Florida Unemployment Rate Remains Below National Average

~ Annual job growth continues in educational and health services, but declines overall~

TALLAHASSEE – Florida’s seasonally adjusted unemployment rate was 4.6 percent in January 2008, representing 423,000 jobless out of a labor force of 9,264,000. Florida’s unemployment rate was up slightly by 0.1 percentage point over the month and up by 1.0 percentage point over the year. The national unemployment rate was 4.9 percent in January 2008. Florida’s January 2008 rate of 4.6 percent was the highest rate since October 2004, which was also 4.6 percent.

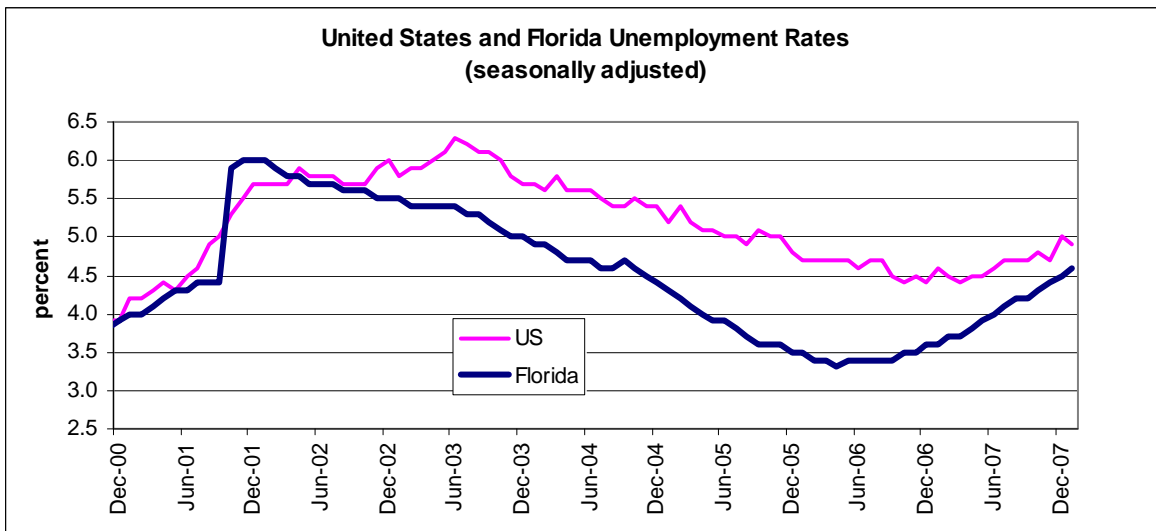

Florida’s nonagricultural employment growth rate was -0.1 percent in January, representing a loss of 7,300 jobs over the year, to reach a total employment level of 8,049,200. This was slower than the national job growth rate for January which was 0.7 percent. The January 2008 job growth rate of -0.1 percent continued the trend of negative over-the-year growth that began in September 2007, primarily due to declines in construction.

“Under the leadership of Governor Crist, we continue to work diligently with our education, workforce and economic development partners to build world class talent, reinvigorate job growth and stimulate our economy,” said Monesia T. Brown, Director of the Agency for Workforce Innovation. “The recent passage of Amendment One - a \$15 billion property tax cut – will put money back into Floridians’ pockets and help fuel spending.”

The Agency for Workforce Innovation works closely with Enterprise Florida, the Florida Chamber of Commerce, Workforce Florida, Inc. and its Regional Workforce Board partners to develop world-class talent and sustain personal and economic growth for Florida’s employers and job seekers. These programs include the Short Time Compensation Program, a voluntary employer program designed to help employers maintain their workforce by offsetting the cost of full-time wages, instead of temporarily laying off employees; the Quick Response Training Program, providing customized training for new or expanding businesses; and the Incumbent and Employed Worker Training Programs, offering upgrade skills training for existing full-time employees.

In addition, the Employ Florida Marketplace, www.EmployFlorida.com, is a powerful online labor market exchange tool specifically designed for employers, job seekers, students, training providers, workforce customer service representatives and professionals, and others seeking benefits and services.

For more information on these and other Agency for Workforce Innovation programs, go to www.FloridaJobs.org.

Florida's Nonagricultural Employment by Industry (Seasonally Adjusted)

- Florida had a net loss of 7,300 jobs in January 2008 compared to a year ago. Construction employment, reacting to declines in the housing market, lost 69,000 jobs over the year (-10.9 percent). Construction losses accounted for 75 percent of job losses in the state.
- Manufacturing (-19,800 jobs, -5.0 percent), financial activities (-1,900 jobs, -0.3 percent), and information (-1,400 jobs, -0.9 percent) continued to have over-the-year declines, mainly due to weakness in fabricated metal product manufacturing; finance and real estate; and publishing.
- Education and health services (+33,800 jobs, +3.4 percent) and total government (+24,500 jobs, +2.2 percent) accounted for the majority of job gains among those industries posting positive annual growth.
- Leisure and hospitality ranked third among Florida's major industries in job growth, expanding by 11,400 jobs over the year (+1.2 percent). Trade, transportation, and utilities increased by 6,500 jobs over January 2007 levels (+0.4 percent), primarily due to wholesale trade (+4,400 jobs, +1.2 percent).

Local Area Unemployment Statistics (Not Seasonally Adjusted)

- In January 2008, Liberty County had the state's lowest unemployment rate (3.1 percent), followed by Alachua and Monroe counties (3.2 percent each) and Jefferson, Leon, and Wakulla counties (3.3 percent each). Sumter and Lafayette counties followed, with unemployment rates of 3.4 and 3.5 percent, respectively.
- Flagler County, at 7.8 percent, had the highest unemployment rate in Florida in January, followed by Hendry County (7.2 percent); Hernando County (7.0 percent); Charlotte County (6.8 percent); and St. Lucie County (6.5 percent each). Flagler County's relatively high unemployment rate was due mainly to declines in the housing market.

www.floridajobs.org

Area Nonagricultural Employment by Industry (Not Seasonally Adjusted)

- The Orlando-Kissimmee Metropolitan Statistical Area (MSA) led the state in over-the-year employment gains (+7,500 jobs, +0.7 percent) in January 2008, followed by the Miami-Miami Beach-Kendall Metropolitan Division (+7,200 jobs, +0.7 percent). Metro areas with the largest annual declines in jobs included Tampa-St. Petersburg-Clearwater (-11,700 jobs), Bradenton-Sarasota-Venice (-11,100 jobs), and Cape Coral-Ft. Myers (-10,800).

Annual Revisions to Estimates

Beginning with this release of January 2008 estimates, the names of two Metropolitan Statistical Areas (MSAs) in Florida have changed. The MSAs with new names are Bradenton-Sarasota-Venice and Lakeland-Winter Haven. The geography of these areas did not change.

Labor force and unemployment estimates for the State of Florida and the Miami-Miami Beach-Kendall Metropolitan Division have been revised back to January 2003. For the other substate areas, estimates for 2007 and 2006 have been revised and revisions back to 2003 are still in progress.

Nonagricultural employment for 2007 and 2006 for the state, all MSAs, and all Metropolitan Divisions have been revised. For selected areas and industries, nonagricultural employment estimates have been revised back to January 1990. All of these revisions are routine and correct for sampling deficiencies, survey error, and Professional Employer Organization (PEO) reporting practices. These data series have been revised to reflect company breakouts of PEOs resulting in a more complete picture of the actual location and industry of jobs.

Benchmark revisions are a standard part of the payroll survey estimation process and take place this same time every year. The benchmark adjustment represents an annual re-anchoring of sample-based employment estimates to full population counts available through Unemployment Compensation tax records filed by nearly all employers in the state.
