Description:

The Town of Zolfo Springs neighborhood revitalization activity will upgrade and repair the town's existing water distribution system to improve and increase the health and safety for all LMI residents.

The water distribution system is over 40 years old and has exceeded its useful life.

The existing piping does not provide sufficient fire protection and portions of the system have dead-end mains that need to be hydraulically looped to improve service pressure to these service areas.

Existing piping materials have also corroded leading to poor water quality and water leakage.
