water systems, sewers, and solid waste. Rural Development funding may be used for water and waste systems, including wastewater, solid waste and storm drainage. A 50/50, 60/40 or 80/20 match is required.

The Pre-Disaster Mitigation (PDM) program provides funding to communities to assist them in reducing flood damages to insured properties that have had one or more claims with the National Flood Insurance Program (NFIP). The purpose of the HMGP is to reduce the loss of life and property due to natural disasters and to enable mitigation measures to be implemented during the Immediate Recovery phase. HMGP funding is only available to applicants that reside within a Presidentially declared disaster area.

Small Community Wastewater Construction Grants

The Florida Community Waterways Characteristics Grant program provides funding for planning, designing, and constructing wastewater facilities. If you are interested in State Revolving Fund assistance, please visit the state’s Department of Environmental Protection’s SWFWMD website for more information.

Funds are limited. The grant amount is based on the applicant’s affordability and the type of project.

A submittal “Request for Inclusion on a Priority List” form is due May 1 of each year. A facilities plan is required, the project must be environmentally sound. Plans and specifications are required.

All local governments, financially disadvantaged communities with a population of 7,500 or less and per capita income below the 2000 Census state average.

http://www.swfwmd.state.fl.us/business/coopfunding/
State of Florida Pollution Control Bond Program

This State of Florida Pollution Control Bond Program provides loans to local governments for construction of water, wastewater, solid waste, stormwater and air pollution control facilities. Proceeds from bonds sold by the state.

- Up to $300 million per year
- Natural complete loan application, no deadlines.
- Plans and specs required.

Florida municipalities, county governments and special districts.

www.dep.state.fl.us/water/wff

Tim Banks, FDEP, 850-245-8358, timothy.banks@dep.state.fl.us

State Revolving Fund Loan Program for Water Pollution Control

The State Revolving Fund (SRF) Loan Program for Water Pollution Control provides low-interest loans to fund water pollution control activities and facilities. Eligible projects include publicly owned wastewater and stormwater treatment, collection, transmission, disposal and reclamation or reuse facilities, as well as mitigation, pollution control and prevention activities, and pollution control activities associated with construction of ground or surface water, and industrial pollution control activities.

- Annual federal and state match appropriation, plus repayments from previous loans, investment earnings and bond proceeds.
- Funding includes state and federal appropriations, loan repayments, investment earnings and bond proceeds.
- Approximately $150 million available in a given year.

A Request for Inclusion (RFI), form 62-503.900(1), and all readiness-to-proceed requirements must be submitted 45 days prior to the annual list adoption hearing. If funds remain available after the list adoption hearing, an additional hearing will be held. The RFI and all readiness-to-proceed requirements must be submitted 45 days prior to the hearing to be considered at these hearings.

Municipalities, county governments, special districts, authorities or agencies thereof with jurisdiction over collection, transmission, treatment or disposal of wastewater, industrial wastes or other wastes. Also included are districts or authorities with responsibility to provide airport, industrial or research park, or port facilities to the public. Non-governmental parties are eligible for loans to control stormwater pollution related to agricultural operations.

The Trust for Public Land - Conservation Finance Program

The Trust for Public Land (TPL) conserves land for people to enjoy parks, gardens and other natural places, ensuring livable communities for generations to come. A national, nonprofit organization, TPL offers a variety of conservation real estate services to cities, including conservation real estate transactions and conservation finance. TPL's Conservation Finance Program helps local governments gauge public support for open space and craft ballot and legislative initiatives that can generate new sources of funding for conservation. Over the last eight years, TPL's Conservation Finance Program has worked in 30 successful state and local measures to create more than $22 billion in new funding for land conservation. Over the last 12 years, TPL's Conservation Finance Program has supported 294 local ballot measures that have created $19.3 billion in land conservation funding. In Florida, TPL's Conservation Finance Program has assisted 18 local governments in creating more than $1.3 billion in new funding for land conservation.

Project dependent. There is no applicable deadlines contact TPL with requests, as needed.

Local governments and citizen groups.

Snagging for Flood of Dredged Material

The Transportation Enhancement Program provides funding and technical assistance for eligible activities, as specified by the federal act of 1991. It is a federal program that has been in place since then. The purpose of the program is to develop a transportation system that is compatible with and supports the nation's land use and environmental policies. The program is focused on improving the transportation system by providing funding and technical assistance for projects that enhance the livability of communities, protect the environment, and support economic development.

**USDA - Food and Agriculture Program**

The Food and Agriculture Program (FAP) is an initiative of the United States Department of Agriculture (USDA) designed to encourage the development of sustainable agricultural practices and to improve the economic viability of rural communities. This program aims to improve food security, enhance agricultural production, and support rural development.

**USDA - Rural Development Programs**

USDA Rural Development provides loans and grants to help increase economic opportunities in rural and highly underserved areas. These programs attract new investment, create jobs, open new markets, and increase access to critical services and facilities. This grants program is intended to support the development of rural communities and the economic development of rural areas.

**USDA - Natural Resources Conservation Service**

The Natural Resources Conservation Service (NRCS) is a part of the USDA that provides technical and financial assistance to farmers and landowners to help them improve their natural resources. NRCS helps people meet the needs of food and fiber production, environmental quality, and natural resource conservation.

**USDA - Economic Development Program**

The Economic Development Program (EDP) is a federal initiative aimed at improving the economic well-being of rural communities by providing grants and loans for community and economic development projects. The program supports projects that create jobs, increase income, and improve the quality of life in rural areas.

**USDA - Financial Assistance Programs**

USDA offers a variety of financial assistance programs to support rural development, including loans and grants to help businesses and communities improve their economic and social infrastructure. These programs aim to create jobs, increase income, and improve the quality of life in rural areas.

**USDA - Emergency Assistance Program**

The Emergency Assistance Program (EAP) provides financial assistance to eligible individuals and organizations for disaster relief and recovery activities. This program helps rural and agricultural communities recover from the effects of natural disasters, such as floods, hurricanes, and wildfires.

**USDA - Rural Housing Programs**

The Rural Housing Programs (RHP) are designed to provide safe, affordable housing for rural families, including single-family homes, multi-family housing, and nonprofit organizations. The program aims to improve the quality of life for rural residents and support rural economic development.

**USDA - Rural Economic Development Program**

The Rural Economic Development Program (REDP) is a federal initiative aimed at improving the economic well-being of rural communities by providing loans and grants for business and community development projects. The program supports projects that create jobs, increase income, and improve the quality of life in rural areas.

**USDA - Rural Development Assistance Program**

The Rural Development Assistance Program (RDAP) is designed to provide financial assistance to rural communities for the development of infrastructure, including water, waste disposal, and electric systems. The program aims to improve the quality of life for rural residents and support rural economic development.

**USDA - Rural Energy Assistance Program**

The Rural Energy Assistance Program (REAP) is a federal initiative aimed at improving the energy efficiency of rural communities by providing loans and grants for energy conservation projects. The program supports projects that save energy, reduce costs, and improve the quality of life for rural residents.

**USDA - Rural Business Development Program**

The Rural Business Development Program (RBDP) is designed to provide financial assistance to rural communities for the development of small businesses and rural economic development projects. The program supports projects that create jobs, increase income, and improve the quality of life for rural residents.

**USDA - Rural Business Development Loans and Grants**

The Rural Business Development Loans and Grants (RBDL) program is designed to provide financial assistance to rural communities for the development of small businesses and rural economic development projects. The program supports projects that create jobs, increase income, and improve the quality of life for rural residents.

**USDA - Rural Technical Assistance Program**

The Rural Technical Assistance Program (RTAP) is a federal initiative aimed at improving the quality of life for rural residents by providing technical assistance and training to rural communities. The program supports projects that improve the economic well-being of rural communities.
Natural Science Foundation: Science, Engineering, and Education for Sustainability Program

The foundation seeks to build a sustainable future through integrating research and education. This seeks to integrate global environmental sustainability, social equity, and economic stability.

National Science Foundation

- Awarded: Fiscal Year 2015
- Type: Solicitation

---

NSF Division of Ocean Sciences

Funding opportunities on the subject of Physical Oceanography. In years past, this program has funded general ocean modeling research projects, including those for global warming, climate change, and ocean acidification. Proposals are encouraged.

National Science Foundation

- Past projects have ranged from about $500K to over $1 million for multi-year projects.
- Application deadline: August 15, 2013

---

NSF Water Sustainability and Climate Program

The overall goal of this program is to improve the understanding of how water systems and land use change. Proposals are encouraged for projects that focus on improving water resources.

National Science Foundation

- $10 million, 2-year awards given.
- Application deadline: September 10, 2013

---

NOAA Climate Program Office

NOAA's Climate Program Office manages the research competition program in which NOAA funds high priority climate science to advance understanding of Earth's climate system. Proposals are encouraged for projects that focus on improving understanding of Earth's climate system.

National Oceanic and Atmospheric Administration

- Projects ranged from $200K to $1 million in awards.
- Fiscal Year 2013:
  - Awards

---

The Wildlife Conservation Society's Climate Adaptation Fund

The fund supports projects that address climate adaptation. Projects range from $50K to $125K.

Wildlife Conservation Society

- Ranging from $50K to $125K
- 1:1 match with a maximum of $75K match funding from local sources.

---

The Dark Divide Charitable Foundation

The foundation's Environmental Programs focus on meeting four main areas of strategic interest:
1. Ensuring the health, function and sustainability of regional and national ecosystems;
2. Cultivating partnerships among governments, businesses, and communities;
3. Building the field of climate change adaptation; and
4. Fostering development of place-based policies and practices.

The Dark Divide Charitable Foundation

- Funding: $75K to $100K

---

The Rockefeller Foundation

The foundation's Environmental Program focuses on improving the understanding of how climate variability affects our health, economy, and well-being.

The Rockefeller Foundation

- The foundation's Environmental Program includes climate change adaptation projects.
- Application deadline: February 2013.

---

The Doris Duke Charitable Foundation

The foundation's Environmental Program supports projects that focus on improving understanding of Earth's climate system. Proposals are encouraged for projects that focus on improving understanding of Earth's climate system.

The Doris Duke Charitable Foundation

- Projects ranged from $200K to $1 million in awards.
- Fiscal Year 2013:
  - Awards

---

The Alfred P. Sloan Foundation

The foundation's Climate Change Program supports projects that focus on improving understanding of Earth's climate system. Proposals are encouraged for projects that focus on improving understanding of Earth's climate system.

The Alfred P. Sloan Foundation

- Application deadline: February 2013.

---

The National Science Foundation

The foundation's NSF- Ocean Sciences Program supports projects that focus on improving understanding of Earth's climate system. Proposals are encouraged for projects that focus on improving understanding of Earth's climate system.

National Science Foundation

- Funding opportunity on the subject of Physical Oceanography.
- Application deadline: February 2013.

---

The Alfred P. Sloan Foundation

The foundation's Climate Change Program supports projects that focus on improving understanding of Earth's climate system. Proposals are encouraged for projects that focus on improving understanding of Earth's climate system.

The Alfred P. Sloan Foundation

- Application deadline: February 2013.

---

The National Science Foundation

The foundation's NSF- Ocean Sciences Program supports projects that focus on improving understanding of Earth's climate system. Proposals are encouraged for projects that focus on improving understanding of Earth's climate system.

National Science Foundation

- Funding opportunity on the subject of Physical Oceanography.
- Application deadline: February 2013.

---
