Community Development Block Grant – Coronavirus Relief Funding (CDBG-CV) Small Cities Low- to Moderate Income Impact Score

A low- to moderate-income impact score is included when scoring each Community Development Block Grant – Coronavirus Relief Funding (CDBG-CV) Small Cities program application to ensure that the needs of a community's low- to moderate-income population will be considered. Up to 70 points will be awarded based on the project's potential impact on low- to moderate-income persons or households within each local government. The 70 points are allocated in two categories: 1) Percentage of Low- to Moderate-Income Benefit (50 points); and 2) Community Low- to Moderate-Income Population Percentage (20 points).

Category 1: Percentage of Low-to Moderate-Income Benefit

To prioritize projects that will have a higher impact on low- to moderate-income persons or households, 50 points will be awarded to projects that have a presumed benefit to low- to moderate-income persons, 40 points will be awarded to other Low- to Moderate-Income Activities (Area Benefit, Jobs, Limited Clientele), and 15 points will be awarded to projects that meet the Slum/Blight or Urgent Need national objective:

National Objective	Category 1 Score
Presumed Benefit to Low- to Moderate Income Persons	50 Points
Other Low- to Moderate-Income Activities (Area Benefit, Jobs, Limited Clientele)	40 Points
Slum/Blight or Urgent Need National Objective	15 Points

Category 2: Community Low- to Moderate-Income Population Percentage

To prioritize projects that will serve higher populations of low- to moderate-income persons, we took into consideration the low- to moderate-income percentage of each of the communities eligible to apply for CDBG-CV Small Cities Program funding. The low- to moderate-income percentage for each eligible community funding was obtained from the most recently available American Community Survey from HUD¹. For scoring purposes, we organized the data into four distinct groups (or quartiles). The following is a breakdown of each quartile and the points associated with each low- to moderate-income population percentage:

Community Low- to Moderate-Income Population Percentage	Category 2 Score
More than 55%	20 Points
45.01% to 55%	15 Points
35.01% to 45%	10 Points
35% or less	5 Points
