Legend: Projects Completed Projects Anticipated to be Complete within 30 days

#	Area	Project	Status
1.	Infrastructure	Cloud Migration	In progress and on schedule. System and environment testing activities extended to January 2023 to address deficiencies identified during testing. Contact Center and Appeals solutions undergoing development to be deployed in the cloud. See Cloud Migration (C2C) Operational Work Plan.
2.		Cloud Application Performance Management	In progress and on schedule. The existing cloud application performance management tool is being tested. See Cloud Application Performance Management Operational Work Plan.
3.	Software - Architecture Modernization	SDLC DevOps	In progress and on schedule. Testing and the project anticipated to be completed in January 2023. See SDLC DevOps Operational Work Plan.
4.		.NET & ORM Upgrade	Project closed out in November 2022. See .NET & ORM Upgrade Operational Work Plan.
5.		Rules Engine	In progress and on schedule. A Request for Quote to procure a mobile-responsive user interface, business rules engine, and integration platform was advertised in early November. See Rules Engine Operational Work Plan.
6.		SOA and API Layer	In progress and on schedule. A Request for Quote to procure a mobile-responsive user interface, business rules engine, and integration platform was advertised in early November. See SOA and API Layer Operational Work Plan.
7.		RA Help Center	Project closed out in December 2021.
8.	Software -	Strategic Planning Office (SPO)	In progress and on schedule.
9.	Procurement	Oversight (IV&V)	In progress and on schedule.
10.		System and Software Integration (SSI)	In progress and on schedule. Vendor submitted and DEO accepted architectural standards. See System and Software Integration Operational Work Plan.
11.	Software –	ВРО	BPO project closed out in October 2022.
12.	Incremental CX/UX Mobile Responsive Software Transformation, including Business Process Optimization	CX/UX	CX/UX in progress and on schedule. A Request for Quote to procure a mobile-responsive user interface, business rules engine, and integration platform was advertised in early November. See CX/UX Operational Work Plan.
13.	Data and	Data Warehouse	Project closed out in January 2022.
14.	Analytics	Reporting	In progress and on schedule. 38 federal reports have been generated, submitted to, and accepted by USDOL since project launch. One final report is being tested and validated. See Reporting Operational Work Plan.
15.		Archival and Purge	In progress and on schedule. Work sessions ongoing to develop business and technical requirements and forecast

December 20, 2022 Page 1 of 7

#	Area	Project	Status
			to be complete in December 2022. See Archive & Purge
			Operational Work Plan.
16.		Master Data Management and	In progress and on schedule. A Data Dictionary and Data
		Interoperability	Catalog are undergoing review. See Master Data
			Management and Interoperability Operational Work Plan.
17.	Security	Security Architecture Review	Project closed out in October 2022.
18.		Identity Management and User Authentication	In progress and on schedule. Phase one of three, focused on claimants, was completed in September 2021. Phase two of three, focused on employers and third-party administrators, has not yet started. Phase three, focused on staff, is in progress. A revised procurement is in progress. See Identity and Access Management Operational Work Plan.
19.		Security Architecture Audit	Postponed to post-modernization.

Are there any scope changes?

The Department sharpened the scope of the Modernization Program to ensure the overall Program's benefits are achieved by June 30, 2023. This process allows the Department to focus its efforts on critical path tasks and activities, ensure resources are allocated, and that System users are provided an enhanced mobile-responsive user interface for filing and managing their Reemployment Assistance claims.

- Two projects' scopes were realigned with the iSF Final Report. The Identity and Access Management project and
 Master Data Management and Interoperability project scopes were originally expanded to include the acquisition
 and installation of tools that would be leveraged agency wide in the future. The Department removed the
 procurement of these tools from each projects' scope to prevent resource constraints that could compete with
 developing a front-end mobile-responsive user interface.
- Two projects' scopes were clarified to focus on the mobile-responsive user interface. The Department shifted the focus of Rules Engine project and SOA and API Layer project scopes so that the tools provided by each project will prioritize developing new functionality for the mobile-responsive user interface. Incremental enhancements, including redeveloping existing System functionality in the new tools, will occur in post-modernization.
- One project's scope was adjusted to reduce risk to the System. The Archival and Purge project is intended to
 archive or purge Reemployment Assistance data according to Florida's records retention schedule. Due to the
 extensive testing needs to implement an archival and purge process, including temporarily implementing a hold
 on all other System enhancement work, that could introduce risk to the System and the Modernization Program,
 the Department will defer the archiving and purging of data to continuous modernization.
- One project was de-scoped from the overall Modernization Program. The Security Architecture Audit is intended
 to confirm the resolution of architectural deficiencies identified during the Security Architecture Review project.
 However, the iSF Final Report did not contemplate the timeline or other resources that would be necessary to
 resolve the identified deficiencies. The Department has begun working toward resolving the deficiencies and will
 defer the Security Architecture Audit project to post-modernization.

Is the project currently within budget?

The project is currently under budget. Expenditures from September through December are underreported pending a release of funds from General Revenue (GR) and ARPA sources. The Department requested a \$26 million release (\$6 million from GR and \$21 million from ARPA) on September 30 and submitted additional information in November and December to facilitate the requested release of funds.

December 20, 2022 Page 2 of 7

REEMPLOYMENT ASSISTANCE CLAIMS AND BENEFITS	PROJECT STATUS REPORT FOR	FISCAL YEAR 2021-22
INFORMATION SYSTEM MODERNIZATION	DECEMBER 2022	DEPARTMENT OF ECONOMIC OPPORTUNITY

Do you expect the project to remain within budget?

Yes

If the project is not on schedule, briefly explain why and what the agency is doing to bring the project back on schedule.

The Program is on schedule. The Department has developed proactive measures and continues to mitigate any obstacles that could impact project schedules. For example:

- 1. The Department has reduced a staffing resources risk previously identified by the Reemployment Assistance Modernization Program's IV&V vendor as a high-level risk to a medium-level risk. This positive trend is a result of:
 - Proactive outreach with staff augmentation vendors to gain insights into increase both the quality and quantity
 of specialized information technology professionals;
 - Offering flexibilities for remote work and competitive pay, as needed. The Department initiated full-time remote work for critical IT positions in May 2022 to help promote hiring and retention;
 - Including a staffing requirement in all technology procurements; and
 - Leveraging a resource capacity analysis tool to better understand where existing resources are over-committed and to help identify the most critical vacancies to be filled.
- 2. The Department has applied lessons-learned to reduce procurement-related delays that the Reemployment Assistance Modernization Program's IV&V vendor originally classified as either a high or medium risk, though some risks are trending downward or have been subsequently closed. To mitigate these issues, the Department has:
 - Included the Department's Vendor Core Contract in solicitation documents to ensure vendors are provided the Department's terms and conditions as early as possible.
 - Established priorities with vendors who are developing project requirements to fast-track procurement development.
 - Developed well-defined scopes of work and detailed project requirements for the remaining technology projects, to ensure vendors are provided clear direction at the outset of each project.
- 3. The Department has worked closely with other states and the National Association of State Workforce Agencies to apply best-practices and develop innovative solutions to satisfy burdensome regulatory compliance requirements. For example, to comply with IRS Publication 1075:
 - The Department has developed a manual workaround for Appeals cases that contain a Federal Tax Information (FTI).
 - The Department is building a separate environment to house FTI data that is accessible only to DEO staff.

Major Project Tasks and Activities Accepted or In Progress this Reporting Period

The Department has updated this section to include only active projects.

- [Infrastructure] Cloud Migration: In progress and on schedule. This project includes transitioning the System from operating on hardware stored on-premise to a cloud-based environment to ensure all aspects of the System are available to users during periods of high demand for continuous claims processing, including both web-based and call center services.
 - The Department is migrating various components of the System into a cloud-hosted environment, including files, databases, applications, and environment infrastructure. In this reporting period, testing revealed deficiencies that required additional work. As a result, the timeline to deploy the System in the cloud has been extended from December 2022 to January 2023.
 - The Digital Appeals Recording Solution (DARS) vendor has begun application development to deploy this technology in a cloud-hosted environment. Development work is anticipated to continue through December 2022. DARS enables the Department to record appeals hearings, which provides due process to employers, third-party administrators, and claimants who have filed an appeal on a Reemployment Assistance claim.

December 20, 2022 Page 3 of 7

- The Visual Interactive Voice Response technology vendor continues to develop business and technology requirements that will be used to enhance the Department's existing Customer Call Center technology and provide additional self-service options for Reemployment Assistance claimants.
- The Department is reevaluating utilizing ChatBot technology, including security requirements. Additional information is being gathered and a risk analysis is being performed to drive informed decision-making.
- [Infrastructure] Cloud Application Performance Management. This project includes utilizing a software tool that provides visibility into key System performance indicators, such as numbers of concurrent users, for System monitoring. The tool also allows the Department to set defined thresholds for performance and receive notification if remedial actions are needed to maintain System performance and prevent System downtime.
 - The Department installed the cloud version of the existing application performance management tool and testing has been initiated. Testing will be conducted for several months, and the tool is anticipated to be in production by February 2023.
- [Software] SDLC DevOps. This project includes improving documentation for the System, including application design documentation, artifacts, and dataflow diagrams. This helps establish a process that sets a standard for maintaining System documentation and planning the deployment of System enhancements that align and prioritize Reemployment Assistance program requirements with the System's functionality.
 - The Department completed software integration of the ServiceNow software with the new DevOps environment this reporting period. ServiceNow now serves as a repository for System requirements and syncs and cross-references the System's testing environment with test results.
 - The project was originally forecast to be complete in November 2022; however, the timeline will be extended to at least January 2023 after testing revealed deficiencies that required additional work.
- [Software] Rules Engine. This project includes utilizing a software tool that serves as a separate infrastructure environment for managing and executing business rules that govern how Reemployment Assistance claims are processed. By using a rules engine to manage and operate business rules, specifically those rules that are updated periodically to accommodate changes in state or federal law, the Department gains staff efficiency and helps support System performance. A rules engine is more user-friendly and does not require System code changes, which means information technology staff can be repurposed for larger, more complex System enhancements and business rule changes can be deployed faster. Additionally, because the rules engine operates in a separate infrastructure environment, it allows for increased System performance.
 - The Department advertised a Request for Quote this reporting period for a business rules engine (Rules Engine project), integration platform (SOA and API Layer project), and mobile-responsive user interface (CX/UX project), including services to ensure interoperability. Vendor responses are due December 2022.
 - The Department continues working to develop an initial catalog of business rules that will be used to develop a continuous modernization plan for the business rules engine. The catalog will identify all business rules that govern the administration of the Reemployment Assistance program, the number of times each rule has changed, the date(s) each rule has changed, and the relative complexity of each rule. This is a labor-intensive process that is anticipated to be complete in May 2023.
- [Software] SOA and API Layer. This project will help promote a more efficient System by creating a layer between various components of the System that serves as the messenger for all data exchanges. This layer helps prevent a downturn in System performance by offloading demand on the System.
 - The Department advertised a Request for Quote this reporting period for a business rules engine (Rules Engine project), integration platform (SOA and API Layer project), and mobile-responsive user interface (CX/UX project), including services to ensure interoperability. Vendor responses are due December 2022.
- [Planning, Coordination, and Oversight] Strategic Planning Office. This project equips the Department with standards, governance, and project management services for the Reemployment Assistance Modernization Program, and

December 20, 2022 Page 4 of 7

oversees the Program's scope, schedule, and budget to promote accountability and alignment with Department priorities.

- The Strategic Planning Office (SPO) continues to provide overall Program and project management support.
- [Planning, Coordination, and Oversight] Independent Verification and Validation. This project includes leveraging an independent third-party consultant to provide objective and proactive risk identification and assessment to the Department. Observations and risks identified by the consultant are used by the Department to implement the Reemployment Assistance Modernization Program and any necessary mitigating strategies.
 - o IV&V continues to attend various Department meetings to support Program and project oversight.
- [Planning, Coordination, and Oversight] System and Software Integration. This project includes leveraging the expertise of a third-party services provider with experience in strategic planning, System design, System development, and System integration for large multi-component system modernization efforts to ensure the Department's various modernization projects work as intended to deliver an enhanced user experience.
 - The Department executed a contract amendment with the vendor this reporting period that will allow the vendor to address immediate System architecture documentation needs and equip the Department with information to maintain updated architecture documentation as the System is modernized in the future. The first architecturerelated deliverable, focused on architectural standards, was accepted this reporting period.
 - The Department and the vendor completed and advertised a Request for Quote this reporting period for a business rules engine (Rules Engine project), integration platform (SOA and API Layer project), and mobileresponsive user interface (CX/UX project), including services to ensure interoperability. Vendor responses are due December 2022.
- [Software] Incremental CX/UX Mobile Responsive Software Transformation. This project includes optimizing the existing System and developing a user-friendly front-end for Reemployment Assistance claimants that is also mobile-friendly. The transformation will occur incrementally to ensure all System users benefit from System optimization, with a focus on enhancing the claimant experience first.
 - The Department advertised a Request for Quote this reporting period for a business rules engine (Rules Engine project), integration platform (SOA and API Layer project), and mobile-responsive user interface (CX/UX project), including services to ensure interoperability. Vendor responses are due December 2022.
- [Data and Analytics] Reporting. This project includes migrating all System reports from the System to the Data Warehouse and developing and validating all federally mandated Reemployment Assistance reports. The data warehouse provides the Department with standardized data and reduces the need for staff intervention for future reporting activities.
 - o Of the 39 reports in-scope for this project, 38 are complete and one is currently being tested and validated.
- [Data and Analytics] Archival and Purge. This project establishes a process for archiving and purging appropriate Reemployment Assistance data. These activities will reduce the Department's data storage costs and greatly impact the efficiency and stability of the System, because it will purge any data that is no longer required to be maintained by the Department and allow for the secure storage in a separate environment of any data that the Department must maintain according to the state's records retention schedule.
 - o Work sessions with various Reemployment Assistance business units are being held to develop project requirements and nearing completion. Work sessions are targeted to be complete in the next reporting period.
 - The Department's Records Management Policy is undergoing final review and is anticipated to be finalized by the next reporting period. This policy will provide the latest guidance to the project team about data to be archived or purged.
 - The project's scope of work was complete this reporting period.
 - A Request for Information is being developed to help guide the development of a procurement for a technology tool for archiving and purging data.

December 20, 2022 Page 5 of 7

REEMPLOYMENT ASSISTANCE CLAIMS AND BENEFITS	PROJECT STATUS REPORT FOR	FISCAL YEAR 2021-22
INFORMATION SYSTEM MODERNIZATION	DECEMBER 2022	DEPARTMENT OF ECONOMIC OPPORTUNITY

- [Data and Analytics] Master Data Management and Interoperability. This project focuses on creating a data catalog and data dictionary for the Department. These efforts promote data standardization and data sharing among information technology systems that exchange information with the Reemployment Assistance program.
 - A draft Data Dictionary and Data Catalog have been prepared and is undergoing analysis and review with the Bureau of Workforce Statistics and Economic Research.
- [Security] Identity and Access Management. This project includes updating all Departmental identity management
 and access control policies and implementing enhanced front-end security measures to authenticate System users.
 These efforts ensure the individuals who have access to the System are provided the appropriate amount of access
 for their need.
 - The Department did not award a contract for the IAM procurement for an IAM tool and services to support the alignment with the sharpened scope discussed on page 2. A revised draft IAM procurement is nearing completion that will include IAM services to achieve the goals and objectives identified in the iSF Report for the IAM project.
- [Security] Security Architecture Audit. This project includes a technical audit that will be provided by an independent third-party to review and test all technical aspects of the System for improved System security.
 - o This project has been deferred to post-modernization.

SECTION 1 — OVERALL PROJECT PLAN

I. Project Charter

The Reemployment Assistance Claims and Benefits Information System (System) and supporting middleware software is currently deployed on physical, on-premises servers managed exclusively in-house. Most of the physical infrastructure is from the original go-live in 2013, is at the end of its life cycle, and is due for replacement by 2020. As the Department of Economic Opportunity (DEO) continues to assess and develop an understanding for choosing, managing, governing, and securing cloud services and tools; the realization is that cloud computing is the foundation that enables Workforces Services to transform, differentiate, and continuously improve.

A cloud first strategy plays a central role in next-generation business initiatives. These initiatives include digital business transformation, automation, and Artificial Intelligence (AI). Cloud computing offers enhanced disaster recovery and high availability, optimized operations and maintenance costs, and built-in scalability.

As part of the modernization initiatives, DEO is undertaking a project to complete the planning for remaining migration, readiness activities, and migration of Reemployment Assistance infrastructure from the State Data Center and Winter Haven Disaster Recovery sites, as well as moving the System to a Cloud Service Provider using an IaaS hosting model. Included within the migration project is an improved document storage solution and the transition to a cloud-based IVR solution. Once the migration is completed, focus on assessment of additional, long term, cloud costs, performance, and maintainability considerations such as utilization of pay-as-you-go models, and potential utilization of Platform as a Service (PaaS) as the long-term development and delivery model.

A. Scope Statement

Complete planning for remaining migration, readiness activities, and migrate Reemployment Assistance infrastructure from the State Data Center and Winter Haven Disaster Recovery (DR) sites, as well as moving the System to a Cloud Service Provider using an IaaS hosting model; implement an improved document and generation management solution; transition to a cloud-based IVR solution and implement additional Reemployment Assistance Contact Center enhancements.

B. Project Objectives and Business Benefits

Project Objective	Business Benefit
Complete migration plan and all application and database layer	Mitigate technical risks and unknowns associated with migration
remediation and readiness modifications	
Migrate all System infrastructure to the Cloud using an IaaS hosting model	 Cloud deployment and delivery models offer on demand resource acquisition and auto-scaling. Cloud deployment and delivery models reduce or eliminate Cap-Ex and offer payas-you-go Op-Ex resource costs Cloud deployment and delivery models provide cost and operational efficiencies
Determine and implement improvements to document storage and workflow in IaaS (FileNET, content management which includes in BRAVA functionality and document management system)	Cloud deployment and delivery models provide cost and operational efficiencies
Determine and implement improved document management solution and select and implement IVR solutions in IaaS	Cloud deployment and delivery models provide cost and operational efficiencies

C. Critical Success Factors

- Migration of all System infrastructure to an IaaS hosting model
- Implementation of improved document storage and workflow solutions
- Implementation of improved document management solution
- Upgrade IVR solution in IaaS
- DR cloud migration solution and DR Plan
- Contingency Plan for non-cloud ready applications

D. Key Dates

Key Date	Importance and Relevance to the Project
November 10, 2021	Cloud Migration – Connect to Cloud Kick-Off
November 18, 2021	IVR – Kick-Off
November 30, 2021	ULA Vendor under contract / PO issued
December 2, 2021	FileNet RFQ submitted for Bid (package pulled)
December 17, 2021	FileNet Proposals Due (package pulled)
December 26, 2021	Data Intensity Contract Executed
December 27, 2021	Fairfax Proposal Received (package pulled)
January 2, 2022	Oracle Upgrade from 12 to 19C Complete

Key Date	Importance and Relevance to the Project
January 11, 2022	2022 Session begins
January 27, 2022	FileNet Change in Approach
February 1, 2022	Data Intensity / Database Migration Kick-Off
March 11, 2022	2022 Session ends
May 9, 2022	.NET Upgrade
May 9, 2022	Database Migration
October 1, 2022	Object Relational Model
June 30, 2022	GTS / IVR Go Live
June 30, 2022	Phase I - FileNet Lift and Shift
September 30, 2022	Full System Testing in PreProd
September 30, 2022	Visual IVR and Chat Bot Plan in Place
October 28, 2022	Interfaces
November 1,2022	Full Production Testing
December 1 2022	Visual IVR and Chat Bot Go Live
December 31, 2022	DARS
December 31,2022	Phase II - FileNet

E. Major Deliverables

Major Deliverable	Deliverable Description
Upgrade Network	Implement Palo Alto Firewalls
Oracle Upgrade	Oracle upgrade from 12 to 19C
IBM FileNET Upgrade	Upgrade to latest version 5.5.7
Remediate IBM FileNet	Move workflow and document management
Remediate IBWI FileNet	functionality to native cloud-based application
Object Relational Model	Upgrade to latest version and migrate to Azure
Object Relational Model	environment
Database Migration	Migrate Oracle and SQL Databases to Azure
Database Wigiation	environment
	Complete necessary refactoring and upgrade .NET
Application	framework from 4.0 to 4.6 and migrate to Azure
	environment
Active Directory	Complete deployment of AD in IaaS
Contact Center / IVR	Replace IVR system with cloud-based market leader
Defect Tracking and Load Runner	Upgrade/migrate HP ALM to Azure environment and
Defect Tracking and Load Runner	implement Load Runner Cloud SaaS solution
	Upgrade OpenText Blazon version and migrate to
Correspondence	Azure environment; explore native cloud-based
	solutions to integrate Brava Viewer
Interfaces	Migrate SFTP server to Azure environment
Batch Management	Complete upgrade and migration of the UC4 servers
Daten Management	to Azure environment
Testing Data Management	Select and implement COTS product

F. Major Milestones

	Major Milestone	Milestone Description
1.	Execution of Vendor Contracts	Execution of multiple vendor contracts vital
1.	Execution of Vendor Contracts	for the success of the project
2.	Network Upgrade	Implement Palo Alto Firewalls
3.	Oracle Upgrade	Upgrade to the latest version 19C
4.	IBM FileNET Upgrade	Upgrade to latest version 5.5.7
5.	Contact Center / IVR	Upgrade IVR to a cloud-based system
6.	Database Migration	Migrate 66 application servers VM's
7.	UAT Testing	Completion of User Acceptance Testing

G. Procurement

Procurement	Description	Justification	Needed By
C2191-A10	This amendment adds E911	To be compliant, all users	Complete
GTS	functionality to the existing Genesys	must have the ability to call

		automation. Migration	
		support services are required	
		to upgrade UC4 and migrate	
		to the Azure platform.	

H. Key Stakeholders

Key Stakeholder	Project Interest
Dane Eagle	Secretary, Department of Economic Opportunity
Adrienne Johnston	Deputy Secretary, Workforce Services, DEO
Domenic DiLullo	Chief Technology Officer, DEO
Allyce Moriak	Chief Financial Officer, DEO
Wendy Castle	RA Modernization Program Owner - Business
Paul Forrester	RA Modernization Program Owner – Information Technology
David Sinclair	Project Manager
Peraton	System and Software Integrator

I. Significant Project Assumptions and Constraints

Project Assumptions

- All identified funding is available.
- The identified System requirements are correct and complete.

- The assigned IT resources possess relevant knowledge and skills to complete the identified tasks.
- Members of the project team will have access to the necessary tools, hardware, and materials necessary to complete the identified tasks.
- All relevant stakeholders will attend required status meetings. However, there may be instances where some stakeholders are unavailable to attend.
- The project sponsor will be responsive and prepared to make decisions regarding the project cost, scope, and schedule.
- Key contracts are sequenced in relation to the project schedule.

Project Constraints

- SMEs are over allocated to this, other Reemployment Assistance projects, and regular business activities.
- DEO continues to be challenged with securing staff resources.

II. Work Breakdown Structure

Task Name	Duration	Start	Finish
Initiation Risk & Complexity Assessment - FINAL - Cat 2	0.25 days	Mon 11/15/21	Mon 11/15/21
Planning Risk & Complexity Assessment - FINAL - Cat 2	0.25 days	Mon 1/10/22	Mon 1/10/22
Deliverable: Project Charter	10 days	Mon 10/11/21	Fri 10/22/21
Develop Project Charter	8 days	Mon 10/11/21	Wed 10/20/21

Resource Plan Complete	0 days	Mon 10/25/21	Mon 10/25/21
Database Migration - Resource Plan	3.13 days	Tue 1/18/22	Fri 1/21/22
Develop Resource Plan	0.25 days	Tue 1/18/22	Tue 1/18/22
Review/Update Resource Plan	0.25 days	Wed 1/19/22	Wed 1/19/22
Approve Resource Plan	1 day	Thu 1/20/22	Thu 1/20/22
Resource Plan Complete	0.13 days	Fri 1/21/22	Fri 1/21/22
IVR / GTS - Resource Plan	2 days	Tue 11/16/21	Wed 11/17/21
Develop Resource Plan	0.25 days	Tue 11/16/21	Tue 11/16/21
Review/Update Resource Plan	0.25 days	Tue 11/16/21	Tue 11/16/21
Approve Resource Plan	1 day	Wed 11/17/21	Wed 11/17/21
Resource Plan Complete	0.13 days	Wed 11/17/21	Wed 11/17/21
FileNet - Resource Plan	1 day	Mon 2/21/22	Mon 2/21/22
Develop Resource Plan	1 day	Mon 2/21/22	Mon 2/21/22
Review/Update Resource Plan	1 day	Mon 2/21/22	Mon 2/21/22
Approve Resource Plan	1 day	Mon 2/21/22	Mon 2/21/22
Resource Plan Complete	1 day	Mon 2/21/22	Mon 2/21/22
Connect to Cloud Deliverable: Project Schedule	4.13 days	Mon 10/18/21	Fri 10/22/21
Prepare Work Breakdown Structure	0.5 days	Mon 10/18/21	Mon 10/18/21
Develop Project Schedule	2 days	Tue 10/19/21	Wed 10/20/21
Review/Update Project Schedule	0.25 days	Thu 10/21/21	Thu 10/21/21
Approve Project Schedule	0.13 days	Fri 10/22/21	Fri 10/22/21
Project Schedule complete	0 days	Fri 10/22/21	Fri 10/22/21
Database Migration Deliverable: Project Schedule	2 days	Thu 2/3/22	Mon 2/7/22
Prepare Work Breakdown Structure	0.25 days	Thu 2/3/22	Thu 2/3/22
Develop Project Schedule	0.38 days	Thu 2/3/22	Thu 2/3/22
Review/Update Project Schedule	0.5 days	Fri 2/4/22	Fri 2/4/22
Approve Project Schedule	0.25 days	Fri 2/4/22	Fri 2/4/22
Project Schedule complete	0 days	Mon 2/7/22	Mon 2/7/22
IVR / GTS Deliverable: Project Schedule	34 days	Fri 10/29/21	Wed 12/15/21

Prepare Work Breakdown Structure	1 day	Tue 11/16/21	Tue 11/16/21
Develop Project Schedule	2 days	Wed 11/17/21	
Review/Update Project Schedule	3 days	Fri 11/19/21	Tue 11/23/21
Submit Project and Sub Project Plans	33 days	Fri 10/29/21	Tue 12/14/21
Approve Project Schedule	1 day	Wed 12/15/21	Wed 12/15/21
Project Schedule complete	0 days	Wed 12/15/21	Wed 12/15/21
FileNet Deliverable: Project Schedule	0.25 days	Mon 2/21/22	Mon 2/21/22
Prepare Work Breakdown Structure	0.25 days	Mon 2/21/22	Mon 2/21/22
Develop Project Schedule	0.25 days	Mon 2/21/22	Mon 2/21/22
Review/Update Project Schedule	0.13 days	Mon 2/21/22	Mon 2/21/22
Approve Project Schedule	0.13 days	Mon 2/21/22	Mon 2/21/22
Project Schedule complete	0 days	Mon 2/21/22	Mon 2/21/22
Deliverable: Project Management Plan	30 days	Mon 10/25/21	Fri 12/3/21
Develop Project Management Plan	10 days	Mon 10/25/21	Fri 11/5/21
Review/Update Project Management Plan	5 days	Mon 11/15/21	Fri 11/19/21
Approve Project Management Plan	4 days	Tue 11/30/21	Fri 12/3/21
Project Management Plan complete	0 days	Fri 12/3/21	Fri 12/3/21
Deliverable: Project Budget	61 days	Tue 9/7/21	Tue 11/30/21
Prepare Project Budget	14 days	Tue 9/7/21	Fri 9/24/21
Review/Update Project Budget	57 days	Mon 9/13/21	Tue 11/30/21
Approve Project Budget	3 days	Mon 11/22/21	Wed 11/24/21
Project Budget complete	0 days	Mon 11/29/21	Mon 11/29/21
Deliverable: Project Spending Plan	154.75 days	Mon 10/4/21	Fri 5/6/22
Prepare a Project Spending Plan	154.75 days	Mon 10/4/21	Fri 5/6/22
Review/Update Project Spending Plan	144.75 days	Mon 10/18/21	Fri 5/6/22
Approve Project Spending Plan	139.75 days	Mon 10/25/21	Fri 5/6/22
Project Spending Plan complete	0 days	Mon 10/25/21	Mon 10/25/21
Conduct Lessons Learned Meeting	2 days	Fri 10/1/21	Mon 10/4/21
Schedule Lessons Learned meeting	1 day	Fri 10/1/21	Mon 10/4/21
Conduct Lessons Learned meeting	0.35 days	Mon 10/4/21	Mon 10/4/21
Record Lessons Learned	1 day	Mon 10/4/21	Mon 10/4/21
Project Management Plan	6.13 days	Mon 10/18/21	Tue 10/26/21
Organizational and Governance Structure	0.25 days	Mon 10/18/21	Mon 10/18/21
Resource Plan	0.25 days	Mon 10/18/21	Mon 10/18/21
Schedule Management Plan	0.25 days	Tue 10/19/21	Tue 10/19/21
Quality Assurance	0.25 days	Thu 10/21/21	Thu 10/21/21
Procurement Management	0.25 days	Thu 10/21/21	Thu 10/21/21
Spend Plan	0.25 days	Mon 10/25/21	Mon 10/25/21
Lessons Learned	0.25 days	Mon 10/25/21	Mon 10/25/21
PMP Approved	0.13 days	Tue 10/26/21	Tue 10/26/21
Planning Phase complete	0 days	Thu 2/24/22	Thu 2/24/22
Execution	469 days	Tue 9/7/21	Fri 6/23/23

ojects)	11 days	Thu 6/1/23	Thu 6/15/23
Required Project Development	36 days	Mon 10/4/21	Mon 11/22/2
C2C Tasks	342.48 days	Tue 9/7/21	Thu 12/29/22
Azure Training	140.75 days	Mon 10/4/21	Mon 4/18/22
Azure Training Complete	140.75 days	Mon 10/4/21	Mon 4/18/22
Oracle 19c Upgrade	38 days	Wed 12/1/21	Fri 1/21/22
GOV Cloud Services	168 days	Thu 10/7/21	Tue 5/31/22
Software Licenses	12 days	Mon 11/15/21	Wed 12/1/21

Validations TOP Update File	2 days	Mon 3/7/22	Wed 3/9/22
SQL Server Production	12 days	Mon 3/7/22	Wed 3/23/22
SAP Crystal Report Server - Prod	2 days	Mon 3/7/22	Wed 3/9/22
APP Server - Prod	1 day	Mon 2/21/22	Tue 2/22/22
SFTP Server -Prod	1 day	Mon 2/21/22	Tue 2/22/22
SQL Server UAT Complete	139.63 days	Thu 10/7/21	Thu 4/21/22
DEVOPS Environment	66 days	Mon 2/28/22	Tue 5/31/22
Setup Dev Servers	35 days	Fri 3/11/22	Fri 4/29/22
Setup Web Servers	4 days	Mon 3/14/22	Fri 3/18/22
Setup App Servers	43.45 days	Mon 2/28/22	Thu 4/28/22
Azure Scale Set	43.45 days	Mon 2/28/22	Thu 4/28/22
Install App Servers	39 days	Mon 2/28/22	Fri 4/22/22
Setup Oracle Server	14 days	Mon 2/28/22	Fri 3/18/22
Setup SQL Server	1 day	Mon 2/28/22	Tue 3/1/22
Connectivity Established between Web, App, DB and AD works	0 days	Tue 3/1/22	Tue 3/1/22
Setup FileNet Server	1 day	Mon 2/28/22	Tue 3/1/22
Make sure applications test works with FileNet	40 days	Fri 3/4/22	Fri 4/29/22
Setup UC4 server	44 days	Mon 2/28/22	Fri 4/29/22
Setup of UCF Batch Scheduling App	44 days	Mon 2/28/22	Fri 4/29/22
UC4 Support Purchase	44 days	Mon 2/28/22	Fri 4/29/22
Setup CONNECT Batch List (Dependent on UC4 being done)	43 days	Tue 3/1/22	Fri 4/29/22
UC4 Testing with Connect Complete	40 days	Fri 3/4/22	Fri 4/29/22
Setup QAS server	34 days	Mon 3/7/22	Fri 4/22/22
QAS testing with Connect Complete	31 days	Thu 3/10/22	Fri 4/22/22
Setup the Crystal Report Server	33 days	Tue 3/8/22	Fri 4/22/22

PreProd (Test)	10 days	Mon 10/17/22	Fri 10/28/22
Conduct UAT for DEV	10 days	Thu 10/27/22	Wed 11/9/22
General Testing	10 days	Fri 10/14/22	Thu 10/27/22
Update FILENET DEV CPE to 5.5.7	19 days	Fri 10/14/22	Wed 11/9/22
Workflow removal	10 days	Fri 10/14/22	Thu 10/27/22
content.	10 days	Fri 10/14/22	Thu 10/27/22
Modify Connect .Net DEV UI Connect changes for workflows and			
DEV System	54 days	Fri 10/14/22	Thu 12/29/22
Workflow Migration	30.13 days	Thu 9/1/22	Thu 10/13/22
Outline CONNECT Task-line - Detailed actions and owners	8.52 days	Thu 9/1/22	Tue 9/13/22
CONNECT UI/UX - Research, outline, update, and test the look and feel of the CONNECT interface.	30 days	Thu 7/21/22	Wed 8/31/22
Research existing workflow processing to determine what Oracle table design will best represent the DEO environment.	30 days	Thu 7/21/22	Wed 8/31/22
Develop a Connect Team	15 days	Fri 7/1/22	Thu 7/21/22
3rd Party On Board for Filenet	44 days	Mon 5/2/22	Thu 6/30/22
Develop SOW for Competitive Vendor Bid	1 day	Mon 5/2/22	Mon 5/2/22
Develop SOW for FileNet Resource	141.75 days	Mon 10/4/21	Wed 4/20/22
FileNet Phase 2	323 days	Mon 10/4/21	Thu 12/29/22
FileNet Phase 1 Complete	193.63 days	Tue 9/7/21	Fri 6/3/22
Content Migration	193.63 days	Mon 10/4/21	Thu 6/30/22
Cut over items for GO LIVE	148.63 days	Mon 10/4/21	Thu 4/28/22
Implementation of CYA application on the Production FileNet System in the cloud	148.63 days	Mon 10/4/21	Thu 4/28/22
Modify Connect .Net Provider Class for workflows and content.	143.63 days	Mon 10/4/21	Thu 4/21/22
Clone CPE 5.2.1.7 and PE 5.1 in legacy mode for Production	148.63 days	Mon 10/4/21	Thu 4/28/22
Modify Connect .Net TEST Provider Class for workflows and content.	148.63 days	Mon 10/4/21	Thu 4/28/22
Clone CPE 5.2.1.7 and PE 5.1 in legacy mode for TEST	141.63 days	Mon 10/4/21	Tue 4/19/22
Modify Connect .Net DEV Provider Class for workflows and content.	-	Mon 10/4/21	Tue 4/19/22
Clone CPE 5.2.1.7 and PE 5.1 in legacy mode for DEV	141.75 days	Mon 10/4/21	Tue 4/19/22
IBM FileNet Phase 1	212.63 days	Tue 9/7/21	Thu 6/30/22
Setup Filenet server	33 days	Thu 4/14/22	Tue 5/31/22
Make sure of connectivity from Web, app, DB, servers and AD works	-	Thu 4/14/22	Fri 5/27/22
Setup SQL Server	14 days	Mon 4/18/22	Fri 5/6/22
Setup Oracle server	10 days	Mon 4/4/22	Mon 4/18/22
Setup App Servers	34 days	Mon 4/4/22	Fri 5/20/22
Setup Web servers	34 days	Mon 4/4/22	Fri 5/20/22
Setup Active Directory servers	1 day	Mon 4/4/22	Tue 4/5/22
PreProd Environment	41 days	Mon 4/4/22	Tue 5/31/22
03-SDLC Dev Ops: Migrate current work from TFS to DevOps	1 day	Fri 4/29/22	Mon 5/2/22
DevOps ENV Complete	66 days	Mon 2/28/22	Tue 5/31/22
Setup the Autocoder server	3 days	Wed 3/9/22	Mon 3/14/22
	0 days	Mon 3/14/22	Mon 3/14/22

and content.	10 days	Mon 10/17/22	111 10/20/22
Workflow removal	10 days	Mon 10/17/22	Fri 10/28/22
Update FILENET TEST CPE to 5.5.7	12.33 days	Tue 11/1/22	Thu 11/17/22
General Testing	10 days	Tue 11/1/22	Mon 11/14/22
Conduct UAT for TEST	7.33 days	Tue 11/8/22	Thu 11/17/22
Update Production	37 days	Tue 11/8/22	Thu 12/29/22
Modify Connect .Net Production UI Connect changes for workflows and content.	7.33 days	Tue 11/8/22	Thu 11/17/22
Workflow removal	10 days	Tue 11/15/22	Mon 11/28/22
Update FILENET PRODUCTION CPE to 5.5.7	20 days	Thu 12/1/22	Thu 12/29/22
General Testing	10 days	Thu 12/1/22	Wed 12/14/22
Conduct UAT for PROD	10 days	Wed 12/14/22	Tue 12/27/22
Lessons Learned	1 day	Wed 12/28/22	Wed 12/28/22
FileNet Project Complete	0 days	Thu 12/29/22	Thu 12/29/22
Data Intensity Database Migration	211.75 days	Tue 9/7/21	Wed 6/29/22
Standby and Non Prod System Migrated	169.63 days	Mon 10/4/21	Tue 5/31/22
TSTELNET	171.75 days	Tue 9/7/21	Wed 5/4/22
Firreprod Standby	170.63 days	Mon 10/4/21	Wed 6/1/22
Firrest	172.63 days	Tue 9/7/21	Thu 5/5/22
Standby and Non Prod System Complete	171.75 days	Tue 9/7/21	Wed 5/4/22
UCF 4 Out for bid	149.75 days	Tue 9/7/21	Mon 4/4/22
Production Migration Complete	192.75 days	Mon 10/4/21	Wed 6/29/22
Disaster Recovery	193.75 days	Tue 9/7/21	Fri 6/3/22
PRODRPRT Migrated	193.75 days	Tue 9/7/21	Fri 6/3/22
DRFLNET Migrated	193.75 days	Tue 9/7/21	Fri 6/3/22
DRFIRRE Migrated	193.75 days	Tue 9/7/21	Fri 6/3/22
DR Production Migration Complete	192.75 days	Tue 9/7/21	Thu 6/2/22

IV. Project Spending Plan

Total Planned Cost	Budget Cost	Actual Cost
\$2.8 M	\$12.34 M	\$2,804,045.44

V. Project Organization and Methodology

A. Project Organizational Chart

B. Project Roles and Responsibilities

Project Role	Resource Name	Responsibilities
Executive Sponsor	Adrienne Johnston	 Provide guidance on overall strategic direction Advise the Strategic Planning Office and project manager of risks that may impact the project Facilitate resolution of significant issues in the project Review and sign off on key milestones
СТО	Domenic DiLullo	 Provide guidance on overall strategic direction Advise the Strategic Planning Office and project manager of risks that may impact the project Facilitate resolution of significant issues in the project Review and sign off on key milestones
Strategic Planning Office	Beacon.Gov	 Monitor project progress Provide guidance and support to project manager and project team members
Project Manager	David Sinclair	 Manage all aspects of the project and ensure compliance with PMP Monitor project progress and schedule adherence Complete all documents related to the project Identify and manage risks according to the PMP
Business Lead	Wendy Castle	 Review deliverables and project documents, identifying any deficiencies Review and approve deliverables Review and approve RFCs
Technical Lead	Quinton Lightfoot	 Review deliverables and project documents, identifying any deficiencies Review and approve deliverables Review and approve RFCs

Project Role	Resource Name	Responsibilities
Functional Team	Eddy Richards Ram Iyer Anand Kothandan Mannix Hawkins John Ramos Al Rehwinkel	 Contribute subject matter expertise Complete assigned project tasks in accordance with the Project Schedule Identify risks and issues to the Project Managers in accordance with the Risk and Issue Management section of this PMP Assist the Project Managers in responding to risks and issues Assist the Project Manager in evaluating change requests
Technical Team	Sushma Kavarthapu Vamsi Pasala Becky Leckinger Lewis Good David Zhang Robina Brown Jonathan Scott Brandon Grant Roland Solvik Mike George Sean Markland Joshua Lovestrand Ram Iyer Anand Kothandan	 Contribute subject matter expertise Complete assigned project tasks in accordance with the Project Schedule Identify risks and issues to the Project Managers in accordance with the Risk and Issue Management section of this PMP Assist the Project Managers in responding to risks and issues Assist the Project Manager in evaluating change requests
Peraton	Joe Lombardi	Integration testing is dependent on Connect to Cloud being live in the cloud.

C. Project Management Methodology

DEO will use the PMBOK project management methodology in compliance with the project management standard rule 60GG-2 F.A.C. Predictability, accountability, and flexibility are key elements that will be embraced by the overall project management approach to ensure DEO's satisfaction and project success. Successful project management must include active and visible leadership, multiple controls and checkpoints with measurable outcomes, and engagement with all stakeholders. DEO believes strong project management is critical throughout the life of any successful project.

For this project, DEO's project management will include the following specific elements, in addition to our standard methodology:

- The project management team will advise leadership on areas of concern and will propose solutions to mitigate risk.
- Vendors will respond to inquiries or requests from DEO within one business day from receipt.
- In the case where additional time is needed for a task, vendors will provide an estimate, which must be approved by the DEO Project Manager.
- At the end of the contract, vendors will provide final copies of all reports in electronic format for archive purposes.

DEO's project management approach will utilize the technical skills, tools, and techniques needed to succeed, as well as the dedication to accountability, resource commitment, and organizational focus. Project success will be the result of active communication among all individuals, understanding everyone's role in the project, and clear delineation of responsibilities.

DEO believes successful project management hinges on the following:

- Clearly established project goals and requirements
- Ongoing assessment of quality against established standards
- Constant measurement of success against established deliverables and milestones
- Personal presence and commitment of key project leadership
- Proactive identification and communication of risks and issues

VI. Business Process Organizational Change Management Plan

This project intends to improve the delivery, execution, security, or convenience of DEO's lines of business through the implementation of modern processes and tools based on industry best practices and frameworks.

The project team aims to maximize communication, engagement, adoption, and performance of these new processes, roles, and responsibilities through a combination of tools, templates, and techniques such as:

- Stakeholder identification and engagement plans
- Process identification and improvement plans
- Educational assessment and training plans
- Change risk assessment
- Change Advocate networks
- Change Management
- Business Relationship Management
- IT Service Management

VII. Project Risk Management Plan

Risk management will be an ongoing process conducted throughout the project. The process begins with identifying and assessing significant risks, then developing an appropriate mitigation strategy to address the risk(s). It continues with regular risk monitoring, ongoing identification of new risks, and timely implementation of risk response plans.

The project's Risk Management Process, which is defined and maintained within the PMP, will address identified risks that may negatively impact the project and may require visibility by leadership.

The Risk Management Process involves:

- Identifying and categorizing project risks (Identify),
- Validating and logging the risk (Validate / Log) assessing and prioritizing the risks so they are manageable (Analyze),
- Developing a response strategy and assigning responsibility (Plan),
- Tracking the risks by reviewing them at key project milestones (Monitor/Track), and most importantly,
- Communicating the risks and strategies on an ongoing basis throughout the life of the project (Communicate).

The Risk Management Processes address internal risks - those under the control or influence of the project team, such as quality of deliverables, cost, schedule, or technical risks; as well as external risks - those outside the control of the project team such as governmental legislation.

The PM, along with the project team will validate any identified risk to make sure the information is complete, and the risk is not a duplicate. Once verified the risk information will be logged into the Risk Log and given a unique identifier.

Risk Description/Impact	Probability of Occurrence (high, medium, low)	Risk Tolerance (high, medium, low)	Mitigation Strategy	Assigned Owner
Hurricane impacting the state delays the schedule	Low	High	Adjust schedule accordingly	PM
Necessary tools, hardware, or materials need to be procured for the successful completion of the project.	Medium	Medium	Identify needs early on and involve management and budget staff throughout engagement	PM
Insufficient knowledge transfer of new process	Medium	Medium	Involve impacted staff throughout engagement to increase participation and knowledge of new processes	PM

VIII. Capacity Plan

This project does not involve the purchase/lease, configuration, and installation of significant computer hardware. For purposes of capacity planning, computer hardware includes servers, storage, and network infrastructure. Accordingly, a Capacity Plan is not required. Once the claim volume starts to go down as the claims volume decreases, capacity can be reduced. Also moving to an auto-scaling configuration will additionally reduce needed capacity.

OPERATIONAL WORK PLAN FOR CLOUD APPLICATION PERFORMANCE MANAGEMENT (CAPM)

SECTION 1 — OVERALL PROJECT PLAN

I. Project Charter

The Reemployment Assistance Claims and Benefits Information System (System) and supporting middleware software is currently deployed on physical, on-premises servers managed exclusively in-house. Most of the physical infrastructure is from the original go-live in 2013, is at the end of its life cycle, and was due for replacement in 2020. As the Department of Economic Opportunity (DEO) continues to assess and develop an understanding for choosing, managing, governing, and securing cloud services and tools; the realization is that cloud computing is the foundation that enables Workforces Services to transform, differentiate, and continuously improve.

A cloud-first strategy plays a central role in next-generation business initiatives. These initiatives include digital business transformation, automation, and Artificial Intelligence (AI). Cloud computing offers enhanced disaster recovery and high availability, optimized operations and maintenance costs, and built-in scalability.

As part of the modernization initiatives, DEO is undertaking a project to complete the planning for remaining migration, readiness activities, and migration of Reemployment Assistance infrastructure from the State Data Center and Winter Haven Disaster Recovery sites, as well as moving the System to a Cloud Service Provider using an IaaS hosting model. Included within the migration project is an improved document storage solution and the transition to a cloud-based IVR solution. Once the migration of the System to a cloud-hosted environment is completed, a focus on performance baselines and metrics will be available for evaluation and consideration for enhanced System monitoring and management.

A. Scope Statement

Change System monitoring from reactive to proactive by establishing metrics that are indicative of upcoming problems rather than those that have already occurred. Design visualizations that make metrics and thresholds easily visible, including trend analysis to support proactive action. Ensure that metrics capture inputs which would drive automatic scaling. Identify and procure a solution, if needed, and then implement the solution.

B. Project Objectives and Business Benefits

Project Objective	Business Benefit
System of alerts to identify any	Proactively working to prevent performance
noteworthy activity and approaching	issues prior to the end users' experience
thresholds	being affected.
Dashboards to assist in proactive	Another way to be proactive in monitoring
monitoring of key performance indicators	and finding system trends
Optimized performance	Better end user experience
Rendering of topology maps and system	Visual overview of the System will assist in
application networks	faster response time when network or
	hardware issues occur

C. Critical Success Factors

- Ensure all currently monitored System actions or events can be monitored in the cloud environment.
- Ensure processes and procedures are in place for actions that need to be taken based on event type.
- Establish performance baselines and tools to manage to those levels.
- Develop a visual monitoring intuitive interface.

D. Key Dates

Key Date	Importance and Relevance to the Project
July 1, 2022	CAPM Project Kick-Off
July 15, 2022	Project Initiation Phase Completed
August 2, 2022	Requirements Traceability Matrix completed
September 6, 2022	Planning Phase Completed
September 30, 2022	Solution Determined
November 11, 2022	Testing Solution Complete
December 16, 2022	Solution in place in the Cloud
January 27, 2023	Full Baselines in Production Determined
February 24, 2023	Tweaks to system Monitoring Completed
March 17, 2023	Final System Monitoring Review
March 31, 2023	Project Complete

E. Major Deliverables

Major Deliverable	Deliverable Description
Requirements Traceability	All requirements for monitoring established and approved
Matrix Approved	
Software selection Completed	Decision on what tool or tools will be used for
_	monitoring. (Using AppDynamics)
Software Testing Underway	Start of software testing

Major Deliverable	Deliverable Description
Monitoring Baselines Reports	Established Monitoring Baselines Reports and Dashboard
Load Testing	Test Connect load using CAPM Tool to build baselines
Software live in Production	System is live and being monitored in the cloud
Final Baseline Numbers	Tweaks to monitoring complete and new baselines established
Project Complete	Live with full monitoring in place

F. Major Milestones

	Major Milestone	Milestone Description
1.	Software selection Completed	Decision on what tool or tools will be used for
		monitoring
2.	Software Testing Underway	Start of software testing
3.	Load Testing Complete	Baselines tested and approved
4.	Software live in Production	System is live and being monitored in the cloud

G. Procurement

Procurement	Description	Justification	Needed By
N/A	None at this time		

H. Key Stakeholders

Key Stakeholder	Project Interest
Dane Eagle	Secretary, Department of Economic Opportunity
Adrienne Johnston	Deputy Secretary, Workforce Services, DEO
Domenic DiLullo	Chief Technology Officer, DEO
Allyce Moriak	Chief Financial Officer, DEO
Wendy Castle	RA Modernization Program Owner - Business
Paul Forrester	RA Modernization Program Owner – Information Technology
David Sinclair	Project Manager
Peraton	System and Software Integration

I. Significant Project Assumptions and Constraints

Project Assumptions

- All identified funding is available.
- The identified business and technical requirements are correct and complete.
- The assigned information technology resources possess relevant knowledge and skills to complete the identified tasks.
- Members of the project team will have access to the necessary tools, hardware, and materials necessary to complete the identified tasks.

- All relevant stakeholders will attend required status meetings. However, there may be instances where some stakeholders are unavailable to attend.
- The Chief Technology Officer will be responsive and prepared to make decisions regarding the project cost, scope, and schedule.
- Key contracts are sequenced in relation to the project schedule.

Project Constraints

• Subject Matter Experts (SME) time is spread out and not dedicated

II. Work Breakdown Structure

Task Name	Duration	Start	Finish
	0.25 days	7/1/22	7/1/22
Initiation Risk & Complexity Assessment - FINAL - Cat 2			
Planning Risk & Complexity Assessment - FINAL - Cat 2	0.25 days	7/11/22	7/11/22
Deliverable: Project Charter	5 days	7/1/22	7/5/22

IV. Project Spending Plan

Total Planned Cost	Budget Cost	Actual Cost
\$99,000	\$987,052	\$0

V. Project Organization and Methodology

A. Project Organizational Chart

B. Project Roles and Responsibilities

Project Role	Resource Name	Responsibilities
Executive Sponsor	Adrienne Johnston	 Provide guidance on overall strategic direction Advise the Strategic Planning Office and project manager of risks that may impact the project Facilitate resolution of significant issues in the project Review and sign off on key milestones
СТО	Domenic DiLullo	 Provide guidance on overall strategic direction Advise the Strategic Planning Office and project manager of risks that may impact the project Facilitate resolution of significant issues in the project Review and sign off on key milestones
Strategic Planning Office	Beacon.Gov	 Monitor project progress Provide guidance and support to project manager and project team members
Project Manager	David Sinclair	 Manage all aspects of the project and ensure compliance with PMP Monitor project progress and schedule adherence Complete all documents related to the project Identify and manage risks according to the PMP
Business Lead	Wendy Castle	 Review deliverables and project documents, identifying any deficiencies Review and approve deliverables Review and approve RFCs
Technical Lead	Quinton Lightfoot	 Review deliverables and project documents, identifying any deficiencies Review and approve deliverables Review and approve RFCs

Project Role	Resource Name	Responsibilities
Functional Team	Eddy Richards Ian Erwin Tony Wood Mannix Hawkins	 Contribute subject matter expertise Complete assigned project tasks in accordance with the Project Schedule Identify risks and issues to the Project Managers in accordance with the Risk and Issue Management section of this PMP Assist the Project Managers in responding to risks and issues Assist the Project Manager in evaluating change requests
Technical Team	Sushma Kavarthapu Vamsi Pasala Roland Solvik Mike George Ian Erwin Tony Wood	 Contribute subject matter expertise Complete assigned project tasks in accordance with the Project Schedule Identify risks and issues to the Project Managers in accordance with the Risk and Issue Management section of this PMP Assist the Project Managers in responding to risks and issues Assist the Project Manager in evaluating change requests
Peraton	Joe Lombardi	• Integration testing is dependent on the System being live in the cloud.

C. Project Management Methodology

DEO will use the PMBOK project management methodology in compliance with the project management standard rule 60GG-2 F.A.C. Predictability, accountability, and flexibility are key elements that will be embraced by the overall project management approach to ensure DEO's satisfaction and project success. Successful project management must include active and visible leadership, multiple controls and checkpoints with measurable outcomes, and engagement with all stakeholders. DEO believes strong project management is critical throughout the life of any successful project.

For this project, DEO's project management will include the following specific elements in addition to our standard methodology:

- The project management team will advise leadership on areas of concern and will propose solutions to mitigate risk.
- Vendors will respond to inquiries or requests from DEO within one business day from receipt.
- In the case where additional time is needed for a task, vendors will provide an estimate, which must be approved by the DEO Project Manager.

• At the end of the contract, vendors will provide final copies of all reports in electronic format for archive purposes.

DEO's project management approach will utilize the technical skills, tools, and techniques needed to succeed, as well as the dedication to accountability, resource commitment, and organizational focus. Project success will be the result of active communication among all individuals, understanding everyone's role in the project, and clear delineation of responsibilities.

DEO believes successful project management hinges on the following:

- Clearly established project goals and requirements.
- Ongoing assessment of quality against established standards.
- Constant measurement of success against established deliverables and milestones.
- Personal presence and commitment of key project leadership.
- Proactive identification and communication of risks and issues.

VI. Business Process Organizational Change Management Plan

This project intends to improve the delivery, execution, security, or convenience of DEO's lines of business through the implementation of modern processes and tools based on industry best practices and frameworks.

The project team aims to maximize communication, engagement, adoption, and performance of these new processes, roles, and responsibilities through a combination of tools, templates, and techniques such as:

- Stakeholder identification and engagement plans.
- Process identification and improvement plans.
- Educational assessment and training plans.
- Change risk assessment.
- Change Advocate networks.
- Change Management.
- Business Relationship Management.
- IT Service Management.

VII. Project Risk Management Plan

Risk management will be an ongoing process conducted throughout the project. The process begins with identifying and assessing significant risks, then developing an appropriate mitigation strategy to address the risk(s). It continues with regular risk monitoring, ongoing identification of new risks, and timely implementation of risk response plans.

The project's Risk Management Process, which is defined and maintained within the PMP, will address identified risks that may negatively impact the project and may require visibility by leadership.

The Risk Management Process involves:

- Identifying and categorizing project risks (Identify).
- Validating and logging the risk (Validate / Log) assessing and prioritizing the risks so they are manageable (Analyze).
- Developing a response strategy and assigning responsibility (Plan).
- Tracking the risks by reviewing them at key project milestones (Monitor/Track), and most importantly.
- Communicating the risks and strategies on an ongoing basis throughout the life of the project (Communicate).

The Risk Management Processes address internal risks - those under the control or influence of the project team, such as quality of deliverables, cost, schedule, or technical risks; as well as external risks - those outside the control of the project team such as governmental legislation.

The PM, along with the project team will validate any identified risk to make sure the information is complete, and the risk is not a duplicate. Once verified the risk information will be logged into the Risk Log and given a unique identifier.

Risk Description/Impact	Probability of Occurrence (high, medium, low)	Risk Tolerance (high, medium, low)	Mitigation Strategy	Assigned Owner
Hurricane impacting the state delays the schedule	Low	High	Adjust schedule accordingly	PM
Necessary tools, hardware, or materials need to be procured for the successful completion of the project.	Medium	Medium	Identify needs early on and involve management and budget staff throughout engagement	PM
Insufficient knowledge transfer of new process	Medium	Medium	Involve impacted staff throughout engagement to increase participation and knowledge of new processes	PM

VIII. Capacity Plan

This project does not involve the purchase/lease, configuration, or installation of significant computer hardware. For purposes of capacity planning, computer hardware includes servers, storage, and network infrastructure. Accordingly, a Capacity Plan is not required. Once the claim volume starts to go down as the claims volume decreases, capacity can be reduced. Also moving to an auto-scaling configuration will additionally reduce needed capacity.

SECTION 1 — OVERALL PROJECT PLAN

I. Project Charter

The Department lacks current Reemployment Assistance Claims and Benefits Information System (System) application design documentation to facilitate the efficient and effective modification of the System and to ensure that changes to the original application design continue to align with Department business requirements.

The Final Report for Improved Delivery of Reemployment Assistance Benefits recommended that the Department document all System functional, technical, and non-technical requirements. System requirements would provide the level of details necessary for prospective partners to plan and estimate efforts the Department needs.

This project seeks to rectify the lack of System design documentation and the ongoing maintenance of said design documentation by improving the completeness and correctness of the application design documentation, related artifacts, and dataflow diagrams for the System, and ensuring that a SDLC process is in place that aligns System functionality with management's business requirements.

A. Scope Statement

In Scope

- Implement Agile/Scrum processes for managing and tracking all System development work and documentation in DevOps.
- Update current Reemployment Assistance program business process and System documentation to establish the baseline for future state enhancements.
- Enter, track, and prioritize all in-progress and planned work items in DevOps.
- Build an initial release plan focusing on the implementation of immediate enhancements to be completed by current Scrum teams.
- Support the requirements gathering and planning for the incremental mobile-friendly modernization.

Out of Scope

• Software development work

B. Project Objectives and Business Benefits

Project Objective	Business Benefit
Updated system documentation is	Provides the level of detail necessary for
necessary prior to beginning analysis of new requirements needs.	prospective partners to plan and estimate the efforts the Department needs
<u>+</u>	Allows for a more agile development process
and resource efficiencies	

Utilization of a single tool provides a single source of truth for work tracking	Allows for better resource and capacity planning of development work
and documentation	planning of development work
Opportunity exists to utilize DevOps for	An agile DevOps process will improve the
improved operational efficiencies.	time to production by allowing better
	planning of development work
Support the requirements gathering and	Allows for an improved customer service
planning for the incremental mobile-	experience using mobile devices
friendly modernization	

C. Critical Success Factors

- Artifacts from this project are living documents to be utilized during software development.
- Utilization of this SDLC produces a more measurable and efficient way of software development.

D. Key Dates

Key Date	Importance and Relevance to the Project
02/22/2022	Procurement of Software & Services
05/6/2022	Configuration Azure DevOps Services
10/28/2022	Complete Business Process/Technology Specifications
10/28/2022	Migrate from TFS to DevOps
10/28/2022	Azure DevOps ServiceNow integration
12/1/2022	Implementation

E. Major Deliverables

Major Deliverable	Deliverable Description
Procurement of Software & Services	Procure Azure DevOps services and
	Visual Studio 2019 software licenses.
	Procure two technical writers and a
	DevOps Engineer.
Configuration Azure DevOps Services	A software development environment that
	is both agile and secure
Migrate from TFS to DevOps	Import work backlog to new environment.
Create System/Process	Update the current software development
Documentation/Templates	workflow process. Create templates for
	system documentation. Update System
	documentation.
Developer Training	Provide training on new SDLC process
	and environment.
Implementation	System development environment is live

F. Major Milestones

Major Milestone	Milestone Description
Initiation Phase Complete	All initiation activities completed
Planning Phase Complete	All planning activities completed
Execution Phase Complete	In progress
Monitor and Controlling Phase Complete	In progress
Closing Phase Complete	

G. Key Stakeholders

Key Stakeholder	Project Interest
Dane Eagle	Secretary, Department of Economic Opportunity
Adrienne Johnston	Deputy Secretary, Division of Workforce Services
Domenic DiLullo	Chief Technology Officer
Allyce Moriak	Chief Financial Officer
Paul Forrester	Chief Information Officer
Wendy Castle	RA Modernization Program Owner – Business
Nicole Sanislow	RA Modernization Program Manager - Business
Thomas Richardson	RA Modernization Program Manager - Strategic
	Planning Office
Garrick Wright	RA Modernization Program Manager – Information
	Technology
Alvin Sellers	Reemployment Assistance Operations Project Owner
Jim Sparks	Project Manager
Quinton Lightfoot	Application Development Lead
Sushma Kavarthapu	Application Developer

H. Significant Project Assumptions and Constraints

Project Assumptions

- The project will have access to the appropriate state management, staff, and related Program stakeholders (internal and external) and other resources as required and as needed without delay.
- DevOps infrastructure will be available as needed (hardware and software).
- There will be integration between the ITBM tool and the SDLC DevOps environment.
- System documentation is completed prior to start of requirements analysis for modernization.
- The project experiences no delays in schedule.

Project Constraints

• Software developers and subject matter experts (SMEs) have competing operational tasks and have limited time to devote to the project.

II. Work Breakdown Structure

Task Name	% Complete	Start	Finish
SDLC Dev Ops	100%	Thu 12/9/21	Mon 12/12/22
Initiation	100%	Thu 12/9/21	Tue 1/18/22

Project Charter complete	Mon 12/13/21	Mon 12/13/21	Monique Emmanuel, Garrick Wright, Thomas Richardson, Nicole Sanislow
Project Kickoff Meeting	Thu 12/9/21	Fri 1/14/22	
Prepare presentation	Thu 1/6/22	Thu 1/6/22	Monique Emmanuel
Schedule Kickoff meeting	Thu 12/9/21	Thu 12/9/21	Monique Emmanuel
Conduct Kickoff meeting	Fri 1/14/22	Fri 1/14/22	Monique Emmanuel
Conduct Lessons Learned Meeting	Fri 1/14/22	Mon 1/17/22	
Schedule Lessons Learned meeting	Fri 1/14/22	Fri 1/14/22	Monique Emmanuel
Conduct Lessons Learned meeting	Mon 1/17/22	Mon 1/17/22	Monique Emmanuel
Record Lessons Learned	Mon 1/17/22	Mon 1/17/22	Monique Emmanuel
Initiation Phase complete	Tue 1/18/22	Tue 1/18/22	Monique Emmanuel
Planning	Mon 12/20/21	Tue 2/22/22	
Deliverable: Resource Plan	Mon 12/20/21	Wed 2/2/22	
Resource Plan Complete	Wed 2/2/22	Wed 2/2/22	Monique Emmanuel
Deliverable: Project Schedule	Tue 12/21/21	Fri 1/28/22	

Prepare Work Breakdown Structure	Tue 12/21/21	Wed 1/26/22	Monique Emmanuel
Develop Project Schedule	Fri 12/24/21	Wed 1/26/22	Monique Emmanuel
Review/Update Project Schedule	Wed 1/26/22	Wed 1/26/22	Thomas Richardson, Garrick Wright, Nicole Sanislow
Approve Project Schedule	Wed 1/26/22	Fri 1/28/22	Thomas Richardson, Garrick Wright, Nicole Sanislow
Project Schedule complete	Sun 12/26/21	Sun 12/26/21	Monique Emmanuel
Deliverable: Project Management Plan	Mon 12/27/21	Wed 2/2/22	
Develop Project Management Plan	Mon 12/27/21	Wed 1/26/22	Monique Emmanuel
Review/Update Project Management Plan	Mon 1/31/22	Wed 2/2/22	Thomas Richardson, Garrick Wright, Nicole Sanislow, Quinton Lightfoot, Robin Hodge-Carey
Approve Project Management Plan	Wed 2/2/22	Wed 2/2/22	Monique Emmanuel
Project Management Plan complete	Wed 2/2/22	Wed 2/2/22	Monique Emmanuel
Deliverable: Project Budget	Fri 12/31/21	Thu 1/27/22	
Prepare Project Budget	Fri 12/31/21	Wed 1/26/22	Monique Emmanuel
Review/Update Project Budget	Sat 1/1/22	Wed 1/26/22	Monique Emmanuel
Approve Project Budget	Thu 1/27/22	Thu 1/27/22	Monique Emmanuel
Project Budget complete	Fri 1/28/22	Fri 1/28/22	Monique Emmanuel
Deliverable: Project Spending Plan	Mon 1/3/22	Fri 1/28/22	
Prepare a Project Spending Plan	Mon 1/3/22	Wed 1/26/22	Monique Emmanuel
Review/Update Project Spending Plan	Thu 1/27/22	Thu 1/27/22	Monique Emmanuel
Approve Project Spending Plan	Fri 1/28/22	Fri 1/28/22	Monique Emmanuel
Project Spending Plan complete	Fri 1/7/22	Fri 1/28/22	Monique Emmanuel
Requirements:	Tue 2/1/22	Mon 2/21/22	
Gather requirements	Tue 2/1/22	Mon 2/21/22	
Schedule JAD Sessions	Tue 2/1/22	Tue 2/1/22	Monique Emmanuel
Conduct JAD sessions	Thu 2/3/22	Mon 2/21/22	Benjamin Beha
Finalize requirements	Mon 2/21/22	Mon 2/21/22	Benjamin Beha
Deliverable: Requirements Traceability Matrix	Mon 2/14/22	Wed 2/16/22	
Develop RTM	Mon 2/14/22	Mon 2/14/22	Benjamin Beha
Review RTM	Tue 2/15/22	Tue 2/15/22	Monique Emmanuel

Approve RTM	Wed 2/16/22	Wed 2/16/22	Monique Emmanuel
Requirements Traceability Matrix complete	Wed 2/16/22	Wed 2/16/22	Monique Emmanuel
Complete the Planning Gate R&C Assessment	Thu 2/17/22	Thu 2/17/22	Monique Emmanuel
Conduct Lessons Learned Meeting	Thu 2/3/22	Mon 2/21/22	
Schedule Lessons Learned meeting	Thu 2/3/22	Thu 2/3/22	Monique Emmanuel
Conduct Lessons Learned meeting	Fri 2/18/22	Fri 2/18/22	Monique Emmanuel
Record Lessons Learned	Mon 2/21/22	Mon 2/21/22	Monique Emmanuel
Planning Phase complete	Tue 2/22/22	Tue 2/22/22	Monique Emmanuel
Execution	Thu 12/9/21	Mon 12/12/22	
Procurement	Thu 1/6/22	Fri 4/29/22	
Procure Azure DevOps services	Thu 1/6/22	Fri 2/18/22	Quinton Lightfoot
Procure Visual Studio licenses upgrade to 2019	Thu 1/6/22	Fri 2/18/22	Quinton Lightfoot
Procure technical writer	Thu 1/6/22	Fri 2/11/22	Quinton Lightfoot
Procure DevOps Engineer	Thu 1/6/22	Fri 4/29/22	Quinton Lightfoot
Provision Virtual Desktops	Mon 4/4/22	Fri 4/8/22	Roland Solvik
Documentation	Tue 6/7/22	Fri 10/7/22	
Pandemic Functional Documentation	Tue 6/7/22	Fri 10/7/22	
Update Pandemic Functional Documentation	Tue 6/7/22	Fri 10/7/22	
Review Pandemic Functional Documentation	Tue 6/7/22	Fri 10/7/22	
Pandemic Functional Documentation Completed	Fri 10/7/22	Fri 10/7/22	
Pandemic Technical Documentation	Tue 6/7/22	Fri 10/7/22	
Update Pandemic Technical Documentation	Tue 6/7/22	Fri 10/7/22	
Review Pandemic Functional Documentation	Tue 6/7/22	Fri 10/7/22	
Pandemic Technical Documentation Completed	Fri 10/7/22	Fri 10/7/22	
ServiceNow Development	Thu 12/9/21	Mon 11/28/22	
Process Flow	Tue 8/30/22	Tue 8/30/22	
Determine Final Process Flow	Tue 8/30/22	Tue 8/30/22	AJ Sellers, Ben Beha, Ivona Foster, Sushma Kavarthapu
Field List	Wed 8/31/22	Fri 9/23/22	
Determine Final Field List	Wed 8/31/22	Wed 9/21/22	

Develop Field List	Wed 8/31/22	Tue 9/13/22	AJ Sellers, Ben Beha
Provide Feedback	Wed 8/31/22	Tue 9/13/22	Ivona Foster, Janie Correa, Prathamesh Hankare, Sushma Kavarthapu
Approved Field List	Wed 9/21/22	Wed 9/21/22	
STRY0011448 RA IT Custom Table	Fri 9/2/22	Fri 9/23/22	
Refine Solution	Fri 9/2/22	Mon 9/12/22	Brandon Robinson
Develop	Wed 9/7/22	Thu 9/22/22	Brandon Robinson
Peer Review	Fri 9/23/22	Fri 9/23/22	Max Kruse
Decision: Do we incorporate full kit into the form?	Tue 9/13/22	Tue 9/13/22	AJ Sellers, Sushma Kavarthapu, Vince Ackerman
Walkthrough Full Kit (if necessary?)	Tue 9/13/22	Tue 9/13/22	AJ Sellers, Ben Beha, Dave Sinclair, Andrew McDonald, Brandon Robinson, Ivona Foster, Janie Correa, Max Kruse, Sushma Kavarthapu
STRY0011686 Full Kit Placeholder	Mon 9/19/22	Fri 9/23/22	Brandon Robinson
Statuses	Wed 9/7/22	Fri 10/28/22	
Determine Final Statuses	Wed 9/7/22	Tue 9/20/22	
Meeting to discuss Final Statuses	Wed 9/7/22	Tue 9/20/22	Ivona Foster, Sushma Kavarthapu, AJ Sellers, Ben Beha, Janie Correa, Prathamesh Hankare, Dave Sinclair, Vince Ackerman
Final Statuses Completed	Tue 9/20/22	Tue 9/20/22	
STRY0011476 RA IT Custom Workflow/State Model	Mon 10/3/22	Fri 10/28/22	Max Kruse
Refine Solution	Mon 10/3/22	Fri 10/14/22	Andrew McDonald, Max Kruse
Develop	Mon 10/17/22	Fri 10/28/22	Max Kruse
Peer Review	Fri 10/28/22	Fri 10/28/22	Brandon Robinson
STRY0011476 RA IT Custom Workflow/State Model Completed	Fri 10/28/22	Fri 10/28/22	
User Story Review	Tue 9/6/22	Mon 9/19/22	
Conduct User Story Review	Tue 9/6/22	Mon 9/19/22	Ivona Foster, Sushma Kavarthapu, AJ Sellers, Ben Beha, Janie Correa, Prathamesh Hankare, Dave Sinclair, Vince Ackerman, Glidefast
User Story Review Completed	Mon 9/19/22	Mon 9/19/22	

Define SN User Groups	Fri 9/2/22	Tue 9/27/22	
Provide definitions of SN User Groups	Fri 9/2/22	Wed 9/14/22	AJ Sellers, Ben Beha, Dave Sinclair
Provide Users for Groups	Mon 9/19/22	Tue 9/27/22	AJ Sellers, Ben Beha, Dave Sinclair
Finalize SN User Groups	Tue 9/27/22	Tue 9/27/22	
STRY0011679 RA IT SME Group	Tue 9/27/22	Tue 9/27/22	Brandon Robinson, Andrew McDonald
Front End Design	Mon 9/12/22	Fri 10/28/22

Data Conversion	Wed 9/21/22	Wed 11/23/22			
Provide ALM Extract	Wed 9/21/22	Wed 9/21/22	AJ Sellers, Ben Beha, Nicole Sanislow		
Data Mapping ALM to ServiceNow	Thu 9/22/22	Tue 9/27/22	AJ Sellers, Andrew McDonald, Ben Beha, Brandon Robinson, Max Kruse		
Determine ALM tickets to ServiceNow	Mon 11/7/22	Fri 11/18/22	AJ Sellers, Ben Beha		
STRY0011504 Legacy Data Import from HP ALM	Mon 11/7/22	Wed 11/23/22	Brandon Robinson, Max Kruse		
Finalize STRY0011504 Legacy Data Import from HP ALM	Tue 11/22/22	Tue 11/22/22			
ADO Detailed Tasks	Thu 9/22/22	Fri 10/14/22			
Mimic (Create) the workflows and columns in TFS to ADO; Epic/PBI/Feature/Impediment/Task/Bug	Thu 9/22/22	Tue 9/27/22	Sathishkumar Kittusamy		
Structure the "States" of Epic/PBI/Feature/Impediment/Task/Bug of TFS to ADO	Thu 9/22/22	Tue 9/27/22	Sathishkumar Kittusamy		
Add users to AD as needed; List of SME's and team's (developer/BA/Tester/Manager/SM)	Thu 9/22/22	Fri 10/7/22	Prathamesh Hankare		
Identify fields that needs to be moved from SNOW to ADO	Thu 9/22/22	Tue 9/27/22	Prathamesh Hankare		
Replicate fields of SNOW in ADO; Epic/PBI/Feature/Impediment/Task/Bug	Thu 9/22/22	Tue 9/27/22	Sathishkumar Kittusamy		
E2E testing - Migrate Fields from SNOW to ADO	Fri 9/30/22	Thu 10/6/22	Prathamesh Hankare		
E2E testing - Migrate workflows, Fields, States from TFS to ADO	Fri 9/30/22	Thu 10/6/22	Shreya		
Bugs from testing	Mon 10/10/22	Fri 10/14/22	Sathishkumar Kittusamy		
Decision on if we need to On prem or Cloud	Thu 9/22/22	Tue 9/27/22	Sushma		
Pipelines	Mon 9/19/22	Fri 10/14/22			
Create Build pipelines	Mon 10/3/22	Wed 10/12/22	Arun Gandla		
Create release pipelines	Mon 10/3/22	Wed 10/12/22	Arun Gandla		
Set up of Trigger for release pipelines	Mon 10/10/22	Mon 10/10/22	Arun Gandla		

Set up of trigger for build pipelines	Mon 10/10/22	Mon 10/10/22	Arun Gandla
Verify Pipelines	Mon 10/10/22	Wed 10/12/22	Arun Gandla
Integrate the PR from Developers Fork to Team Branch to a non-prod environment for team 1	Tue 10/11/22	Fri 10/14/22	Prafull Konde
Integrate the PR from Team branch to Development branch to a non-prod environment for 1 team.	Tue 10/11/22	Fri 10/14/22	Prafull Konde
Integrate the PR from development branch to code branch to a non prod environment to team1	Tue 10/11/22	Fri 10/14/22	Prafull Konde
Roadmap to migrate RA developers code from TFS to ADO	Mon 9/19/22	Wed 9/28/22	Arun Gandla
TFS to ADO Migration	Mon 10/17/22	Tue 11/1/22	
Import test cases linked to the PBI	Mon 10/17/22	Fri 10/21/22	
Ensure VDI works	Mon 10/17/22	Fri 10/21/22	
Shift Lift Development source code from TFS and push to ADO	Mon 10/17/22	Fri 10/21/22	Arun Gandla
Create 2 Build Pipelines	Mon 10/17/22	Fri 10/21/22	Arun Gandla
Create 2 Release Pipelines	Mon 10/17/22	Fri 10/21/22	Arun Gandla
Verify the code merge to Development from each team	Mon 10/24/22	Wed 10/26/22	Arun Gandla
Verify the code in team branch after the Merge from other teams	Mon 10/24/22	Wed 10/26/22	Arun Gandla
Set up of Trigger for build & release pipelines for teams	Mon 10/24/22	Wed 10/26/22	Arun Gandla
Verify PR process from Developers Fork to Team Branch to a non-prod environment for all teams	Thu 10/27/22	Tue 11/1/22	Prafull Konde
Verify PR from Team branch to Development branch to a non-prod environment for all teams.	Thu 10/27/22	Tue 11/1/22	Prafull Konde
Verify PR from development branch to code branch to a non prod environment to all teams	Thu 10/27/22	Tue 11/1/22	Prafull Konde
Implementing tool to interact TFS data into ADO	Fri 9/30/22	Fri 10/7/22	

TFS domain users and email mapping list	Fri 9/30/22	Fri 10/7/22	Prathamesh Hankare
Import test data of PBI (technical debt) from TFS to	Fri 9/30/22	Wed 10/26/22	Sathishkumar Kittusamy

IV. Project Spending Plan

Planned cost is \$117,914; Actual cost to date is \$57,112; and Budgeted cost is \$368,111.

V. Project Organization and Methodology Project Organizational Chart

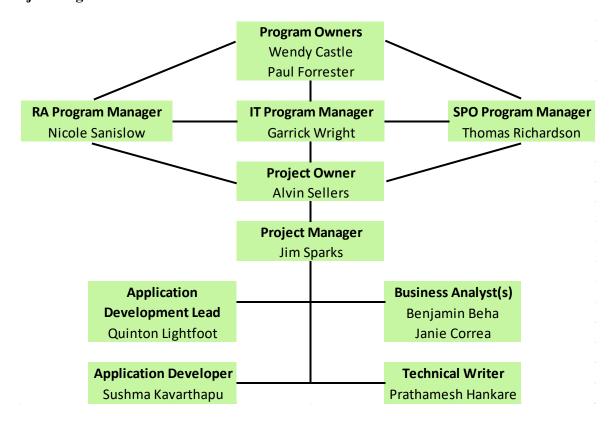

Figure 1: Project Organization Chart

Project Roles and Responsibilities

Project Role	Resource Name	Responsibilities
Program Owners	Wendy Castle	Provide guidance on overall strategic direction
	Paul Forrester	 Advise the Strategic Planning Office and project manager of risks that may impact the project Facilitate resolution of significant issues in the project
Program Managers	Garrick Wright	Provide guidance on overall strategic direction
	Thomas Richardson	Advise the Strategic Planning Office and project manager of risks that may impact the project
	Nicole Sanislow	 Facilitate resolution of significant issues in the project Review and sign off on key milestones
Project Manager	Jim Sparks	 Manage all aspects of the project and ensure compliance with PMP Monitor project progress and schedule adherence Complete all documents related to the project Identify and manage risks according to the PMP
Project Owner	Alvin Sellers	 Review deliverables and project documents, identifying any deficiencies Review and approve deliverables Review and approve RFCs

Project Role	Resource Name	Responsibilities

Project Management Methodology

DEO will use a project management methodology in compliance with project management standard rule 60GG-2 F.A.C., project requirements and department experience with similar engagements. Predictability, accountability, and flexibility are key elements that must be embraced by the overall project management approach to ensure DEO's satisfaction and project success. Successful project management must include active and visible leadership, multiple controls and checkpoints with measurable outcomes, and engagement with all stakeholders. DEO believes strong project management is critical throughout the life of any successful project.

For this project, DEO's project management will include the following specific elements, in

addition to our standard methodology:

- The project management team will advise leadership on areas of concern and will propose solutions to mitigate risk.
- Vendors will respond to inquiries or requests from DEO within one business day from receipt.
- In the case where additional time is needed for a task, vendors will provide an estimate, which must be approved by the DEO Project Manager.
- At the end of the contract, vendors will provide final copies of all reports in electronic format for archive purposes.

DEO's project management approach will utilize the technical skills, tools, and techniques needed to succeed, as well as the dedication to accountability, resource commitment, and organizational focus. Project success will be the result of active communication among all individuals, understanding everyone's role in the project, and clear delineation of responsibilities.

DEO believes successful project management hinges on the following:

- Clearly established project goals and requirements
- Ongoing assessment of quality against established standards
- Constant measurement of success against established deliverables and milestones
- Personal presence and commitment of key project leadership
- Proactive identification and communication of risks and issues

Quality Management Plan

The Quality Management Plan ensures work is complete and meets or exceeds an adequate level of quality of the deliverables. All members of the project team will play a role in quality management, and it is critical the team ensures work is completed according to DEO standards for quality acceptance.

Project Quality Management activities will ensure project documents meet agreed upon standards, work is performed efficiently, project practices conform to recommended project standards and deficiencies are identified and corrective action taken.

Quality Management Approach

Managing quality includes four major processes:

- Quality planning (QP): Completeness and correctness criteria define what it means for a project document to be complete and correct. The project team will establish completeness and correctness criteria. Specific criteria for the quality of Contract Deliverables will be documented in the contract and managed by the Contract Manager, program team and Project Manager.
- Quality assurance (QA) refers to the process used to create project documents, not the deliverables themselves. The Project Team will perform QA activities for the project weekly. The project manager may make changes to processes as necessary; changes will be communicated to the appropriate stakeholders.

- Quality control (QC): Performing Quality Control (QC) involves monitoring specific project results to determine whether they comply with relevant quality standards and identifying ways to eliminate causes of unsatisfactory results. The Strategic Planning Office (SPO) will perform (QC) activities to verify project management and documents are of high quality. If the SPO determines a project document to be complete, it will be presented to the Project Team at the following Status Meeting.
- Quality improvement (QI): The Project Manager is responsible to implement corrective actions based on the results of the quality management processes. These may include changes to project management processes; required training for stakeholders; updating performance metrics, etc.

Communication Management Plan

This project will follow the communications processes outlined in the RA Modernization Program Communications Management Plan.

The master copy of this document is available in the <u>RA Modernization Program Library</u> in the Central Repository

The communication matrix below identifies the key project stakeholders and the detail of communications for this project.

Item	Purpose	Format	When/ Frequency	Type	Initiator	Recipient	Feedback
Project Meeting	Provide and discuss project tasks, issues, risks, action items	Meeting/Face to face or virtual)	Daily/ Weekly as needed	Mandatory	Project Manager	Project Team	Meeting Minutes
Status Report	Provide detailed information on the progress of the project against the plan	Email	Weekly/ Monthly/ Quarterly	Mandatory	Project Manager	Project Team/SPO Program Manager	Verbal and follow-up email
SPO Status Meeting	Review the status report, resolve issues, and make decisions	Meeting	Weekly	Mandatory	Project Manager	SPO Program Manager	Verbal and follow-up email
Project Deliverables	Provide deliverables to DEO for review	Email	Per project schedule	Mandatory	Project Manager	SPO Program Manager/ Project Team members	Written vetted, consolidated, and actionable comments

Deliverable Review Feedback	Provide vetted, consolidated, and actionable written comments	Email	Per project schedule	Mandatory	SPO Program Manager	Project Manager/ Project Team Members	Written/ email follow-up using Deliverable Review Comment Form
Deliverable Review Walkthrough	Confirm mutual understanding of desired deliverable changes	Meeting	As needed	Informational	Project Manager	Program Managers/ Project Owners	Verbal or written
Work Session	Gather information from subject matter experts	Meeting	Per project schedule	Mandatory	Project Manager	Update subject matter experts (only if the SPO Project Manager has the approved communication)	Verbal and follow-up email
Work Session Follow-up	To answer questions or clarify information gathered	Email	As needed	Informational	Project Manager	Provide subject matter experts (only if SPO Project Manager has approved the communication)	Verbal or email follow-up
Online Survey	Gather information from subject matter experts (former providers	Email	Per project schedule	As needed	Project Manager	Subject matter experts (only if SPO Project Manager has approved the communication)	Verbal or email follow-up
Project Issues	Documentation of project issues	Issue Log Entry	As needed	Mandatory	Any Stakeholder	Project Owner/ Project Manager	Written/ email follow-up
Project Issues Escalation	To resolve project issues	Email	As needed	Mandatory	Project Manager	SPO Program Manager	Written/ email follow-up
Change Requests	Document project changes to scope of work	Change Request Form	As needed	Mandatory	Change Initiator	Project Manager/ Change Owner/ Change Analyst/ CCB	Written/ email follow-up
Project Closeout and Lessons Learned	Formal project closeout meeting	Email	Per project schedule	Mandatory	SPO Project Manager	All Stakeholders	Written/ email follow-up

Weekly Status Reporting

Vendors will be required to submit status reports throughout the project at several levels. The primary source of status information is the weekly written status report, which will communicate at minimum, the following information.

• **Project Status.** This section depicts the project status at a summary level using a red/yellow/green method supported by two to three essential questions that are answered to determine summary status. The red/yellow/green method is not meant to

be a grading system but instead it is a way to easily identify the areas of the project that need the most attention to make the project successful.

- Overview of Project Progress. This section describes significant accomplishments achieved in the reporting period.
- Overall Status. This section provides a high-level overview of whether the project is on schedule, on budget, and on scope. A yellow or red status should be explained here in detail.
- Project Milestones, Deliverables, and Latest Tasks. This section contains the major deliverables of the project, their planned and actual completion dates, and their status.
- Risks, Action Items, Issues, and Decisions. This section will link to the project risk, action item, issue, and decision tracking tool. The project tracking tool contains all items tracked during the project.

Project Tracking

This section describes the "RAID" methodology for tracking risks, action items, issues, and decisions. DEO will follow a centralized approach that minimizes miscommunication or misinformation among project stakeholders. The Department will diligently maintain a project tracking log for each project, and a master log for the System Modernization project overall, a Microsoft Excel workbook with multiple tabs intended to capture the details and the latest attributes of items tracked by Project Managers.

VI. Business Process Organizational Change Management Plan

This project will follow the organizational change processes outlined in the RA Modernization Program Organizational Change Management Plan.

The master copy of this document is available in the <u>RA Modernization Program Library</u> in the Central Repository.

The role of the Organizational Change Management plan (OCM) within an individual project under the RA Modernization Program is to help plan for and manage the people side of the project. OCM focuses on identifying, preparing and managing a wide array of internal and external stakeholders, employees and customers that will be impacted by the new solution. It is good for those stakeholders to feel informed, prepared, trained and ready to participate in a successful implementation. It is beneficial for employees to adopt new skills and develop new capabilities and to value and appreciate the features that the new technology offers.

VII. Project Risk Management Plan

Risk & Complexity Assessment

The Risk & Complexity Assessment will be completed at the end of every Phase in the Project lifecycle. The Project Manager is responsible to complete this assessment with the assistance of project team members.

Risk & Complexity Assessments	Category

Pre-Charter Risk & Complexity Category	2
Initiation Gate Risk & Complexity Category	1
Planning Gate Risk & Complexity Category	1
Event Driven Risk & Complexity Category	

Project Risk Management

This project will follow the risk management processes outlined in the RA Modernization Program Risk Management Plan.

The master copy of this document is available in the <u>RA Modernization Program Library</u> in the Central Repository.

The risk management process helps the project team anticipate and respond to emerging risks throughout the duration of the project. The risk management process occurs throughout all phases of the project, from planning through execution and closeout. Project risks are logged and tracked in the Project Log Workbook (RAID Logs).

Figure 2 below illustrates the major activities associated with the key risk management process.

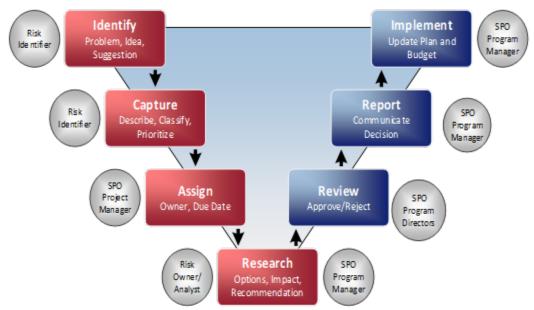

Figure 2: RA Modernization Program Risk Management Process

Action Items

Action items are unplanned tasks that occur during a project that are too small to be added to the schedule. These items must be within the scope of the project and are often tasks that support scheduled tasks, issue resolution, risk management, or some other aspect of the project. The action item log is created and maintained as part of the project tracking log.

Action items will be managed in the following manner:

- During status meetings, any stakeholder can raise an action item for discussion.
- The Project team will discuss the action item and determine if it warrants being monitored in the action item log.
- The project manager will enter the item in the log.
- The team will set the priority for the action item (high/medium/low), assign an action item owner, and set a planned completion date.
- At each subsequent status meeting, the action item(s) will be reviewed until they can be closed.

Issue Management

This project will follow the issue management processes outlined in the RA Modernization Program Issue Management Plan.

The master copy of this document is available in the <u>RA Modernization Program Library</u> in the Central Repository.

An issue is an immediate problem that needs resolution. Acknowledging and addressing issues quickly ensures that they do not impact the scope of the project. Project issues are logged and tracked in the Project Log Workbook (RAID Logs).

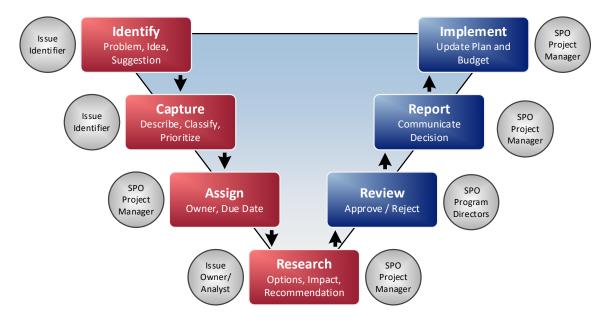

Figure 3: RA Modernization Program Issue Management Process

Decisions

Decisions are leadership answers to questions that arise during the project. The decision log is created and maintained as part of the project tracking log.

Decisions will be managed in the following manner:

- During status meetings, any stakeholder can raise a question that requires a decision.
- If the team determines a decision needs to be made, the project manager will enter it in the decision log.
- The team will discuss the impact to the project, assign a decision maker, and set a date for when the decision is needed.
- At each subsequent status meeting, the decision item(s) will be reviewed until they can be closed.

Change Management

This project will follow the change processes outlined in the RA Modernization Program Change Management Plan.

The master copy of this document is available in the <u>RA Modernization Program Library</u> in the Central Repository.

The RA Modernization Change Management Plan, defines the approach and provides the processes for initiating, defining, researching, evaluating, reviewing, prioritizing, managing cost, approving or rejecting the change requests (CRs), and communicating the status of the change that may affect the success of the SDLC DevOps project.

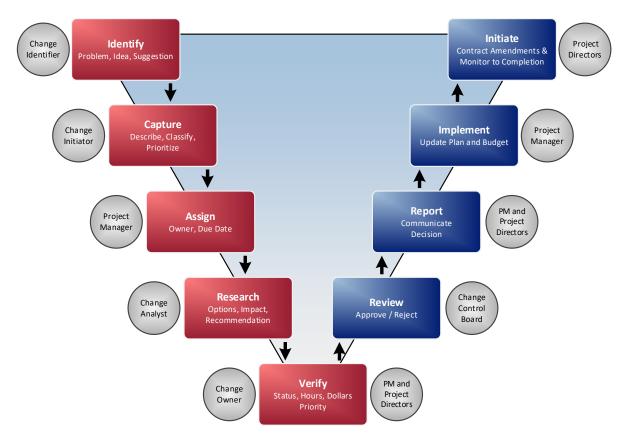

Figure 4:RA Modernization Program Change Management Process

Schedule Management

The project schedule for this project will be stored in the Central Repository 03 SDLC DevOps Project Deliverables folder.

Schedule Maintenance

The project schedule maintenance is an on-going activity that tracks the work performed, the timeframes for when the work has been or will be completed and progress against the baseline work estimates and timelines. To effectively track the program progress, the project schedule is kept current, and reflects all work that needs to be performed, in accordance with the RA Modernization Program Schedule Management Plan.

If a change to the project schedule or scope is needed, the Project Manager may pursue a change request as described in the *RA Modernization Change Management Plan*.

Procurement Management

The Procurement Management Plan seeks to outline how the project will procure resources necessary to complete the project objectives. It defines the procurement methodology for this project, lays out the process for managing procurement throughout the life of the project, and will be updated if project needs change. This plan identifies and defines the goods and services to be procured, the types of contracts to be used in support of this project, the contract approval process, and the decision criteria. The importance of coordinating the procurement activities, establishing firm contract deliverables, and metrics in measuring procurement activities is included in the following subsections.

Procurement Management Approach

The DEO Purchasing Office and any vendors contracted for procurement assistance will provide oversight and management along with the Project Manager for all procurement activities under this project. The Project Manager will work with the project team to identify all items to be procured for the successful completion of the project. The Department Strategic Planning Office (SPO) will then review any procurement requests prior to approving the development of procurement documentation.

Procurement Definition

The following table will be completed to record any procurement goods and/or services determined to be essential for any RA Modernization project's completion and success. The Project Manager and/or SPO must approve any procurement before inclusion in this table.

Procurement	Description	Justification	Needed By
Azure DevOps services	An integrated set of services and tools to manage your software projects, from planning	Needed to support RA Modernization Program	2/28/2022
	and development through testing and deployment	software development activities	

Virtual Desktops for Developers (VDI farm)	Virtual Desktops for developers	Needed due to network latency between the cloud and on-premise devices	2/28/2022
Visual Studio licenses upgrade to 2019	Microsoft Visual Studio is an integrated development environment (IDE). It is used to develop computer programs, as well as websites, web apps, web services, and mobile apps.	nt environment (IDE). It is used to mputer programs, as well as Modernization Program software development	
Staff Augmentation Technical Writer	 Two resources needed for the following tasks: Creating and maintaining IT documentation. Translating technical and/or complicated information into clear, concise documents appropriate for various target audiences. Working with Developers, Quality Assurance, and Architects to produce a wide variety of technical specifications, technical manuals, and product documentation. Interviewing subject matter experts and technical staff to collect information, prepare written text, and coordinate layout and material organization. Researching information such as drawings, design reports, equipment, and test specifications to fill any gaps. Reviewing, critiquing, and editing documentation including design documents, programmer notes, and system overviews. Maintaining an internal documentation library, providing and/or coordinating special documentation services as required, and providing oversight of special projects. Documenting requirements and traceability in tools to include ALM, TFS, and ServiceNow. Developing technical specifications templates. 	Skill needed for documentation not available in development team	2/28/2022
Staff Augmentation DevOps Engineer	A DevOps Engineer is needed to configure/build Azure/DevOps Environment		

Cost Management

The tables below will be completed and used to define and track project costs during the SDLC DevOps Project.

Cost Management Plan				
Category	Description	Frequency	Deliverable	Cost

Column	Definition	
Category	Type of expense	
Description	Description of expense	
Frequency	Describe whether the expense is annual or recurring or a one-	
	time expense	
Deliverable	List the deliverable associated with the expense	
Cost	List the total expense in dollars, e.g., \$0.00	

Staffing Management

The purpose of this section is to outline how the project is to manage staffing requirements and resource tasks appropriately. This project plans to procure additional staffing through Staff Augmentation contracts. The needs for each individual project have been estimated before the project and will be refined during requirements gathering and procurement of services.

VIII. Capacity Plan

Utilization of a single tool for software development provides a single source of truth for work tracking and resource allocation which can then be utilized for capacity planning for the development environment, tools, and developers.

Project Capacity Planning

- Establish Cross-Functional Team: To collaborate and communicate about production capacity and resource management, you want a cross-functional team with different levels and different functions.
- Calculate Resource Capacity: Before you can create a production capacity plan, you need to have an idea of your current capacity and your available resources.
- Determine Resource Requirements: For each project, look at the scope and what resources are required to do the task for the project.
- Prioritize Projects: Which projects are most important, and which can be put aside for the time being? You can't do everything at once.
- Allocate Resources Based on Project Priority: Now allocate those prioritized projects and make sure that they are aligned with the goals of the organization.

- Keep the Lines of Communications Open: Communicate between executives, project management leaders and stakeholders.
- Document Known Risks: Monitor risks such as union strikes, weather, government regulations that stop a project or create new ones unexpectedly.
- Plan for How to Handle Too Much Capacity: Understand where it is and how to resolve it (such as reassigning), or not enough capacity (again, where/how).

SECTION 1 — OVERALL PROJECT PLAN

I. Project Charter

The .NET and ORM Upgrade project will establish a solid architectural basis in support of the Reemployment Assistance Claims and Benefits Information System's (System) continuous modernization by upgrading the Reemployment Assistance application to the latest version of the .NET Framework and defining a new architecture based on .NET Core and Web API framework for the modernized System. This project also upgrades the Object Relational Mapping (ORM) software to the most current version.

A. Scope Statement

Complete planning for the .NET upgrade to Framework 4.8, readiness activities, and migrate Reemployment Assistance infrastructure from the State Data Center and Winter Haven Disaster Recovery sites to a Cloud Service Provider using an IaaS hosting model; implement an improved document and generation management solution; transition to a cloud-based IVR solution.

B. Project Objectives and Business Benefits

Project Objective	Business Benefit	
Upgrade the .NET framework from the	Mitigate technical risks and issues	
current level to .NET 4.8.	associated with the older framework	
Migrate all older .NET framework to	• The updated .NET 4.8 framework will	
the newer framework.	allow the continuous moderation of the	
	.NET core and the API framework.	
Upgrade the ORM to the most current	grade the ORM to the most current • The updated ORM will allow improved	
software	object mapping in incompatible and	
	compatible systems.	

C. Critical Success Factors

- Migration to the updated .NET 4.8 framework
- Implementation of the upgraded ORM

D. Key Dates

Key Date	Importance and Relevance to the Project	
6/12/2022	Upgrade .NET framework for the System	
6/12/2022	Upgrade .NET framework for FIRRE	
6/12/2022	Upgrade Utilities Projects (High Priority)	
6/12/2022	Upgrade Utilities Projects (Low Priority)	
11/04/2022	Upgrade ORM	

E. Major Deliverables

Major Deliverable	Deliverable Description	
Upgrade .NET framework for the System	Implement new .NET 4.8 framework	
Upgrade .NET framework for FIRRE	Implement new .NET 4.8 framework	
Upgrade Utilities Projects (High Priority)	Implement new .NET 4.8 framework	
Upgrade Utilities Projects (Low Priority)	Implement new .NET 4.8 framework	
Test for compatibility with upgraded	Implement new .NET 4.8 framework	
.NET framework (LLBLGen)		
Upgrade ORM	Implement the new ORM	

F. Major Milestones

Major Milestone	Milestone Description
Initiation Phase Complete	All initiation activities completed
Planning Phase Complete	All Planning activities completed
Execution Phase Complete	In Progress
Monitoring and Controlling Phase	In Progress
Complete	
Closing Phase Complete	Pending

G. Key Stakeholders

Key Stakeholder	Project Interest	
Dane Eagle	Secretary, Department of Economic Opportunity	
Adrienne Johnston	Deputy Secretary, Division of Workforce Services	
Domenic DiLullo	Chief Technology Officer	
Paul Forrester	Chief Information Officer	
Allyce Moriak	Chief Financial Officer	
Wendy Castle	RA Modernization Program Owner – Business	
Nicole Sanislow	RA Modernization Program Manager - Business	
Thomas Richardson	RA Modernization Program Manager - Strategic Planning	
	Office	
Garrick Wright	RA Modernization Program Manager - Information	
	Technology	
Jim Sparks	Project Manager	
Quinton Lightfoot	Application Development Lead	
Sushma Kavarthapu	Application Developer	
Alvin Sellers	Reemployment Assistance Operations Project Owner	
Amitkumar Kanaiyalal	Business Analyst	

H. Significant Project Assumptions and Constraints Project Assumptions

- 1. All identified funding is available.
- 2. The identified system requirements are correct and complete.

- 3. The assigned development resources possess relevant knowledge and skills to complete the identified tasks.
- 4. All the people involved at the beginning of the project will remain working on the project until the project is completed.
- 5. Members of the project team will have access to the necessary tools, hardware, and materials necessary to complete the identified tasks.
- 6. All relevant stakeholders will attend required status meetings. However, there may be instances where some stakeholders are unavailable to attend.
- 7. The project sponsor will be responsive and prepared to make decisions regarding the project cost, scope, and schedule.

Project Constraints

1. None at this time

II. Work Breakdown Structure

WBS	Task Name	
1	.NET upgrade to 4.8 framework- ORM upgrade	
1.1	Initiation	
1.1.1	Determine Azure Environment	
1.1.2	ORM	
1.1.2.1	Purchase ORM licenses	
1.1.2.2	Update, Deploy, and Test	
1.1.3	.NET Framework	
1.1.3.1	Initiate a review of the current .NET Framework	
1.1.3.2	Review and Approve Final Proposal to .NET 4.8 Framework	
1.1.3.3	Upgrade Plan	
1.1.3.4	License Update and Upgrade	
1.1.4	ORM	
1.1.4.1	Decide on Development timeline	
1.1.4.2	Conversion & Upgrade	
1.2	Determine Staff Aug Resources	
1.3	Planning	
1.3.1	Determine the upgrade of the .NET framework	
1.3.3	Application, .NET Framework	
1.3.3.1	Determine level of refactoring	
1.3.5	ORM	
1.3.5.1	Meet with Vendors to Discuss Options for the upgrade	
1.3.6	Procure Staff Aug Resources	
1.4	Execution	
1.4.2	Application	

1.4.2.1	Upgrade .NET framework from 4.0 to 4.8 for the System	
1.4.2.2	Upgrade .NET framework from 4.0 to 4.8 for FIRRE	
1.4.2.3	Upgrade utilities projects (high priority)	
1.4.2.4	Upgrade utilities projects (low priority)	
1.4.2.5	Test for compatibility with upgraded .NET framework (LLBLGen)	
	ORM	
1.4.3	ORM	
1.4.3 1.4.3.1	ORM Upgrade the ORM to the latest version	
1.4.3.1	Upgrade the ORM to the latest version	

III. Resource Loaded Project Schedule

Task Name	Start	Finish
.NET - ORM Upgrade	Tue 8/3/21	Mon 11/04/22

Conduct Lessons Learned meeting	Thu 10/20/22	Thu 10/20/22
Record Lessons Learned	Fri 10/21/22	Fri 10/21/22
Deliverable: Project Closeout Report	Wed 10/19/22	Fri 10/21/22
Develop Project Closeout Report	Wed 10/19/22	Wed 10/19/22
Review/Update Project Closeout Report	Thu 10/20/22	Thu 10/20/22
Approve Project Closeout Report	Fri 10/21/22	Fri 10/21/22
Project Closeout Report complete	Fri 11/09/22	Fri 11/09/22
Conduct Project Closeout meeting	Mon 11/08/22	Mon 11/08/22
Closeout Phase complete	Mon 11/08/22	Mon 11/08/22

IV. Project Spending Plan

Planned cost is \$560,550 and \$248,002 is the actual cost.

V. Project Organization and Methodology

A. Project Organizational Chart

I. Project Roles and Responsibilities

Project Role	Resource Name	Responsibilities
Executive Sponsor	Adrienne Johnston	 Provide guidance on overall strategic direction Advise the Strategic Planning Office and project manager of risks that may impact the project Facilitate resolution of significant issues in the project Review and sign off on key milestones

Project Role	Resource Name	Responsibilities
СТО	Domenic DiLullo	 Provide guidance on overall strategic direction Advise the Strategic Planning Office and project manager of risks that may impact the project Facilitate resolution of significant issues in the project Review and sign off on key milestones
Strategic Planning Office	Vendor	 Monitor project progress Provide guidance and support to project manager and project team members
Project Manager	Jim Sparks	 Manage all aspects of the project and ensure compliance with PMP Monitor project progress and schedule adherence Complete all documents related to the project Identify and manage risks according to the PMP
Business Lead	Wendy Castle	 Review deliverables and project documents, identifying any deficiencies Review and approve deliverables Review and approve RFCs
Technical Lead	Quinton Lightfoot	 Review deliverables and project documents, identifying any deficiencies Review and approve deliverables Review and approve RFCs
Functional Team	Quinton Lightfoot Alvin Sellers Amit Kanaiyalal	 Contribute subject matter expertise Complete assigned project tasks in accordance with the Project Schedule Identify risks and issues to the Project Managers in accordance with the Risk and Issue Management section of this PMP Assist the Project Managers in responding to risks and issues Assist the Project Manager in evaluating change requests

Project Role	Resource Name	Responsibilities
Technical Team	Sushma Kavarthapu Prafull Konde Nahed Kadih William Brito Siddartha Bolisetty	 Contribute subject matter expertise Complete assigned project tasks in accordance with the Project Schedule Identify risks and issues to the Project Managers in accordance with the Risk and Issue Management section of this PMP Assist the Project Managers in responding to risks and issues Assist the Project Manager in evaluating change requests

J. Project Management Methodology

DEO will use a project management methodology in compliance with project management standard rule 60GG-2 F.A.C., project requirements and department experience with similar engagements. Predictability, accountability, and flexibility are key elements that must be embraced by the overall project management approach to ensure DEO's satisfaction and project success. Successful project management must include active and visible leadership, multiple controls and checkpoints with measurable outcomes, and engagement with all stakeholders. DEO believes strong project management is critical throughout the life of any successful project.

For this project, DEO's project management will include the following specific elements, in addition to our standard methodology:

- The project management team will advise leadership on areas of concern and will propose solutions to mitigate risk.
- Vendors will respond to inquiries or requests from DEO within one business day from receipt.
- In the case where additional time is needed for a task, vendors will provide an estimate, which must be approved by the DEO Project Manager.
- At the end of the contract, vendors will provide final copies of all reports in electronic format for archive purposes.

DEO's project management approach will utilize the technical skills, tools, and techniques needed to succeed, as well as the dedication to accountability, resource commitment, and organizational focus. Project success will be the result of active communication among all individuals, understanding everyone's role in the project, and clear delineation of responsibilities.

DEO believes successful project management hinges on the following:

• Clearly established project goals and requirements

- Ongoing assessment of quality against established standards
- Constant measurement of success against established deliverables and milestones
- Personal presence and commitment of key project leadership
- Proactive identification and communication of risks and issues

Quality Management Plan

The Quality Management Plan ensures work is complete and meets or exceeds an adequate level of quality of the deliverables. All members of the project team will play a role in quality management, and it is critical the team ensures work is completed according to DEO standards for quality acceptance.

Project Quality Management activities will ensure project documents meet agreed upon standards, work is performed efficiently, project practices conform to recommended project standards and deficiencies are identified and corrective action taken.

Quality Management Approach

Managing quality includes four major processes:

- Quality planning (QP): Completeness and correctness criteria define what it means for a project document to be complete and correct. The project team will establish completeness and correctness criteria. Specific criteria for the quality of Contract Deliverables will be documented in the contract and managed by the Contract Manager, program team and Project Manager.
- Quality assurance (QA) refers to the process used to create project documents, not the deliverables themselves. The Project Team will perform QA activities for the project weekly. The project manager may make changes to processes as necessary; changes will be communicated to the appropriate stakeholders.
- Quality control (QC): Performing Quality Control (QC) involves monitoring specific project results to determine whether they comply with relevant quality standards and identifying ways to eliminate causes of unsatisfactory results. The Strategic Planning Office (SPO) will perform (QC) activities to verify project management and documents are of high quality. If the SPO determines a project document to be complete, it will be presented to the Project Team at the following Status Meeting.
- Quality improvement (QI): The Project Manager is responsible to implement corrective actions based on the results of the quality management processes. These may include changes to project management processes; required training for stakeholders; updating performance metrics, etc.

Communication Management Plan

Communication management seeks to provide a comprehensive framework for all communication necessary to keep stakeholders informed about the project's direction and status. The project communication plan is to clearly identify the status of compliance efforts and to communicate the progress made in achieving a successful project outcome. The purpose of this plan is to

communicate pertinent information related to discovery, design, and documentation in a clear and concise manner to the client, stakeholders, and the project team.

Communication Plan

The communication plan is designed to provide the right information, at the right level, to the right audience, at the right time. The plan addresses key audiences, messages, frequency, and methods of communication.

This plan, depicted in Table 1 below, describes the various forms of communication, appropriate channels of communication, and target audiences for this project. The communication matrix identifies the different tools that will be used to guide the planning for communication about the project to various audiences and purposes. It should be considered a general guide for the effective dissemination of information that is received, understood, and utilized by the target audiences for successful completion of the project. This communication matrix will be customized for each project to reflect the various communication forms, frequencies, and audiences that will be used during the course of the project and to ensure communication channels are properly maintained throughout the project and updated if communication needs to change.

Item	Purpose	Format	When/ Frequency	Type	Initiator	Recipient	Feedback
Project Meeting	Provide and discuss project tasks, issues, risks, action items	Meeting/Face to face or virtual)	Daily/ Weekly as needed	Mandatory	Project Manager	Project Team	Meeting Minutes
Status Report	Provide detailed information on the progress of the project against the plan	Email	Weekly/ Monthly/ Quarterly	Mandatory	Project Manager	Project Team/SPO Program Manager	Verbal and follow-up email
SPO Status Meeting	Review the status report, resolve issues, and make decisions	Meeting	Weekly	Mandatory	Project Manager	SPO Program Manager	Verbal and follow-up email
Project Deliverables	Provide deliverables to DEO for review	Email	Per project schedule	Mandatory	Project Manager	SPO Program Manager/ Project Team members	Written vetted, consolidated, and actionable comments
Deliverable Review Feedback	Provide vetted, consolidated, and actionable written comments	Email	Per project schedule	Mandatory	SPO Program Manager	Project Manager/ Project Team Members	Written/ email follow-up using Deliverable Review Comment Form

Deliverable Review Walkthrough	Confirm mutual understanding of desired deliverable changes	Meeting	As needed	Informational	Project Manager	Program Managers/ Project Owners	Verbal or written
Work Session	Gather information from subject matter experts	Meeting	Per project schedule	Mandatory	Project Manager	Update subject matter experts (only if the SPO Project Manager has the approved communication)	Verbal and follow-up email
Work Session Follow-up	To answer questions or clarify information gathered	Email	As needed	Informational	Project Manager	Provide subject matter experts (only if SPO Project Manager has approved the communication)	Verbal or email follow-up
Online Survey	Gather information from subject matter experts (former providers	Email	Per project schedule	As needed	Project Manager	Subject matter experts (only if SPO Project Manager has approved the communication)	Verbal or email follow-up
Project Issues	Documentation of project issues	Issue Log Entry	As needed	Mandatory	Any Stakeholder	Project Owner/ Project Manager	Written/ email follow-up
Project Issues Escalation	To resolve project issues	Email	As needed	Mandatory	Project Manager	SPO Program Manager	Written/ email follow-up
Change Requests	Document project changes to scope of work	Change Request Form	As needed	Mandatory	Change Initiator	Project Manager/ Change Owner/ Change Analyst/ CCB	Written/ email follow-up
Project Closeout and Lessons Learned	Formal project closeout meeting	Email	Per project schedule	Mandatory	SPO Project Manager	All Stakeholders	Written/ email follow-up

Weekly Status Reporting

Vendors will be required to submit status reports throughout the project at several levels. The primary source of status information is the weekly written status report, which will communicate at minimum, the following information.

- **Project Status.** This section depicts the project status at a summary level using a red/yellow/green method supported by two to three essential questions that are answered to determine summary status. The red/yellow/green method is not meant to be a grading system but instead it is a way to easily identify the areas of the project that need the most attention to make the project successful.
- Overview of Project Progress. This section describes significant accomplishments achieved in the reporting period.
- Overall Status. This section provides a high-level overview of whether the project is on schedule, on budget, and on scope. A yellow or red status should be explained here in detail.

- Project Milestones, Deliverables, and Latest Tasks. This section contains the major deliverables of the project, their planned and actual completion dates, and their status.
- Risks, Action Items, Issues, and Decisions. This section will link to the project risk, action item, issue, and decision tracking tool. The project tracking tool contains all items tracked during the project.

Project Tracking

This section describes the "RAID" methodology for tracking risks, action items, issues, and decisions. DEO will follow a centralized approach that minimizes miscommunication or misinformation among project stakeholders. The Department will diligently maintain a project tracking log for each project, and a master log for the System Modernization project overall, a Microsoft Excel workbook with multiple tabs intended to capture the details and the latest attributes of items tracked by Project Managers.

VI. Business Process Organizational Change Management Plan

This project will follow the organizational change processes outlined in the RA Modernization Program Organizational Change Management Plan.

The master copy of this document is available in the <u>RA Modernization Program Library</u> in the Central Repository.

The role of the Organizational Change Management plan (OCM) within an individual project under the RA Modernization Program is to help plan for and manage the people side of the project. OCM focuses on identifying, preparing and managing a wide array of internal and external stakeholders, employees and customers that will be impacted by the new solution. It is good for those stakeholders to feel informed, prepared, trained and ready to participate in a successful implementation. It is beneficial for employees to adopt new skills and develop new capabilities and to value and appreciate the features that the new technology offers.

VII. Project Risk Management Plan

Project Risk Management

This project will follow the risk management processes outlined in the RA Modernization Program Risk Management Plan.

The master copy of this document is available in the <u>RA Modernization Program Library</u> in the Central Repository.

The risk management process helps the project team anticipate and respond to emerging risks throughout the duration of the project. The risk management process occurs throughout all phases of the project, from planning through execution and closeout. Project risks are logged and tracked in the Project Log Workbook (RAID Logs).

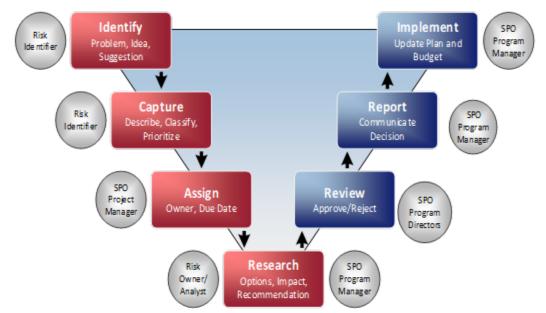

Figure 2 below illustrates the major activities associated with the key risk management process.

Figure 2: RA Modernization Program Risk Management Process

Action Items

Action items are unplanned tasks that occur during a project that are too small to be added to the schedule. These items must be within the scope of the project and are often tasks that support scheduled tasks, issue resolution, risk management, or some other aspect of the project. The action item log is created and maintained as part of the project tracking log.

Action items will be managed in the following manner:

- During status meetings, any stakeholder can raise an action item for discussion.
- The Project team will discuss the action item and determine if it warrants being monitored in the action item log.
- The project manager will enter the item in the log.
- The team will set the priority for the action item (high/medium/low), assign an action item owner, and set a planned completion date.
- At each subsequent status meeting, the action item(s) will be reviewed until they can be closed.

Issue Management

This project will follow the issue management processes outlined in the RA Modernization Program Issue Management Plan.

The master copy of this document is available in the <u>RA Modernization Program Library</u> in the Central Repository.

An issue is an immediate problem that needs resolution. Acknowledging and addressing issues quickly ensures that they do not impact the scope of the project. Project issues are logged and tracked in the Project Log Workbook (RAID Logs).

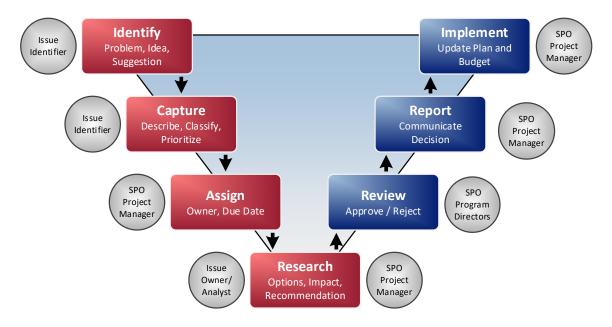

Figure 3: RA Modernization Program Issue Management Process

Decisions

Decisions are leadership answers to questions that arise during the project. The decision log is created and maintained as part of the project tracking log.

Decisions will be managed in the following manner:

- During status meetings, any stakeholder can raise a question that requires a decision.
- If the team determines a decision needs to be made, the project manager will enter it in the decision log.
- The team will discuss the impact to the project, assign a decision maker, and set a date for when the decision is needed.
- At each subsequent status meeting, the decision item(s) will be reviewed until they can be closed.

Change Management

This project will follow the change processes outlined in the RA Modernization Program Change Management Plan.

The master copy of this document is available in the <u>RA Modernization Program Library</u> in the Central Repository.

The RA Modernization Change Management Plan, defines the approach and provides the processes for initiating, defining, researching, evaluating, reviewing, prioritizing, managing

cost, approving or rejecting the change requests (CRs), and communicating the status of the change that may affect the success of the SDLC DevOps project.

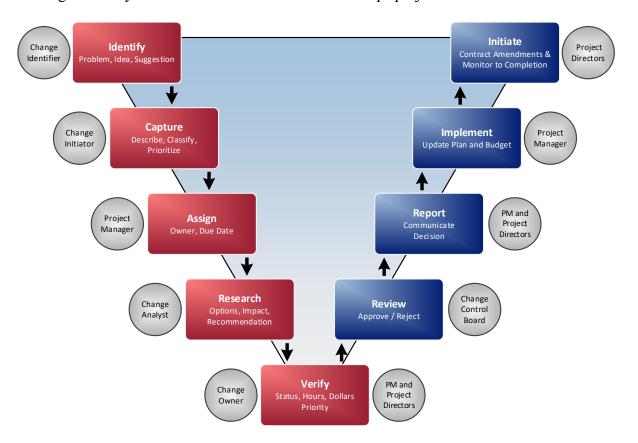

Figure 4:RA Modernization Program Change Management Process

Schedule Maintenance

The project schedule maintenance is an on-going activity that tracks the work performed, the timeframes for when the work has been or will be completed and progress against the baseline work estimates and timelines. To effectively track the program progress, the project schedule is kept current, and reflects all work that needs to be performed, in accordance with the RA Modernization Program Schedule Management Plan.

If a change to the project schedule or scope is needed, the Project Manager may pursue a change request as described in the *RA Modernization Change Management Plan*.

Procurement Management

The Procurement Management Plan seeks to outline how the project will procure resources necessary to complete the project objectives. It defines the procurement methodology for this project, lays out the process for managing procurement throughout the life of the project, and will be updated if project needs change. This plan identifies and defines the goods and services to be procured, the types of contracts to be used in support of this project, the contract approval process, and the decision criteria. The importance of coordinating the procurement activities,

establishing firm contract deliverables, and metrics in measuring procurement activities is included in the following subsections.

Procurement Management Approach

The DEO Purchasing Office and any vendors contracted for procurement assistance will provide oversight and management along with the Project Manager for all procurement activities under this project. The Project Manager will work with the project team to identify all items to be procured for the successful completion of the project. The Department Strategic Planning Office (SPO) will then review any procurement requests prior to approving the development of procurement documentation.

Procurement Definition

The following table will be completed to record any procurement goods and/or services determined to be essential for any RA Modernization project's completion and success. The Project Manager and/or SPO must approve any procurement before inclusion in this table.

Procurement	Description	Justification	Needed By

Cost Management

The tables below will be completed and used to define and track project costs during each specific RA Modernization Project.

	Cost Management Plan				
Category	Description	Frequency	Deliverable	Cost	

Column	Definition
Category	Type of expense
Description	Description of expense
Frequency	Describe whether the expense is annual or recurring or a onetime expense
Deliverable	List the deliverable associated with the expense
Cost	List the total expense in dollars e.g. \$0.00

Staffing Management

The purpose of this section is to outline how the project is to manage staffing requirements and resource tasks appropriately. This project plans to procure additional staffing through "Staff Augmentation" contracts. The needs for each individual project have been estimated before the

project and will be refined during requirements gathering and procurement of services.

Quality Management

Quality Management details the processes to ensure quality services and deliverables. DEO will use disciplined processes and inspections to confirm quality throughout the life of the project. These inspections are performed at key points in the creation and review of documents and confirmation of the value of services the Project Team provides. Quality Management includes two components, Deliverable Quality Control and Services Quality. The purpose of this section is to provide instructions on these processes. DEO commits to the highest quality in project execution and project team members' performance. To achieve a positive outcome, these processes will be carried out, so expectations are understood, aligned, and met.

VIII. Business Process Organizational Change Management Plan

This project intends to improve the delivery, execution, security, or convenience of DEO's lines of business through the implementation of modern processes and tools based on industry best practices and frameworks.

The project team aims to maximize communication, engagement, adoption, and performance of these new processes, roles, and responsibilities through a combination of tools, templates, and techniques such as:

- Stakeholder identification and engagement plans
- Process identification and improvement plans
- Educational assessment and training plans
- Change risk assessment
- Change Advocate networks
- Change Management
- Business Relationship Management
- IT Service Management

IX. Project Risk Management Plan

Identified in above Project Management Approach section.

	Probability of Occurrence (high, medium,	Risk Tolerance (high, medium,	Mitigation	Assigned
Risk Description/Impact	low)	low)	Strategy	Owner
Hurricane impacting the state delays the schedule	Low	High	Adjust schedule accordingly	PM
Necessary tools, hardware, or materials need to be procured for	Medium	Medium	Identify needs early on and involve management and	PM

Risk Description/Impact	Probability of Occurrence (high, medium, low)	Risk Tolerance (high, medium, low)	Mitigation Strategy	Assigned Owner
the successful completion of the project.	,	,	budget staff throughout engagement	
Insufficient knowledge transfer of new process	Medium	Medium	Involve impacted staff throughout engagement to increase participation and knowledge of new processes	PM

X. Capacity Plan

This project does not involve the purchase/lease, configuration, and installation of significant computer hardware. For purposes of capacity planning, computer hardware includes servers, storage, and network infrastructure. Accordingly, a Capacity Plan is not required. Once the claim volume starts to go down as the claims volume decreases, capacity can be reduced. Also moving to an auto-scaling configuration will additionally reduce needed capacity.

OPERATIONAL WORK PLAN FOR RULES ENGINE

SECTION 1 — OVERALL PROJECT PLAN

I. Project Charter

As a part of the Reemployment Assistance (RA) Modernization Program, the Rules Engine project will move business rules from the existing Reemployment Assistance Claims and Benefits Information System (System) into a user-visible and user-maintainable business rules engine. This will allow both maintaining and developing business rules without requiring code changes and subsequent deployments.

A. Scope Statement

In Scope

- Procure a business rules engine product.
- Inventory and identify a subset of business rules to validate suitability.
- Migrate the selected subset of business rules implemented in the System to the business rules engine.
- Perform regression testing to ensure the rules have migrated successfully.
- Complete documentation for technical debt for remaining rules.
- Utilize the business rules engine for all remaining modernization efforts.

Out of Scope

• Complete the integration of the remaining business system rules into the Rules Engine product.

B. Project Objectives and Business Benefits

Project Objective	Business Benefit
Reduce development effort	Effort required to establish and maintain the
	System will be reduced.
Consolidate a subset of business	Rules will be more readily accessible to facilitate
rules into the business rules engine	both auditing and troubleshooting.

C. Critical Success Factors

- Timely and high-quality achievement of major milestones/deliverables.
- Ability for remaining modernization efforts to utilize the business rules engine for continuous modernization efforts.

D. Key Dates

Key Dates	Importance and Relevance to the Project	
04/2022	Contract executed with Peraton for System and Software Integration	
	(SSI) services	
06/2022	Identification and prioritization of business systems rules.	
11/2022	Procurement for Business Rules Engine and services advertised	
12/2022	Contract awarded and announced	

E. Major Deliverables

Major Deliverable	Deliverable Description
Project Charter	Complete and submit a detailed project charter to
	DEO.
Project Management Plan	Complete and submit a detailed project management
	plan to DEO.
Weekly Status Meetings	Host weekly status meeting with DEO project team.
Identification of Business	Project team identifies business systems rules for
System Rules	implementation into the Business Rules Engine.
	Remaining rules will be addressed as part of
	continuous modernization.
Procurement of Rules Engine	Procurement of a Business Rules Engine product.
Communication and Training	Communication of process documentation and
	workflows to all stakeholders.

F. Major Milestones

Major Milestone	Milestone Description
Procurement of Business Rules Engine	Procure Business Rules Engine product to
	use for business systems rules
Identification and prioritization of	Completed
business systems rules	
Execution Phase	In progress
Monitor and Controlling Phase	In progress

G. Key Stakeholders

Key Stakeholder	Project Interest
Dane Eagle	Secretary, Department of Economic Opportunity
Adrienne Johnston	Deputy Secretary, Division of Workforce Services
Domenic DiLullo	Chief Technology Officer
Allyce Moriak	Chief Financial Officer
Paul Forrester	Chief Information Officer
Wendy Castle	Program Owner
Nicole Sanislow	RA Modernization Program Manager - Business
Thomas Richardson	RA Modernization Program Manager - Strategic Planning Office
Garrick Wright	RA Modernization Program Manager - Information
	Technology
Alvin Sellars	Project Sponsor & Project Owner
Nicole Cain	Project Manager

H. Significant Project Assumptions and Constraints Project Assumptions

- 1. System documentation detailing current business rules are readily available and accessible.
- 2. Technical support resources will be available as needed, to support the project as needed.

Project Constraints

1. Limited time and capacity of individuals assigned to assist and test the product.

II. Work Breakdown Structure

With the approval of Change Request 009, the Work Breakdown Structure is currently being updated. Once updated, it will be reflected in the OWP.

FLORIDA DEPARTMENT / ECONOMIC OPPORTUNITY	WBS		
Task	Duration	Start	End
Internal Rule Identification	303	4/6/2022	2/2/2023
Document Rules	18	4/6/2022	4/23/2022

	Cinil Maliakkal	Review and approve deliverables
		Responsible for the design and integration of
		the system rules into the product

Organizational Change Management Manager	Thomas Hoverman	•	Advisory role, providing guidance on organizational change
Program	Thomas Richardson	•	Monitor project progress
Managers	Garrick Wright Nicole Sanislow	•	Provide guidance and support to project manager and project team members Provide allocation of resources
SSI Vendor	Peraton	•	Provide recommendations for technology selections for rules engine product procurement Assist with drafting the scope of work and deliverables for the rules engine product procurement Assist in evaluating vendor responses for the procurement of the rules engine product

I. Project Management Methodology

DEO will use a project management methodology in compliance with project standard rule 60GG-2 F.A.C., product requirements, and DEO experience with similar engagements. Predictability, accountability, and flexibility are key elements that must be embraced by the overall project management approach to ensure DEO's satisfaction and project success. Successful project management must include active and visible leadership, multiple controls and checkpoints with measurable outcomes, and engagement with all stakeholders. DEO believes strong project management is critical throughout the life of any successful project.

For this project, DEO's project management will include the following specific elements, in addition to our standard methodology:

- The project management team will advise leadership on areas of concern and will propose solutions to mitigate risk.
- Vendors will respond to inquiries or requests from DEO within one business day from receipt.
- In the case where additional time is needed for a task, vendors will provide an estimate, which must be approved by the DEO Project Manager.
- At the end of the contract, vendors will provide final copies of all report sin electronic format for archive purposes.
- DEO's project management approach will utilize the technical skills, tools, and techniques needed to succeed, as well as the dedication to accountability, resource

commitment, and organizational focus. Project success will be the result of active communication among all individuals, understanding everyone's role in the project, and clear delineation of responsibilities.

DEO believes successful project management hinges on the following:

- Clearly established project goals and requirements
- Ongoing assessment of quality against established standards
- Constant measurement of success against established deliverables and milestones
- Personal presence and commitment of key project leadership
- Proactive identification and communication

VI. Business Process Organizational Change Management Plan

This project intends to move System business rules into a business rules engine, that can be maintained by internal staff. The implementation of this business rules engine will reduce the need for subsequent system releases and downtime. In order to initiate this change, this project will follow the organizational change processes outlined in the RA Modernization Program Organizational Change Management Plan, which is in the RA Modernization Program Library Central Repository.

The role of the Organizational Change Management Plan (OCM) within the Rules Engine project is to assist in planning for and managing the people side of the project. OCM focuses on identifying, preparing, and managing a wide array of internal and external stakeholders, employees, and customers that will be impacted by the new solution. It is useful for those stakeholders to be informed, prepared, trained, and ready to participate in a successful implementation. It is beneficial for employees to adopt new skills and develop new capabilities and to value and appreciate the features that the new technology offers.

VII. Project Risk Management Plan

This project will follow the <u>Risk Management Plan</u>, captured within the Reemployment Assistance Program Management Plan. The Reemployment Assistance Modernization Program team follows a standard method for logging and categorizing issues, researching solutions, and communicating options and final recommendations. Project team members should actively contribute, as it is critical to timely decisions and moving past roadblocks. The buy-in of the project team, key team members and technical staff is critical to the success and ensures that he project team delivers a product in line with the project goals.

Key activities of the risk management process include:

- ➤ **Risk Identification** Identifying risks that could potentially impact the project.
- ➤ **Risk Analysis** Prioritize risks and assess the probability and consequence of the risk.
- ➤ Risk Response Planning Prepare action plans to enhance opportunities or minimize threats to the program.

➤ **Risk Monitoring** – Execute action plans and evaluate their effectiveness, tracking, and reviewing residual risks and identifying new risks.

Risk Description/Impact	Probability of Occurrence (high, medium, low)	Risk Tolerance (high, medium, low)	Mitigation Strategy	Assigned Owner
Hurricane impacting the state delays the schedule	Low	High	Adjust schedule accordingly	PM
Necessary tools, hardware, or materials need to be procured for the successful completion of the project.	Medium	Medium	Identify needs early on and involve management and budget staff throughout engagement	PM
Insufficient knowledge transfer of new process	Medium	Medium	Involve impacted staff throughout engagement to increase participation and knowledge of new processes	PM

VIII. Capacity Plan

Project Capacity Planning

- Establish Cross-Functional Team: To collaborate and communicate about production capacity and resource management, you want a cross-functional team with different levels and different functions.
- Calculate Resource Capacity: Before you can create a production capacity plan, you need to have an idea of your current capacity and your available resources.
- Determine Resource Requirements: For each project, look at the scope and what resources are required to do the task for the project.
- Prioritize Projects: Which projects are most important, and which can be put aside for the time being? You can't do everything at once.
- Allocate Resources Based on Project Priority: Now allocate those prioritized projects and make sure that they are aligned with the goals of the organization.
- Keep the Lines of Communications Open: Communicate between executives, project management leaders and stakeholders.
- Document Known Risks: Monitor risks such as union strikes, weather, government regulations that stop a project or create new ones unexpectedly.
- Plan for How to Handle Too Much Capacity: Understand where it is and how to resolve it (such as reassigning), or not enough capacity (again, where/how).

SECTION 1 — OVERALL PROJECT PLAN

I. Project Charter

As a part of the Reemployment Assistance (RA) Modernization Program, the SOA and API Layer project will establish a solid architectural basis in support of the continuous modernization by defining a new architectural basis for a service-oriented architecture (SOA) for the modernized Reemployment Assistance Claims and Benefits Information System (System). The SOA and API layer project will deliver improved scalability due to the service-oriented architecture allowing independent scaling of each service.

A. Scope Statement

In Scope

Phase 1A – Adopting New Technology

- Procure an application programming interface (API) layer product
- Secure technology dependent resources (SOA/API vendor)
- Install and configure API layer
- Test tools defined with API layer tool procurement
- ID and document any Enterprise Service Bus (ESB) requirements
- Document the resulting API architectural standard for lessons learned in support of the Incremental Customer Experience/User Experience Mobile-Responsive Transformation (CX/UX) project.

Phase 1B - Implementation*, **

- Develop user stories and a test plan for selected APIs
- Document lessons learned

*The selection process for APIs to migrate for purposes of the selected APIs involves:

- generating a list of all APIs
- separating APIs into real-time vs. batch
- selecting specific APIs within the real time subset based on:
 - o Frequency of use
 - o APIs called early in the claims process
 - o Conversion of one API from each protocol type (REST/SOAP)
- per DCSN0001102, "Recommended Option #2 was approved by the Program Workgroup. This option includes migrating the two (2) proof of concept interfaces as well as to include the DHSMV interface ..."
- "Proof of concept," for this project, means identifying a small subset of APIs that represent different protocol types that will be tested, and deployed into a preproduction environment, via the SOA and API layer by June 30, 2023.

Out of Scope

- Defining the final CX/UX configuration
- Non-real-time web-based services

- per DCSN0001102, "...and designate remaining interfaces to be modernized during the continuous modernization process. Any newly designed interfaces required for the operation of the CX/UX application would be addressed by the CX/UX vendor selected for that project."
- ** Change Request 10 has modified the project's scope to align API development with the Continuous Modernization Program

B. Project Objectives and Business Benefits

Project Objective	Business Benefit
Prepare an inventory of desired	Preparatory step towards improved scalability
services based on the existing API	allowing independent scaling of each service
capabilities	
Identify any other architectural	Preparatory step towards improved scalability
requirements, such as API Gateway	allowing independent scaling of each service
usage	
Develop an implementation that	Enterprise Services Bus and API Gateway
demonstrates all architectural	installation in support of projects within the
components	Program requiring API development, such as
	CX/UX
Document the resulting architectural	Clear direction for the CX/UX project
standard for enforcement during the	
CX/UX project	

C. Critical Success Factors

- Timely and high-quality achievement of major milestones/deliverables.
- Ability for remaining modernization efforts to utilize the API tools for their continued efforts.

D. Key Dates

Key Date	Importance and Relevance to the Project
03/07/2023	2023 Legislative Regular Session convenes
05/05/2023	2023 Legislative Regular Session last day

E. Major Deliverables

Major Deliverable	Deliverable Description
Project Charter	Complete and submit a detailed project charter to DEO.
Project Management Plan	Complete and submit a detailed project management plan
	to DEO.
Weekly Status Meetings	Host weekly status meeting with DEO project team.
Weekly Status Reports	Provide weekly status reports to DEO project team.
SOA/API Procurement for	Procurement, installation, configuration, of the Enterprise
Tool and Services	Services Bus (ESB) and the Application Program
	Interface (API) gateway.

Major Deliverable	Deliverable Description
Requirements Traceability	Functional and technical requirements are documented,
Matrix	validated, and verified.
User stories and test plans	Preparation for API migration in support of adopting new
	technology (ESB and API gateway)
Documentation	Documentation of ESB requirements and the API
	architectural standard. Documentation of lessons learned.

F. Major Milestones

Major Milestone	Milestone Description
Procurement for Tool and Services	In progress: Procure vendor services and
	software for the installation, configuration
	and testing of the ESB toolset and API
	gateway in support of the Services
	Oriented Architecture (SOA)
Identification and prioritization of APIs	Complete
and Requirements	
Execution Phase	Vendor onboarding, RTM review, vendor
	project plan, development and acceptance
	of deliverables in accordance with SOW.
Monitor and Controlling Phase	In progress

G. Key Stakeholders

Key Stakeholder	Project Interest
Dane Eagle	Secretary, Department of Economic Opportunity
Adrienne Johnston	Deputy Secretary, Division of Workforce Services
Domenic DiLullo	Chief Technology Officer
Paul Forrester	Chief Information Officer
Wendy Castle	RA Modernization Program Owner – Business
Nicole Sanislow	RA Modernization Program Manager – Business
Tom Richardson	RA Modernization Program Manager – Strategic Planning
	Office
Garrick Wright	RA Modernization Program Manager – Information Technology
Project Team	See Project Roles and Responsibilities

H. Significant Project Assumptions and Constraints

Project Assumptions

- 1. Personnel with sufficient expertise will be on-boarded and allocated to the execution of this project.
- 2. The API development tool and SOA/API vendor will be acquired within the available timeframe for the project.
- 3. The ESB will be installed, configured, and tested by the SOA/API vendor within the available timeframe for the project.

- 4. Documentation of SOA/API architectural standards will be successfully completed within the available timeframe for the project.
- 5. Project is reliant upon a modular system architecture, based on recommendations from the SSI vendor, representing best of breed tools.
- 6. Change Request 10 has modified the project's scope to align the API development with the Continuous Modernization Program

Project Constraints

- 1. Limited time and capacity of resources (internal and external) assigned to assist in the completion of the major deliverables.
- 2. Dependencies external to the project which result in delays in execution, i.e., delays in finalizing System architecture and formal API tool decision.

II. Work Breakdown Structure

A. Work Breakdown Structure*

WBS	Task Name	
1	SOA API Layer	
1.1	Initiation	
1.2	Initiation Phase complete	
1.3	Planning	
1.3.1	Planning Phase Start	
1.3.2	Deliverable: Resource Plan	
1.3.3	Resource Plan Complete	
1.3.4	Deliverable: Project Schedule	
1.3.5	Project Schedule complete	
1.3.6	Deliverable: Project Management Plan	
1.3.7	Project Management Plan complete	
1.3.8	Deliverable: Project Budget	
1.3.9	Project Budget complete	
1.3.10	Deliverable: Project Spending Plan	
1.3.11	Project Spending Plan complete	
1.3.10	Deliverable: Project Test Plan	
1.3.11	Project Spending Plan complete	
1.3.12	Requirements:	
1.3.13	Conduct Lessons Learned Meeting	
1.3.14	Deliverable: Planning Gate RCA Assessment	
1.4	Planning Phase Complete	
1.5	Execution	
1.5.1	Execution Phase Start	
1.5.2	Phase 1a - API Technology Adoption	
1.5.2.1	Recommendations, Standards, Decisions	

1.5.2.2	SOA/API Vendor and API Tool Procurement	
1.5.2.3	Vendor under Contract	
1.5.2.4	Vendor Project Planning	
1.5.2.5	Install and configure API layer	
1.5.2.6	SSA & FIRRE Investigation (User Stories)	
1.5.2.7	Operations and Maintenance Plan	
1.5.3	Phase 1a - Complete	
1.5.4	Phase 1b – DHSMV (User Stories)	
1.5.5	Phase 1b - Complete	
1.5.6	Conduct Lessons Learned Meeting	
1.6	Execution Phase complete	
1.7	Monitoring and Controlling	
1.8	Monitoring and Controlling Phase Complete	
1.9	Project Closeout (ex. Optional scope)	
1.10	Closeout Phase complete	

^{*} Change Request 10 has modified the scope of the project to align API development with the Continuous Modernization Program. Due to the completion of preliminary activities in various execution elements, the overall WBS structure is not expected to change.

B. Work Breakdown Structure Data Dictionary

WBS	Task Name	Definition
1	SOA API Layer	As a part of the Reemployment Assistance (RA) Modernization Program, the SOA and API Layer project will establish a solid architectural basis in support of the continuous modernization by defining a new architectural basis for a service-oriented architecture (SOA) for the modernized System.
1.1	Initiation	Project startup activities, including but not limited to: Kickoff meeting, Project Charter, and Pre/Post Initiation RCAs
1.2	Initiation Phase complete	Milestone
1.3	Planning	Building the structural management tools for the project
1.3.1	Planning Phase Start	Milestone
1.3.2	Deliverable: Resource Plan	Included in the Project Management Plan (PMP), indicates resources required for execution of the project
1.3.3	Resource Plan Complete	Milestone
1.3.4	Deliverable: Project Schedule	Living document set (baseline and status) of scheduled project activities
1.3.5	Project Schedule complete	Milestone

WBS	Task Name	Definition
1.3.6	Deliverable: Project Management Plan	Master project management book containing sub- plans for resources, budget, schedule, and program level plans, such as communications and risk management
1.3.7	Project Management Plan complete	Milestone
1.3.8	Deliverable: Project Budget	Included in the PMP, indicates budgeted funds required for execution of the project
1.3.9	Project Budget complete	Milestone
1.3.10	Deliverable: Project Spending Plan	Included in the PMP, indicates timing of the projected expenditure of budgeted funds required for execution of the project
1.3.11	Project Spending Plan complete	Milestone
1.3.10	Deliverable: Project Test Plan	High level testing plan approach for the project. One plan per interface (SSA, FIRRE-Investigation, DHSMV).
1.3.11	Project Spending Plan complete	Milestone
1.3.12	Requirements:	Traceability matrix for project technical and functional requirements
1.3.13	Conduct Lessons Learned Meeting	Accumulation of knowledge gained regarding "how to" avoid pitfalls during each phase of the project
1.3.14	Deliverable: Planning Gate RCA Assessment	Phase gate to assess risk and complexity status of the project
1.4	Planning Phase Complete	Milestone
1.5	Execution	Accomplishing the statement of work for the project
1.5.1	Execution Phase Start	Milestone
1.5.2	Phase 1a - API Technology Adoption	Adoption of an ESB-based SOA via installation of the ESB and the API layer.
1.5.2.1	Recommendations, Standards, and Decisions	SSI vendor API tool recommendation and delivery of related architectural standards
1.5.2.2	SOA/API Vendor and API Tool Procurement	Documentation of ESB requirements, SOW/RFQ development, advertisement, and contract award
1.5.2.3	Vendor under Contract	Milestone
1.5.2.4	Vendor Project Planning	Vendor on-boarding, Requirements review, and vendor project plan
1.5.2.5	Install and configure API layer	Software installation and test into the development, test, pre-prod, and production environments

WBS	Task Name	Definition	
1.5.2.6	SSA & FIRRE Investigation	Drafting, business review, and technical review of	
	(User Stories)	user stories associated with SSA and FIRRE	
		Investigation APIs	
1.5.2.7	Operations and Maintenance	Drafting, review, feedback, changes and approval	
	(O&M) Plan	of the O&M plan for the ESB and API layer	
1.5.3	Phase 1a - Complete	Milestone	
1.5.4	Phase 1b – DHSMV (User	Drafting, business review, and technical review of	
	Stories)	user stories associated with the DHSMV APIs	
1.5.5	Phase 1b - Complete	Milestone	
1.5.6	Conduct Lessons Learned	Accumulation of knowledge gained regarding	
	Meeting	"how to" avoid pitfalls during each phase of the	
		project	
1.6	Execution Phase complete	Milestone	
1.7	Monitoring and Controlling	Activities intended to observe the health of the	
		project and report on its progress	
1.8	Monitoring and Controlling	Milestone	
	Phase Complete		
1.9	Project Closeout	Activities intended to conclude the project,	
		focusing on documentation and results	
1.10	Closeout Phase complete	Milestone	

III. Resource Loaded Project Schedule

The SOA and API Layer project is dependent on the procurement of an API toolset/development product and the SOA/API project vendor, which will be facilitated by the System and Software Integration (SSI) project vendor. The project will work closely with the SSI vendor to support the vendor's recommendations of the best products for use.

Resources are independently loaded in ServiceNow, representing a minimum of a three-month forecast requirement, based on individual feedback from each identified resource.

An analysis of the RFQ SOW and Deliverables has resulted in revised resource estimates to support the review cycle for each deliverable. This information will be loaded into Service Now once it is aligned to the revised schedule, which is under development.

Resources to be provided by the SOA/API vendor have not yet been determined and are expected to be tracked by the vendor.

A substantial amount of work is being added to the schedule, to be performed by the vendor, as a result of the RFQ release. It is important to note that this will result in a significantly lower percent complete as more work is added, based on the algorithm that ServiceNow uses to calculate the figure.

The most recent status schedule as of this report is shown in Appendix A.

IV. Project Spending Plan

The SOA and API Layer project spending plan will be managed in ServiceNow.

Procurement	Description	Justification	Needed By
PO # TBD	API Development Tool	Needed to migrate existing real time web service APIs and develop new APIs for CX/UX*	December 2022
PO # TBD	SOA/API Services Vendor	Needed to install, configure, migrate APIs from the current System, test, deploy into a pre- production environment, and support use of the ESB	December 2022

^{*} Change Request 10 has modified the scope of the project to align existing API development with the Continuous Modernization Program. The API development tool is expected to be operational during the RA Mod Program in support of any project that requires new API development.

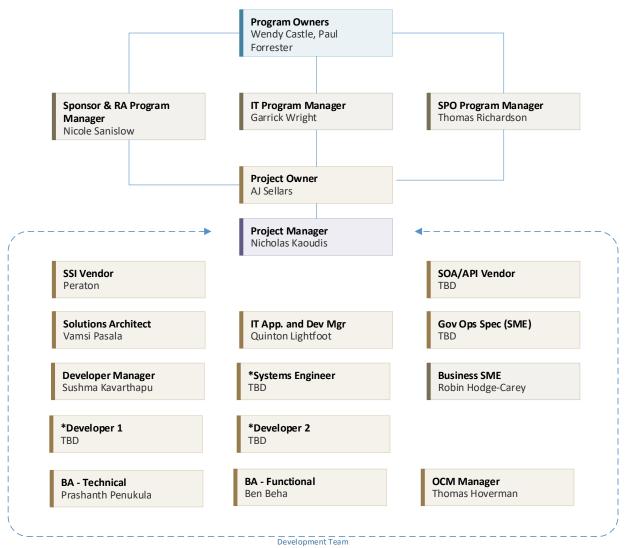

V. Project Organization and Methodology

As indicated in the "Project Roles and Responsibilities" table below, there are various technical team members assigned to this project, along with subject matter experts, an OCM lead, and a project manager. Additionally, the SOA/API vendor being procured will provide resources in accordance with the SOW for that procurement, which is under development by the SSI vendor.

It is important to delineate the scope of work between the SSI vendor and the SOA/API vendor, as they are separate vendors with separate areas of responsibility.

SSI Vendor	SOA/API Vendor
Responsible to develop requirements for the	Responsible to provide expertise to install,
SOA/API vendor procurement.	configure, and test the API tool.
Responsible to develop requirements for the	Responsible to deploy/assist DEO in the
SOA/API Layer development tool and	deployment of the API gateway.
platform.	
	Other duties/responsibilities pending
	finalization of the SOA/API vendor SOW, in
	draft form as of this report.

A. Project Organizational Chart

^{*} These organization boxes represent on-site contractor/employee resources that are expected to be hired as of the start of the RA Continuous Modernization Program (API development phase). As they will be integral to API development, they are shown here for purposes of continuity.

B. Project Roles and Responsibilities

Project Role	Resource Name	Responsibility
Program	Paul Forrester	Chief Information Officer
Owners	Wendy Castle	Director, Reemployment Assistance Program
Project	Nicole Sanislow	Responsible for making final decisions for project
Sponsors		changes and closure
		• Review and approve deliverables
		• Review and approve RFCs
Project Owner	AJ Sellars	Ensure project aligns with department strategy
		Primary point of contact
		Review and approve deliverables
Project	Nicholas Kaoudis	Manage all aspects of the project and ensure
Manager		compliance with PMP
_		Monitor project progress and schedule adherence
		Complete all documents related to the project
		 Identify and manage risks according to the PMP
Subject Matter	TBD	Contribute subject matter expertise
Experts	Robin Hodge-Carey	• Complete assigned project tasks in accordance with
_		the project schedule
		• Identify risks and issues to the Project Manager
		• Lead Business Unit testing
Technical	Vamsi Pasala	Creating requirements
Team	Quinton Lightfoot	 Creating system documentation
	Sushma Kavarthapu	• Guides the technical development of the
	Ben Beha	product and overseeing the design
	Prashanth Penukula	 Review deliverables and project documents,
	*Systems Engineer	identifying any deficiencies
	*Developer 1	 Review and approve deliverables
	*Developer 2	• Responsible for the design and integration of
		the System rules into the product
Organizational	Thomas Hoverman	Advisory role, providing guidance on
Change		organizational change
Management		
Program	Garrick Wright	Monitor project progress
Managers	Tom Richardson	• Provide guidance and support to project manager
	Nicole Sanislow	and project team members
		Provide allocation of resources
Vendors	SSI Vendor	• Establish a solid architectural basis in support of
		the continuous modernization by defining a new
		architecture based on .NET Core, Web API

Project Role	Resource Name	Responsibility	
		framework, and a service-oriented architecture for the	
		modernized System application.	
	SOA/API Vendor	TBD	

^{*} Change Request 10 has modified the scope of the project to align the API development with the Continuous Modernization Program. Accordingly, resources identified with an asterisk* are expected to be hired at the onset of that Program. As they will be integral to API development, they are shown here for purposes of continuity.

C. Project Management Methodology

DEO will use a project management methodology in compliance with project standard rule 60GG-2 F.A.C., product requirements, and DEO experience with similar engagements. Predictability, accountability, and flexibility are key elements that must be embraced by the overall project management approach to ensure DEO's satisfaction and project success. Successful project management must include active and visible leadership, multiple controls and checkpoints with measurable outcomes, and engagement with all stakeholders. DEO believes strong project management is critical throughout the life of any successful project.

For this project, DEO's project management will include the following specific elements, in addition to our standard methodology:

- The project management team will advise leadership on areas of concern and will propose solutions to mitigate risk.
- Vendors will respond to inquiries or requests from DEO within one business day from receipt.
- In the case where additional time is needed for a task, vendors will provide an estimate, which must be approved by the DEO Project Manager.
- At the end of the contract, vendors will provide final copies of all reports in electronic format for archive purposes.
- DEO's project management approach will utilize the technical skills, tools, and techniques needed to succeed, as well as the dedication to accountability, resource commitment, and organizational focus. Project success will be the result of active communication among all individuals, understanding everyone's role in the project, and clear delineation of responsibilities.

DEO believes successful project management hinges on the following:

- Clearly established project goals and requirements
- Ongoing assessment of quality against established standards
- Constant measurement of success against established deliverables and milestones
- Personal presence and commitment of key project leadership
- Proactive identification and communication

VI. Business Process Organizational Change Management Plan

This project intends to migrate existing web-based real-time APIs into a pre-production environment, that can be maintained by internal staff. The SOA/API layer project will deliver improved scalability due to the service-oriented architecture allowing independent scaling of each service and clear direction for the CX/UX modernization. To initiate this change, this project will follow the organizational change processes outlined in the RA Modernization Program Organizational Change Management Plan, which is in the RA Modernization Program Library Central Repository.

The role of the Organizational Change Management Plan (OCM) within the SOA API Layer project is to assist in planning for and managing the people side of the project. OCM focuses on identifying, preparing, and managing a wide array of internal and external stakeholders, employees, and customers that will be impacted by the new solution. It is useful for those stakeholders to be informed, prepared, trained, and ready to participate in a successful implementation. It is beneficial for employees to adopt new skills and develop new capabilities and to value and appreciate the features that the new technology offers.

VII. Project Risk Management Plan

This project will follow the <u>Risk Management Plan</u>, captured within the Reemployment Assistance Program Management Plan. The Reemployment Assistance Modernization Program team follows a standard method for logging and categorizing issues, researching solutions, and communicating options and final recommendations. Project team members should actively contribute, as it is critical to timely decisions and moving past roadblocks. The buy-in of the project team, key team members and technical staff is critical to the success and ensures that he project team delivers a product in line with the project goals.

Key activities of the risk management process include:

- ➤ **Risk Identification** Identifying risks that could potentially impact the project.
- ➤ **Risk Analysis** Prioritize risks and assess the probability and consequence of the risk.
- ➤ Risk Response Planning Prepare action plans to enhance opportunities or minimize threats to the program.
- ➤ **Risk Monitoring** Execute action plans and evaluate their effectiveness, tracking, and reviewing residual risks and identifying new risks.

Risks are entered into Service Now for monitoring and management.

Risk Description/Impact	Probability of Occurrence (high, medium, low)	Risk Tolerance (high, medium, low)	Mitigation Strategy	Assigned Owner
No open risks				

VIII. Capacity Plan

This project does not involve the purchase/lease, configuration, and installation of significant computer hardware (more than 5% of project costs). For purposes of capacity planning, computer hardware includes servers, storage, and network infrastructure. Accordingly, a Capacity Plan is not required.

IX. Appendix A – Status Schedule

A. Status schedule as of this report

1	SOA API Layer	331.63 days	Tue 2/1/22	Wed 5/31/23
1.1	Initiation	59 days	Tue 2/1/22	Fri 4/22/22
1.2	Initiation Phase complete	0 days	Fri 4/22/22	Fri 4/22/22
1.3	Planning	176.53 days	Tue 2/15/22	Tue 10/25/22
1.4	Planning Phase Complete	0 days	Tue 10/25/22	Tue 10/25/22
1.5	Execution	259 days	Fri 4/22/22	Tue 5/9/23

SECTION 1 — OVERALL PROJECT PLAN

I. Project Charter

A. Scope Statement

The System and Software Integration (SSI) vendor will provide analysis, oversight, monitoring, testing and assumes the responsibilities for the foundational technical platform and systems and software integration services necessary to develop and implement the Reemployment Assistance Claims and Benefits Information System's (System) current and future infrastructure for modernization. These integration efforts will allow the Department of Economic Opportunity (Department) to secure services which can interoperate and communicate without relying on a common platform or technology. Connecting services, systems, and infrastructures and developing integration standards are the next steps for advancing the System's maturity and System modularity for modernization.

Integration services include documenting the existing technical requirements and specifications of the System and an analysis of the existing technical requirements and specifications. The analysis will determine what technical requirements and specifications need to be improved to increase the effectiveness and efficiency of the System and assist the Department with acquiring software and hardware solutions that support the Reemployment Assistance Modernization Program. This shall include full evaluation of the Reemployment Assistance Information Technology program that relates to the System.

B. Project Objectives and Business Benefits

Project Objective	Business Benefit
Improved delivery of RA Benefits	Time to process claims is reduced
Improved functionality	Increased customer satisfaction and self-
	service alleviates dependencies on staffing
Improved system performance	System availability is improved
	Less regression testing
	Faster code delivery to production
A secure and scalable system with a	Reduction in capital expenditures
sustainable system architecture	

C. Critical Success Factors

- Improved customer experience/user experience (CX/UX).
- Implementation of a model that will serve Florida's Reemployment Assistance needs for many years.
- Preserved continuity of Departmental operations and minimizing demands on Department staff.
- Implementation of an operations model that will serve the Reemployment Assistance program for the long term.
- Compliance with state and federal standards.

D. Key Dates

Key Delivery	Importance and Relevance to the Project			
Date				
04/14/2022	Project Kick-Off Meeting			
04/19/2022	Project Management Plan			
04/19/2022	Staffing Plan			
06/27/2022	Training and Requirements Management Plan			
08/24/2022	To-Be Technical Requirements			
08/31/2022	To-Be Technical Requirements Working Sessions			
09/12/2022	Transition Plan

E. Major Deliverables

Major	Deliverable Description	Status		
Deliverable	r r			
Deliverable 1	Project Kick-Off Meeting	Accepted		
Deliverable 2	Project Management Plan	Accepted		
Deliverable 3	Staffing Plan	Accepted		
Deliverable 4	To-Be Technical Requirements	Accepted		
Deliverable 5	To-Be Technical Requirements Working Sessions	Accepted		
Deliverable 6	Final To-Be Technical Requirements Report	In Progress		
Deliverable 7	Design Documentation	In Progress		
Deliverable 8	Infrastructure Performance Requirements	In Progress		
Deliverable 9	Requirements Management Plan	Accepted		
Deliverable 10	Architectural Standards for Overall System	Accepted		
	Modernization			
Deliverable 11	Performance Benchmarks	In Progress		
Deliverable 12	Architecture Change Control and Approval Processes	Delivered		
Deliverable 13	Oversight and Monitoring of Modernization Projects	In Progress		
Deliverable 14	Integration Testing			
Deliverable 15	Integration Services			
Deliverable 16	Technology Selection Delive			
Deliverable 17	Procurement Support In Progr			

Major Deliverable	Deliverable Description	Status
Deliverable 18	Transition Plan	Accepted

F. Major Milestones

Major Milestone	Milestone Description
Initiation Phase Complete	All initiation activities completed
Planning Phase Complete	All planning activities completed
Execution Phase Complete	In Progress
Monitor and Controlling Phase Complete	In Progress
Closing Phase Complete	

G. Key Stakeholders

Key Stakeholder	Project Interest
Dane Eagle	Secretary, Department of Economic Opportunity
Adrienne Johnston	Deputy Secretary, Division of Workforce Services
Domenic DiLullo	Chief Technology Officer
Paul Forrester	Chief Information Officer
Allyce Moriak	Chief Financial Officer
Wendy Castle	RA Modernization Program Owner - Business
Nicole Sanislow	RA Modernization Program Manager - Business
Tom Richardson	RA Modernization Program Manager – Strategic Planning
	Office
Garrick Wright	RA Modernization Program Manager – Information
	Technology
Monique Emmanuel	Project Manager

H. Significant Project Assumptions and Constraints

Project Assumptions

Vendor will create/recommend solutions that promote useability, product innovation, and scalability by using innovative concepts and that are suitable for a government environment with funding constraints.

Project Constraints

Design may be materially constrained by:

- 1. Governing provisions of federal or state laws and regulations
- 2. Requirement to reduce operating costs
- 3. A schedule constraint of June 2023

II. Work Breakdown Structure

WBS	Contract Deliverable Numbers	Task Name	% Complete	Duration	Start	Finish
0		Reemployment Assistance Modernization Program	1%	338 days	Wed 4/6/22	Fri 7/28/23
1		Program Startup and Plan	4%	311 days	Wed 4/6/22	Wed 6/21/23
1.1		Program Start	100%	0 days	Wed 4/6/22	Wed 4/6/22
1.2		Program Assets	11%	127 days	Wed 4/6/22	Tue 10/4/22
1.2.1	2.1.1	Deliverable 1 – Project Kick-Off Meeting	100%	11 days	Wed 4/6/22	Wed 4/20/22
1.2.2	2.1.2	Deliverable 2 – Project Management Plan	63%	18 days	Wed 4/6/22	Fri 4/29/22

III. Resource Loaded Project Schedule

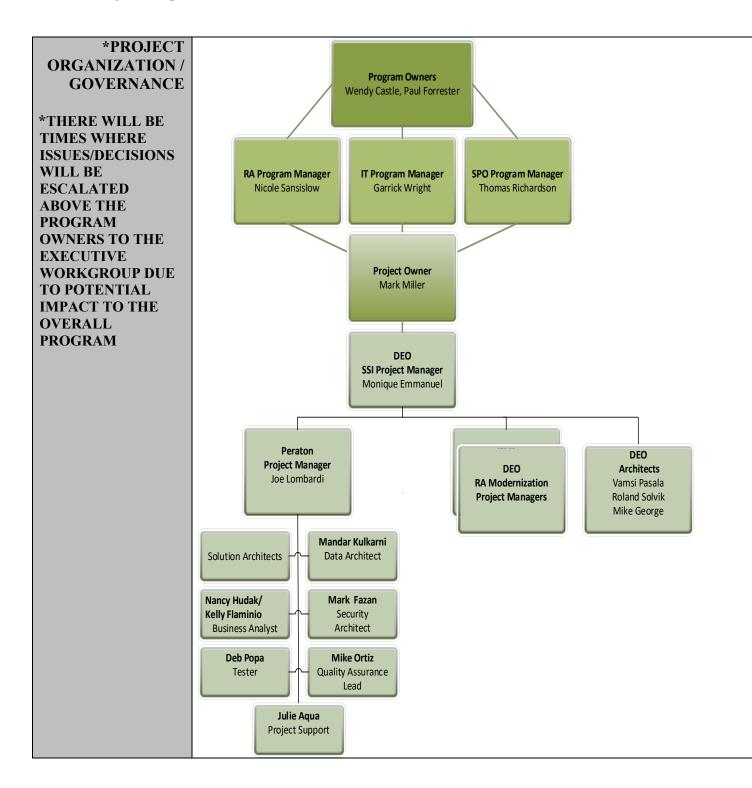

See Appendix A

IV. Project Spending Plan

Total	FY 2021/22	FY2022/23	FY 2023/24
\$4,012,861.04	\$80,724.19	\$913,819.02	\$2,986,214.32

V. Project Organization and Methodology

A. Project Organizational Chart

B. Project Roles and Responsibilities

Project Role	Resource Name	Responsibilities
Program Owners	Wendy Castle Paul Forrester Domenic DiLullo	 Provide guidance on overall strategic direction Advise the Strategic Planning Office and project manager of risks that may impact the project Facilitate resolution of significant issues in the project
Program Managers	Garrick Wright Thomas Richardson Nicole Sanislow	 Provide guidance on overall strategic direction Advise the Strategic Planning Office and project manager of risks that may impact the project Facilitate resolution of significant issues in the project Review and sign off on key milestones
Project Manager	Monique Emmanuel	 Manage all aspects of the project and ensure compliance with PMP Monitor project progress and schedule adherence Complete all documents related to the project Identify and manage risks according to the PMP
Project Owner	Mark Miller	 Review deliverables and project documents, identifying any deficiencies Review and approve deliverables Review and approve RFCs
DEO Enterprise Architects	Vamsi Pasala Roland Solvik Mike George	 Contribute subject matter expertise Complete assigned project tasks in accordance with the Project Schedule Identify risks and issues to the Project Manager in accordance with the Risk and Issue Management section of this PMP Assist the Project Manager in responding to risks and issues Assist the Project Manager in evaluating change requests
SSI Delivery Team Lead	Joe Lombardi	 Responsible for managing System integration and modernization program operations. Develops the program strategy, supporting business case and various enterprise-wide high-level project plans.

Solutions Architect	Rudolph Mallamas Ramesh Valluri James Rogers	 Ensures integration of projects and adjusts project scope, timing, and budgets as needed, based on the needs of the Department. Communicates with Peraton and Department leadership, business leadership and IT Business Consultants to communicate program strategy, direction, and changes. Responsible for delivering all projects contained in the System modernization portfolio of projects on time, within budget and meeting the strategic and business requirements of the Department. Responsible for tracking key program milestones and implementing adjustments to achieve Department objectives. Partners with Departmental senior leadership to identify and prioritize opportunities for using IT to achieve the goals of the enterprise. Develops and maintains the program management plans and schedule. Serves as the single point of accountability for contract delivery and execution and Peraton staff. Responsible for providing senior level expertise on decision recommendations and priorities regarding the Department's overall modernization initiative's architecture. Facilitates the establishment and implementation of standards and guidelines that guide the design of technology solutions including architecting and implementing solutions requiring integration of multiple platforms, operating systems, and applications across the program. Reviews, advises, and designs standard software and hardware builds, system options, risks, costs vs. benefits and impact on the Department's business process and goals. Develops and documents the framework for integration and
		goals.
		 implementation for changes to technical standards. Assists in the development of and manages an architecture governance process. Provides technical guidance to project team areas as appropriate. Contributes to the development of requirements for the Department's statements of work, reviews and evaluates vendor technical proposals, participates in source selection.

		- Tracks industry trends and maintains knowledge of new technologies to better serve the Department's architecture needs.
Data Architect	Mandar Kulkarni	 Responsible for program-wide data design, balancing optimization of data access with batch loading and resource utilization factors. Designs and oversees the construction of data architectures, operational data stores, and data marts. Focuses on program-wide data modeling and database design. Provides significant input in the design of program data architecture standards, policies and procedures for the modernization program, structure, attributes, and nomenclature of data elements, and applies accepted data content standards to technology projects. Contributes to business analysis, data acquisition and access analysis and design, Database Management Systems optimization, recovery strategy, and load strategy design
Business Analyst & Tester	Nancy Hudak Kelly Flaminio	 and implementation. Performs as the subject matter expert in unemployment compensation/insurance for the team. Works closely with the Department, business analysts, and team members to understand business requirements that drive the analysis and design of quality technical solutions. Involved in the full program life cycle and is responsible for designing, testing, implementing, maintaining, and supporting applications software that is delivered on time and within budget. Participates in component and data architecture design, performance monitoring, product evaluation and buy vs. build recommendations. Contributes to program procurement activities to include statement of work requirements, proposal evaluation, and source selection. Performs systems analysis and design. Applies understanding of development, quality assurance and integration methodologies in overseeing the technical implementation of program requirements.
Transition & Quality Manager	Mike Ortiz	- Leads the program transition activities for Peraton, planning and coordinating the transition on to and off of the Department.

		 Responsible for establishing and implementing Peraton's quality assurance and compliance processes for the Department. Works closely with Department and vendor project IT leaders to develop and implement an overall quality maturity roadmap and plan for each project. Reviews progress toward the plan regularly with program IT and vendor leaders, technical teams to make modifications as necessary. Establishes program IT service quality control standards, policies, and procedures. Monitors, evaluates, manages, and executes audit processes to ensure compliance. Provides guidance and subject matter expertise to IT teams on QA methodologies and processes, educates them on their responsibilities/accountabilities for the purpose of achieving on-time and quality deliverables. Makes recommendations and directs improvements to the software development lifecycle process. Documents non-compliance to policies, process and standards and assists in their resolution.
Security Architect	Mark Fazen	 Manages the development and delivery of security standards, best practices, architecture, and systems to ensure information system security across the program. Implements processes and methods for auditing and addressing non-compliance to information security standards; facilitates migration of non-compliant environments to compliant environments. Ensures compliance with standards and currency with State and Federal security requirements. Manages and participates in the planning and implementation of security administration for all program projects. Contributes to the evaluation and selection of security applications and systems. Makes recommendations and assists in the implementation of changes to work methods and procedures to make them more effective or to strengthen security measures.
Program Integration Tester	Deb Popa	 Prepares and plans for program integration testing. Coordinates with project teams and communicates integration testing standards and requirements to them. Documents program level integration test plans and scripts.

		- Conducts program level integration tests, identifies, and communicates test results to project teams, and conducts program level regression testing.
Project Support	Julia Aqua	 Assist SSI Delivery Team Lead with meeting agendas and minutes. Provide project schedule updates
RA Modernization Project Managers	Nicole Cain Nicholas Kaoudis James Sparks Hameed Ahmed David Sinclair Linda Lawler Steve Garrison Christian Stephens Sandeep Aggarwal Viraj Jejurkar	 Contribute subject matter expertise Complete assigned project tasks in accordance with the Project Schedule Identify risks and issues to the Project Manager in accordance with the Risk and Issue Management section of this OWP Assist the Project Manager in responding to risks and issues Assist the Project Manager in evaluating change requests

C. Project Management Methodology

DEO will use a project management methodology in compliance with project management standard rule 60GG-2 F.A.C., project requirements and department experience with similar engagements. Predictability, accountability, and flexibility are key elements that must be embraced by the overall project management approach to ensure the Department's satisfaction and project success. Successful project management must include active and visible leadership, multiple controls and checkpoints with measurable outcomes, and engagement with all

stakeholders. The Department believes strong project management is critical throughout the life of any successful project.

For this project, the Department's project management will include the following specific elements, in addition to our standard methodology:

- The project management team will advise leadership on areas of concern and will propose solutions to mitigate risk.
- Vendors will respond to inquiries or requests from the Department within one business day from receipt.
- In the case where additional time is needed for a task, vendors will provide an estimate, which must be approved by the Department Project Manager.
- At the end of the contract, vendors will provide final copies of all reports in electronic format for archive purposes.

The Department's project management approach will utilize the technical skills, tools, and techniques needed to succeed, as well as the dedication to accountability, resource commitment, and organizational focus. Project success will be the result of active communication among all individuals, understanding everyone's role in the project, and clear delineation of responsibilities.

The Department believes successful project management hinges on the following:

- Clearly established project goals and requirements
- Ongoing assessment of quality against established standards
- Constant measurement of success against established deliverables and milestones
- Personal presence and commitment of key project leadership
- Proactive identification and communication of risks and issues

Quality Management Plan

The Quality Management Plan ensures work is complete and meets or exceeds an adequate level of quality of the deliverables. All members of the project team will play a role in quality management, and it is critical the team ensures work is completed according to the Department's standards for quality acceptance.

Project Quality Management activities will ensure project documents meet agreed upon standards, work is performed efficiently, project practices conform to recommended project standards and deficiencies are identified and corrective action taken.

Quality Management Approach

Managing quality includes four major processes:

• Quality planning (QP): Completeness and correctness criteria define what it means for a project document to be complete and correct. The project team will establish completeness and correctness criteria. Specific criteria for the quality of Contract Deliverables will be documented in the contract and managed by the Contract Manager, program team and Project Manager.

- Quality assurance (QA) refers to the process used to create project documents, not the deliverables themselves. The Project Team will perform QA activities for the project weekly. The project manager may make changes to processes as necessary; changes will be communicated to the appropriate stakeholders.
- Quality control (QC): Performing Quality Control (QC) involves monitoring specific project results to determine whether they comply with relevant quality standards and identifying ways to eliminate causes of unsatisfactory results. The Strategic Planning Office (SPO) will perform (QC) activities to verify project management and documents are of high quality. If the SPO determines a project document to be complete, it will be presented to the Project Team at the following Status Meeting.
- Quality improvement (QI): The Project Manager is responsible to implement corrective actions based on the results of the quality management processes. These may include changes to project management processes; required training for stakeholders; updating performance metrics, etc.

Communication Management Plan

This project will follow the communications processes outlined in the RA Modernization Program Communications Management Plan.

Item	Purpose	Format	When/ Frequency	Туре	Initiator	Recipient	Feedback
Project Meeting	Provide and discuss project tasks, issues, risks, action items	Meeting/Face to face or virtual)	Daily/ Weekly as needed	Mandatory	Project Manager	Project Team	Meeting Minutes
Status Report	Provide detailed information on the progress of the project against the plan	Email	Weekly/ Monthly/ Quarterly	Mandatory	Project Manager	Project Team/SPO Program Manager	Verbal and follow-up email
SPO Status Meeting	Review the status report, resolve issues, and make decisions	Meeting	Weekly	Mandatory	Project Manager	SPO Program Manager	Verbal and follow-up email
Project Deliverables	Provide deliverables to DEO for review	Email	Per project schedule	Mandatory	Project Manager	SPO Program Manager/ Project Team members	Written vetted, consolidated, and actionable comments

Deliverable Review Feedback	Provide vetted, consolidated, and actionable written comments	Email	Per project schedule	Mandatory	SPO Program Manager	Project Manager/ Project Team Members	Written/ email follow-up using Deliverable Review Comment Form
Deliverable Review Walkthrough	Confirm mutual understanding of desired deliverable changes	Meeting	As needed	Informational	Project Manager	Program Managers/ Project Owners	Verbal or written
Work Session	Gather information from subject matter experts	Meeting	Per project schedule	Mandatory	Project Manager	Update subject matter experts (only if the SPO Project Manager has the approved communication)	Verbal and follow-up email
Work Session Follow-up	To answer questions or clarify information gathered	Email	As needed	Informational	Project Manager	Provide subject matter experts (only if SPO Project Manager has approved the communication)	Verbal or email follow-up
Online Survey	Gather information from subject matter experts (former providers	Email	Per project schedule	As needed	Project Manager	Subject matter experts (only if SPO Project Manager has approved the communication)	Verbal or email follow-up
Project Issues	Documentation of project issues	Issue Log Entry	As needed	Mandatory	Any Stakeholder	Project Owner/ Project Manager	Written/ email follow-up
Project Issues Escalation	To resolve project issues	Email	As needed	Mandatory	Project Manager	SPO Program Manager	Written/ email follow-up
Change Requests	Document project changes to scope of work	Change Request Form	As needed	Mandatory	Change Initiator	Project Manager/ Change Owner/ Change Analyst/ CCB	Written/ email follow-up
Project Closeout and Lessons Learned	Formal project closeout meeting	Email	Per project schedule	Mandatory	SPO Project Manager	All Stakeholders	Written/ email follow-up

The master copy of this document is available in the <u>RA Modernization Program Library</u> in the Central Repository

The communication matrix below identifies the key project stakeholders and the detail of communications for this project.

Bi-Weekly Status Reporting

Vendors will be required to submit status reports throughout the project at several levels. The primary source of status information is the weekly written status report, which will communicate at minimum, the following information.

- **Project Status.** This section depicts the project status at a summary level using a red/yellow/green method supported by two to three essential questions that are answered to determine summary status. The red/yellow/green method is not meant to be a grading system but instead it is a way to easily identify the areas of the project that need the most attention to make the project successful.
- Overview of Project Progress. This section describes significant accomplishments achieved in the reporting period.
- Overall Status. This section provides a high-level overview of whether the project is on schedule, on budget, and on scope. A yellow or red status should be explained here in detail.
- Project Milestones, Deliverables, and Latest Tasks. This section contains the major deliverables of the project, their planned and actual completion dates, and their status.
- Risks, Action Items, Issues, and Decisions. This section will link to the project risk, action item, issue, and decision tracking tool. The project tracking tool contains all items tracked during the project.

Project Tracking

This section describes the "RAID" methodology for tracking risks, action items, issues, and decisions. The Department will follow a centralized approach that minimizes miscommunication or misinformation among project stakeholders. The Department will diligently maintain a project tracking log for each project, and a master log for the System Modernization project overall, a Microsoft Excel workbook with multiple tabs intended to capture the details and the latest attributes of items tracked by Project Managers.

VI. Business Process Organizational Change Management Plan

This project will follow the organizational change processes outlined in the RA Modernization Program Organizational Change Management Plan.

The master copy of this document is available in the <u>RA Modernization Program Library</u> in the Central Repository.

The role of the Organizational Change Management plan (OCM) within an individual project under the RA Modernization Program is to help plan for and manage the people side of the project. OCM focuses on identifying, preparing, and managing a wide array of internal and external stakeholders, employees and customers that will be impacted by the new solution. It is good for those stakeholders to feel informed, prepared, trained and ready to participate in a successful implementation. It is beneficial for employees to adopt new skills and develop new capabilities and to value and appreciate the features that the new technology offers.

VII. Project Risk Management Plan

Risk & Complexity Assessment

The Risk & Complexity Assessment will be completed at the end of every Phase in the Project lifecycle. The Project Manager is responsible to complete this assessment with the assistance of project team members.

Risk & Complexity Assessments	Category
Pre-Charter Risk & Complexity Category	3
Initiation Gate Risk & Complexity Category	2
Planning Gate Risk & Complexity Category	
Event Driven Risk & Complexity Category	

Project Risk Management

This project will follow the risk management processes outlined in the RA Modernization Program Risk Management Plan.

The master copy of this document is available in the <u>RA Modernization Program Library</u> in the Central Repository.

The risk management process helps the project team anticipate and respond to emerging risks throughout the duration of the project. The risk management process occurs throughout all phases of the project, from planning through execution and closeout. Project risks are logged and tracked in the Project Log Workbook (RAID Logs).

Figure 2 below illustrates the major activities associated with the key risk management process.

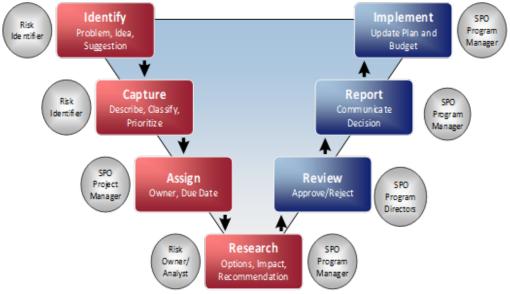

Figure 2: RA Modernization Program Risk Management Process

Action Items

Action items are unplanned tasks that occur during a project that are too small to be added to the schedule. These items must be within the scope of the project and are often tasks that support scheduled tasks, issue resolution, risk management, or some other aspect of the project. The action item log is created and maintained as part of the project tracking log.

Action items will be managed in the following manner:

- During status meetings, any stakeholder can raise an action item for discussion.
- The Project team will discuss the action item and determine if it warrants being monitored in the action item log.
- The project manager will enter the item in the log.
- The team will set the priority for the action item (high/medium/low), assign an action item owner, and set a planned completion date.
- At each subsequent status meeting, the action item(s) will be reviewed until they can be closed.

Issue Management

This project will follow the issue management processes outlined in the RA Modernization Program Issue Management Plan.

The master copy of this document is available in the <u>RA Modernization Program Library</u> in the Central Repository.

An issue is an immediate problem that needs resolution. Acknowledging and addressing issues quickly ensures that they do not impact the scope of the project. Project issues are logged and tracked in the Project Log Workbook (RAID Logs).

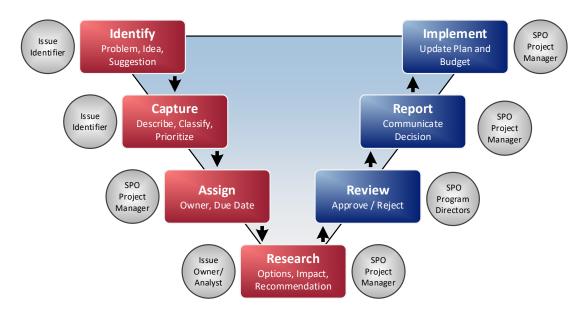

Figure 3: RA Modernization Program Issue Management Process

Decisions

Decisions are leadership answers to questions that arise during the project. The decision log is created and maintained as part of the project tracking log.

Decisions will be managed in the following manner:

- During status meetings, any stakeholder can raise a question that requires a decision.
- If the team determines a decision needs to be made, the project manager will enter it in the decision log.
- The team will discuss the impact to the project, assign a decision maker, and set a date for when the decision is needed.
- At each subsequent status meeting, the decision item(s) will be reviewed until they can be closed.

Change Management

This project will follow the change processes outlined in the RA Modernization Program Change Management Plan.

The master copy of this document is available in the <u>RA Modernization Program Library</u> in the Central Repository.

The RA Modernization Change Management Plan, defines the approach and provides the processes for initiating, defining, researching, evaluating, reviewing, prioritizing, managing cost, approving, or rejecting the change requests (CR), and communicating the status of the change that may affect the success of the SSI project.

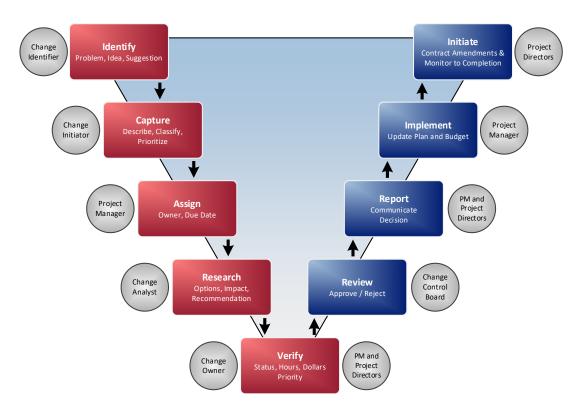

Figure 4:RA Modernization Program Change Management Process

Schedule Management

The project schedule for this project will be stored in the Central Repository 03 SSI Project Deliverables folder.

Schedule Maintenance

The project schedule maintenance is an on-going activity that tracks the work performed, the timeframes for when the work has been or will be completed and progress against the baseline work estimates and timelines. To effectively track the program progress, the project schedule is kept current, and reflects all work that needs to be performed, in accordance with the RA Modernization Program Schedule Management Plan.

If a change to the project schedule or scope is needed, the Project Manager may pursue a change request as described in the *RA Modernization Change Management Plan*.

Procurement Management

The Procurement Management Plan seeks to outline how the project will procure resources necessary to complete the project objectives. It defines the procurement methodology for this project, lays out the process for managing procurement throughout the life of the project, and will be updated if project needs change. This plan identifies and defines the goods and services to be procured, the types of contracts to be used in support of this project, the contract approval process, and the decision criteria. The importance of coordinating the procurement activities,

establishing firm contract deliverables, and metrics in measuring procurement activities is included in the following subsections.

Procurement Management Approach

The Department's Purchasing Office and any vendors contracted for procurement assistance will provide oversight and management along with the Project Manager for all procurement activities under this project. The Project Manager will work with the project team to identify all items to be procured for the successful completion of the project. The Department Strategic Planning Office (SPO) will then review any procurement requests prior to approving the development of procurement documentation.

Procurement Definition

The following table will be completed to record any procurement goods and/or services determined to be essential for any RA Modernization project's completion and success. The Project Manager and/or SPO must approve any procurement before inclusion in this table.

Procurement	Description	Justification	Needed By
SSI Services	Analysis, oversight, monitoring, and testing along with technical expertise to establish and lay the foundation and infrastructure for the technical platform and integrate the software necessary to deliver a fully integrated system.	Needed to support RA Modernization Program integration activities	4/4/2022

Cost Management

The tables below will be completed and used to define and track project costs during the SSI Project.

Cost Management Plan							
Category Description Frequency Deliverable Cost							

Column	Definition			
Category	Type of expense			
Description	Description of expense			
Frequency	Describe whether the expense is annual or recurring or a one-			
	time expense			
Deliverable	List the deliverable associated with the expense			
Cost	List the total expense in dollars, e.g. \$0.00			

Staffing Management

The purpose of this section is to outline how the project is to manage staffing requirements and resource tasks appropriately. This project plans to procure additional staffing through the contract with Peraton for integration services. This is a fixed price contract and Peraton will provide needed resources as is necessary to complete the contract.

VIII. Capacity Plan

Utilization of a single tool for software development provides a single source of truth for work tracking and resource allocation which can then be utilized for capacity planning for the development environment, tools, and developers.

Project Capacity Planning

- Establish Cross-Functional Team: To collaborate and communicate about production capacity and resource management, you want a cross-functional team with different levels and different functions.
- Calculate Resource Capacity: Before you can create a production capacity plan, you need to have an idea of your current capacity and your available resources.
- Determine Resource Requirements: For each project, look at the scope and what resources are required to do the task for the project.
- Prioritize Projects: Which projects are most important, and which can be put aside for the time being? You can't do everything at once.
- Allocate Resources Based on Project Priority: Now allocate those prioritized projects and make sure that they are aligned with the goals of the organization.
- Keep the Lines of Communications Open: Communicate between executives, project management leaders and stakeholders.
- Document Known Risks: Monitor risks such as union strikes, weather, government regulations that stop a project or create new ones unexpectedly.
- Plan for How to Handle Too Much Capacity: Understand where it is and how to resolve it (such as reassigning), or not enough capacity (again, where/how).

Case Mgt and Adjudication (continued)	1.5 hrs		Thu 6/16/22	Joe Lombardi
Notice of Verification	1.5 hrs		Thu 6/16/22	Joe Lombardi
Develop workshop summary	3 days	Fri 6/17/22	Wed 6/22/22	Joe Lombardi
Update Transformation Opportunity List	3 days	Fri 6/17/22	Wed 6/22/22	Joe Lombardi
Week 4 Work shop Sessions-Core & Continued RTM v3. (1)	2.13 days	Tue 6/21/22	Thu 6/23/22	
CX/UX	1.5 hrs	Tue 6/21/22	Tue 6/21/22	Joe Lombardi
CX/UX (continued)	1.5 hrs		Tue 6/21/22	Joe Lombardi
Eligiblity/Claims Management/File Claims	1.5 hrs	Wed 6/22/22	Wed 6/22/22	Joe Lombardi
Sys Enhancement & Other User processes	1.5 hrs	Wed 6/22/22	Wed 6/22/22	Joe Lombardi
Call Center processes	1.5 hrs	Thu 6/23/22	Thu 6/23/22	Joe Lombardi
Architecture Review	1.5 hrs	Thu 6/23/22	Thu 6/23/22	Joe Lombardi
Develop workshop summary	3 days	Thu 6/23/22	Tue 6/28/22	Joe Lombardi
Update Transformation Opportunity List	3 days	Thu 6/23/22	Tue 6/28/22	Joe Lombardi
Initial Claim, TPA, Employer Requirements Review	10 days		Mon 8/1/22	

Review and reconcile changes to KPMG To Be Technical Report	1 day	Mon 7/18/22	Tue 7/19/22	Joe Lombardi
Review and reconcile change to KPMG RTM and Change Log	1 day	Mon 7/18/22	Tue 7/19/22	Joe Lombardi
Review prior work session log, inventory unclear requirements	1 day	Tue 7/19/22	Wed 7/20/22	Joe Lombardi
Resolve unclear requirements w DEO	1 day	Tue 7/19/22	Wed 7/20/22	Joe Lombardi
Validate work flows, Develop TRs	3 dave	Wed 7/20/22	Mon 7/25/22	Joe Lombardi
prioritization	5 days	Mon 7/25/22	Mon 8/1/22	Joe Lombardi
Prepare TRs for CX/UX SOW and To Be Technical Report	0 days	Mon 8/1/22	Mon 8/1/22	Joe Lombardi
Assemble Workshop Documentation (Meeting Agendas and Recordings)	3 davs		Mon 8/22/22	Joe Lombardi
Review final inventory	2 days		Wed 8/24/22	Joe Lombardi
Submit to DEO for final review and approval	4 days		Tue 8/30/22	Joe Lombardi
MS - Deliverable 5 To-Be Technical Requirements Working Sessions Complete	n days		Tue 8/30/22	Joe Lombardi
Deliverable 9 - Training and Requirements Management Plan	41 days		Wed 7/6/22	
Develop Knowledge Transfer Plan	5 days		Tue 5/17/22	Joe Lombardi
For Requirements Management Create and update:	7 days		Thu 5/26/22	
Training Manual	3 davs	Wed 5/18/22	Fri 5/20/22	Joe Lombardi
Guides) dave	Mon 5/23/22	Tue 5/24/22	Joe Lombardi
Desktop Aids	2 days	Wed 5/25/22	Thu 5/26/22	Joe Lombardi
Develop Requirement Management Plan	13 days	Fri 5/27/22	Tue 6/14/22	
Develop user stories for configuration of Traceability Tool	3 days	Fri 5/27/22	Tue 5/31/22	Joe Lombardi
Document User Rules for Forward/Backward traceability	2 days	Thu 6/2/22	Fri 6/3/22	Joe Lombardi
Create workflows and activities) dave	Mon 6/6/22	Tue 6/7/22	Joe Lombardi

Develop Technology Policy	7 days	Thu 7/28/22	Mon 8/8/22	
Human Resources	1 day	Fri 7/22/22	Mon 7/25/22	Joe Lombardi
IoT and Networks	2 days	Wed 7/20/22	Fri 7/22/22	Joe Lombardi
Software	2 days	Mon 7/18/22	Wed 7/20/22	Joe Lombardi
Hardware	2 days	Thu 7/14/22	Mon 7/18/22	Joe Lombardi
To-Be Infrastructure Architecture	7 days	Thu 7/14/22	Mon 7/25/22	
Develop Infrastructure Architecture Component View	7 days	Thu 7/14/22	Mon 7/25/22	
Develop Logical Location Software Deployment Schema	10 days		Thu 7/28/22	Joe Lombardi
Develop Logical Location Connectivity Model	10 days	Thu 7/14/22	Thu 7/28/22	Joe Lombardi
Architecture	17 days		1VION 8/8/22	
Deliverable 10 – Architectural Standards for Overall System Modernization Define Future Infrastructure	55 days	7/14/22	Thu 9/29/22 Mon	
MS - Deliverable 9 Requirements Management Plan Complete	0 days	Wed 7/6/22	Wed 7/6/22	Joe Lombardi
Publish Requirements Management Plan	1 day	Wed 7/6/22	Wed 7/6/22	Joe Lombardi
Receive Approval of the Requirements Management Plan by DEO	8 days	Thu 6/23/22	Mon 7/4/22	Joe Lombardi
Submit Requirements Management Plan to DEO for Approval	1 day		Wed 6/22/22	Joe Lombardi
Finalize Requirements Management Plan	2 days	Mon	Tue 6/21/22	Joe Lombardi
Review the Requirements Management Plan by DEO	2 days	Thu 6/16/22		Joe Lombardi
Submit Requirements Management Plan to DEO for Review	1 day		Wed 6/15/22	Joe Lombardi
Final internal review and edit	1 day	1	Tue 6/14/22	Joe Lombardi
Identify and document Quality Measures	2 days	Fri 6/10/22	Mon 6/13/22	Joe Lombardi
Identify Baseline Metrics	2 days	Wed 6/8/22	Thu 6/9/22	Joe Lombardi

Program Specific Policy	5 days	Thu 7/28/22	Thu 8/4/22	Joe Lombardi
Special Consideration Policy	2 days	Thu 8/4/22	Mon 8/8/22	Joe Lombardi
Define Future Enterprise IT Management Architecture	8.55 days	Sat 8/6/22	Thu 8/18/22	
Determine service level needs	1 day	Sat 8/6/22	Mon 8/8/22	Joe Lombardi
Develop the IT Management Business Model	1 day	Mon 8/8/22	Tue 8/9/22	Joe Lombardi
Develop the IT Management Process Models	1 day	Tue 8/9/22	Wed 8/10/22	Joe Lombardi
Develop integrated application/information/IT mgmt process architectures	3 days	Wed 8/10/22	Mon 8/15/22	
Business Management	1 day	Wed 8/10/22	Thu 8/11/22	Joe Lombardi
IT management	1 day	Thu 8/11/22	Fri 8/12/22	Joe Lombardi
Project Management	1 day	Fri 8/12/22	Mon 8/15/22	Joe Lombardi
Develop IT Management Architecture Component View	1 day	Mon 8/15/22	Tue 8/16/22	Joe Lombardi
Develop IT Management Software Portfolio Integration Matrix	1 day	Tue 8/16/22	Wed 8/17/22	Joe Lombardi
Develop IT Management Organization Component View	1 day		Thu 8/18/22	Joe Lombardi
Assess Current Projects and Analyze Gaps	5 days		Thu 8/25/22	
Assess current and planned projects	1 day	Thu 8/18/22	Fri 8/19/22	Joe Lombardi
Perform gap analysis	4 days	Fri 8/19/22	Thu 8/25/22	
Gap Analysis	4 days	Fri 8/19/22	Thu 8/25/22	Joe Lombardi
Identify Principles and Standards for:	5 days		Thu 8/25/22	
Appliaction Architecture layer-EA Integration	1 day	Thu 8/18/22	Fri 8/19/22	Joe Lombardi
Data Information Application Layer	1 day	Fri 8/19/22	Mon 8/22/22	Joe Lombardi
Technology Infrastruture Architecture-Components and Domains	1 day	Mon 8/22/22	Tue 8/23/22	Joe Lombardi

Security Architecture	1 day	Tue 8/23/22	Wed 8/24/22	Joe Lombardi
Emerging Busines Architecture	1 day	Wed 8/24/22	Thu 8/25/22	Joe Lombardi
Identify and Analyze Architectural & Technology Requirements	5 days	Thu 8/25/22	Thu 9/1/22	
Catalog, Architectural & Technology Requirements	2 days	Thu 8/25/22	Mon 8/29/22	Joe Lombardi
Final internal review and edit	1 day	Mon 8/29/22	Tue 8/30/22	Joe Lombardi
Submit Architectural Standards for Overall System Modernization to DEO for Review	2 days	Tue 8/30/22	Thu 9/1/22	Joe Lombardi
Identify geographical, operational, and functional boundaries	2 days	Tue 9/27/22	Thu 9/29/22	
Create new Sharepoint"As-Is" IT Inventory Asset Folder -Document current physical location of all existing resources	0 days	Tue 9/27/22	Tue 9/27/22	Joe Lombardi
Create new"To-Be" IT Inventory Assests Folder-Document expected (if known) physical location of all future resources	0.5 days	Tue 9/27/22	Wed 9/28/22	Joe Lombardi
Document the current operational (leadership/stakeholder responsibility) boundaries	0.5 days	Tue 9/27/22	Wed 9/28/22	Joe Lombardi
Document the functional (business, organization or portfolio) boundaries of the EA program	1.5 days	Wed 9/28/22	Thu 9/29/22	
Document each line of business	0.5 days	Wed 9/28/22	Wed 9/28/22	Joe Lombardi
Document the number of business process flows"As-Is" & "To Be" and how many Departments are supported?	0.5 days	Wed 9/28/22	Thu 9/29/22	Joe Lombardi
Document Number of Business Rules by flow	0.5 days	Thu 9/29/22	Thu 9/29/22	Joe Lombardi
Milestone: Geographical, operational and functional boundaries identified	0 days	Thu 9/29/22	Thu 9/29/22	Joe Lombardi
Identify Technological boundaries	1 day	Tue 9/27/22	Wed 9/28/22	
Document the current technical boundary of the program. This is usually the extent of responsibility within the network	1 day	Tue 9/27/22	Wed 9/28/22	

Business, technology, or policy changes mandating a boundary change? Ex: move on-premis systems to shared cloud infrastructure by higher leadership or policy mandate	1 day	Tue 9/27/22	Wed 9/28/22	Joe Lombardi
Range of IP addresses, specific FQN, the naming of servers, software systems or software services. (ie. The"HR system")	1 day	Tue 9/27/22	Wed 9/28/22	Joe Lombardi
Document any anticipated change in technology boundary	1 day	Tue 9/27/22	Wed 9/28/22	Joe Lombardi
Milestone - Technical Boundaries Established	0 days	Wed 9/28/22	Wed 9/28/22	Joe Lombardi
Critical Time frames and Influencers	1 day	Tue 9/27/22	Wed 9/28/22	
Identify and document any critical milestones or timelines that could effect the development of the architecture data repository or associated projects	1 day	Tue 9/27/22	Wed 9/28/22	Joe Lombardi
Budget or fiscal year start and stop dates. These dates may impact the sequence of architecture development activities based on budgeting (i.e use or lose monies)		Tue 9/27/22	Wed 9/28/22	Joe Lombardi
Milestone - Critical Time Frames and Influencers Identified	0 days	Wed 9/28/22	Wed 9/28/22	Joe Lombardi
Architecture resource, security/compliance, and schedule constraints	1 day	Wed 9/28/22	Thu 9/29/22	
Document organizational mandated security policies by reference	0 days	Wed 9/28/22	Wed 9/28/22	Joe Lombardi
Document organizational mandated business (functional or informational) compliance regulations or policies by reference	1 day	Wed 9/28/22	Thu 9/29/22	Joe Lombardi
Milestone - Security and compliance schedule contraints identified	0 days	Thu 9/29/22	Thu 9/29/22	Joe Lombardi
Deliverable 10 – Architectural Standards for Overall System Modernization (Redifined)	107.5 days	Mon 10/3/22	Thu 3/2/23	
Communication: Communicate how EA products will align with organization strategies, active plans, current operations and future endeavors across organizational boundaries	2 days	Mon 10/3/22	Wed 10/5/22	Joe Lombardi

Useability	0.5 days	Mon 10/17/22	Tue 10/18/22	Joe Lombardi
Logging and nonrepudiation	0.5 days	Tue 10/18/22	Tue 10/18/22	Joe Lombardi
The performance requirements must ensure the To-Be System can handle high-volume traffic from the following users:	0.5 days	Tue 10/18/22	Wed 10/19/22	Joe Lombardi
Conduct measurement prior to integration and post integration to ensure performance meets of exceeds expectations		Wed 10/19/22	Thu 10/20/22	Joe Lombardi
Define readiness criteria	1 day	Mon 11/7/22	Tue 11/8/22	Joe Lombardi
Evalute Infrastructure and Tools	1 day	Tue 11/8/22	Wed 11/9/22	Joe Lombardi
Define Servicing Strategy	1 day	Wed 11/9/22	Thu 11/10/22	Joe Lombardi
Determine application readiness	1 day	Thu 11/10/22	Fri 11/11/22	Joe Lombardi
Milestone - Iteration 1 Deliverable 8 complete	0 days	Fri 11/11/22	Fri 11/11/22	

Iteration 1 - Performance Benchmarks	5 days	Wed 10/26/22	Wed 11/2/22	
Identify Cloud Migration processes critical to success	1 day	Wed 10/26/22	Thu 10/27/22	Joe Lombardi
Map processes needing improvement	1 day	Thu 10/27/22	Fri 10/28/22	Joe Lombardi
Collect and Analyse Data	1 day	Fri 10/28/22	Mon 10/31/22	Joe Lombardi
Create individual plans to implement change	1 day	Mon 10/31/22	Tue 11/1/22	Joe Lombardi
Identify optimal performance benchmarks by which technology integration for the Cloud Migration project will be measured and accepted	1 day	Tue 11/1/22	Wed 11/2/22	Joe Lombardi
Milestone - Iteration 1 Deliverable 11 complete	0 days	Mon 11/7/22	Mon 11/7/22	
Iteration 1 - Consider and incorporate, as applicable, recommendations for the USDOL's Information Technology Modernization Pre-Implementation Planning Checklist	3 days	Wed 10/26/22	Mon 10/31/22	
Iteration 1 - Create System Design Document	11 days	Mon 11/7/22	Tue 11/22/22	
Provide the ability to understand System behaviors, workflows, and integration architectures	2 days	Mon 11/7/22	Wed 11/9/22	Joe Lombardi
Identify and define if each requirement is a core System capability, a simple configurable option, a complex configurable option, or requires custom development	2 days	Wed 11/9/22	Fri 11/11/22	Joe Lombardi
Identify how any new requirement might impact functionality in the current system	1 day	Fri 11/11/22	Mon 11/14/22	Joe Lombardi
Include a mapping of requirements.	1 day	Mon 11/14/22	Tue 11/15/22	Joe Lombardi
Include logical, technical-level architecture documentation.	1 day	Tue 11/15/22	Wed 11/16/22	Joe Lombardi
Include all software and hardware + version, specifications, and interoperability with other software and hardware products	1 day	Wed 11/16/22	Thu 11/17/22	Joe Lombardi

Include the future cloud- based operating environment required to support the System (if applicable)	1 day		Fri 11/18/22	Joe Lombardi
Include use cases that address the requirements	1 day	Fri 11/18/22	Mon 11/21/22	Joe Lombardi
Detail the integration platform to be supplied, including all configurable items and produce standard views for relevant composite models	1 day		Tue 11/22/22	Joe Lombardi
Milestone - Iteration 1 Deliverable 7 complete	0 days	1 -	Tue 11/22/22	
Sprint 2, Project 1-Cloud Migration	25 days		Wed 12/7/22	
Interation 2: Technical Functional and Non-Functional Req.	3.5 days	Wed 11/2/22	Mon 11/7/22	
Identify technical redesign impacts on DEO staff roles, resource levels, organizational	1 day		Thu 11/3/22	Joe Lombardi
Schedule Work Session to validate requirment updates	0.5 days		Thu 11/3/22	Joe Lombardi
Work Session to validate requirment updates	0.5 days	Thu 11/3/22	Fri 11/4/22	Joe Lombardi
Incorporate national best practices that have been successful in other state	1 day	Fri 11/4/22	Mon 11/7/22	Joe Lombardi
Update Service Now Repository	0.5 days		Mon 11/7/22	Joe Lombardi
Milestone - Iteration 2 Deliverable 6 complete	0 days	Mon 11/7/22	Mon 11/7/22	
Iteration 2 - Infrastructure Performance Requirements	6.5 days	_	Wed 11/16/22	
Re-evaluate Prioritized High Level Baseline Requirements by Domain	5 days		Mon 11/14/22	
Availability	0.5 days	Mon 11/7/22	Tue 11/8/22	Joe Lombardi

Iteration 3 - Create System Design Document	11 days	Tue 12/13/22	Wed 12/28/22	
Provide the ability to understand System behaviors, workflows, and integration architectures	2 days	Tue 12/13/22	Thu 12/15/22	Joe Lombardi
Identify and define if each requirement is a core System capability, a simple configurable option, a complex configurable option, or requires custom development	2 days	Thu 12/15/22	Mon 12/19/22	Joe Lombardi
Identify how any new requirement might impact functionality in the current system	1 day	Mon 12/19/22	Tue 12/20/22	Joe Lombardi
Include a mapping of requirements.	1 day	Tue 12/20/22	Wed 12/21/22	Joe Lombardi
Include logical, technical-level architecture documentation.	1 day	Wed 12/21/22	Thu 12/22/22	Joe Lombardi
Include all software and hardware + version, specifications, and interoperability with other software and hardware products	1 day	Thu 12/22/22	Fri 12/23/22	Joe Lombardi

Include the future cloud- based operating environment required to support the System (if applicable)	1 day	Fri 12/23/22	Mon 12/26/22	Joe Lombardi
Include any additional use cas toes that need address new or modified requirements	1 day	Mon 12/26/22	Tue 12/27/22	Joe Lombardi
Detail the integration platform to be supplied, including all configurable items and produce standard views for relevant composite models	1 day	Tue 12/27/22	Wed 12/28/22	Joe Lombardi
Milestone - Iteration 3 Deliverable 7 complete	0 days	Wed 12/28/22	Wed 12/28/22	
Sprint 4, Project 3-Cloud Contact Center as a Service (CCaaS) (Final)	25 days	Wed 12/14/22	Wed 1/18/23	
Interation 4: Technical Functional and Non-Functional Req.	3.5 days	Wed 12/14/22	Tue 12/20/22	
Identify technical redesign impacts on DEO staff roles, resource levels, organizational	1 day	Wed 12/14/22	Thu 12/15/22	Joe Lombardi
Schedule Work Session to validate requirment updates	0.5 days	Thu 12/15/22	Fri 12/16/22	Joe Lombardi
Work Session to validate requirment updates	0.5 days	Fri 12/16/22	Fri 12/16/22	Joe Lombardi
Incorporate national best practices that have been successful in other state	1 day	Fri 12/16/22	Mon 12/19/22	Joe Lombardi
Update Service Now Repository	0.5 days	Mon 12/19/22	Tue 12/20/22	Joe Lombardi
Milestone - 4th and final Iteration Deliverable 6 complete	0 days	Tue 12/20/22	Tue 12/20/22	
Iteration 4 - Infrastructure Performance Requirements	6.5 days	Tue 12/20/22	Wed 12/28/22	
Re-evaluate Prioritized High Level Baseline Requirements by Domain	5 days	Tue 12/20/22	Tue 12/27/22	
Availability	0.5 days	Tue 12/20/22	Tue 12/20/22	Joe Lombardi
Reliability	0.5 days	Tue 12/20/22	Wed 12/21/22	Joe Lombardi
Performance	0.5 days	Wed 12/21/22	Wed 12/21/22	Joe Lombardi
Response Times	0.5 days	Wed 12/21/22	Thu 12/22/22	Joe Lombardi
Security	0.5 days	Thu 12/22/22	Thu 12/22/22	Joe Lombardi

		1	1	1
Scaleability	0.5 days		Fri 12/23/22	Joe Lombardi
Useability	0.5 days	Fri 12/23/22	Fri 12/23/22	Joe Lombardi
Logging and nonrepudiation	0.5 days	Fri 12/23/22	Mon 12/26/22	Joe Lombardi
The performance requirements must ensure the To-Be System can handle high-volume traffic from the following users:	0.5 days	Mon 12/26/22	Mon 12/26/22	Joe Lombardi
Conduct measurement prior to integration and post integration to ensure performance meets of exceeds expectations			Tue 12/27/22	Joe Lombardi
Re-evaluate readiness criteria if necessary	0.5 days		Tue 12/27/22	Joe Lombardi
Re-Evalute Infrastructure and Tools	0.5 days	Tue 12/27/22	Tue 12/27/22	Joe Lombardi
Re- valuate Strategy if necessary	0.5 days		Wed 12/28/22	Joe Lombardi
Re-evaluate application readiness	0.5 days	Wed 12/28/22	Wed 12/28/22	Joe Lombardi
Milestone - 4th and final Iteration Deliverable 8 complete	0 days	Wed 12/28/22	Wed 12/28/22	Joe Lombardi
Iteration 4 - Performance Benchmarks	5 days		Wed 1/4/23	
Re-evaluate CCaaS processes critical to success	1 day		Thu 12/29/22	Joe Lombardi
Map processes needing improvement	1 day	-	Fri 12/30/22	Joe Lombardi
Collect and Analyse Data	1 day	Fri 12/30/22	Mon 1/2/23	Joe Lombardi
Re-evaluate individual plans to implement change	1 day	Mon 1/2/23	Tue 1/3/23	Joe Lombardi
Re-evaluate optimal performance benchmarks by which technology integration for the CCaaS project will be measured and accepted	1 day	Tue 1/3/23	Wed 1/4/23	Joe Lombardi
Milestone - 4th and final Iteration Deliverable 11 complete	0 days	Wed 1/4/23	Wed 1/4/23	
4th and final Iteration - Consider and incorporate, as applicable, recommendations for the USDOL's Information Technology Modernization Pre- Implementation Planning Checklist	1 day		Thu 12/29/22	Joe Lombardi

Iteration 4 - Create System Design Document	11 days	Tue 1/3/23	Wed 1/18/23	
Provide the ability to understand System behaviors, workflows, and integration architectures	2 days	Tue 1/3/23	-	Joe Lombardi
Identify and define if each requirement is a core System capability, a simple configurable option, a complex configurable option, or requires custom development	2 days	Thu 1/5/23	Mon 1/9/23	Joe Lombardi
Identify how any new requirement might impact functionality in the current system	1 day	Mon 1/9/23	Tue 1/10/23	Joe Lombardi
Include a mapping of requirements.	1 day	Tue 1/10/23	Wed 1/11/23	Joe Lombardi
Include logical, technical-level architecture documentation.	1 day	Wed 1/11/23	Thu 1/12/23	Joe Lombardi
Include all software and hardware + version, specifications, and interoperability with other software and hardware products	1 day	Thu 1/12/23	Fri 1/13/23	Joe Lombardi
Include the future cloud- based operating environment required to support the System (if applicable)	1 day	Fri 1/13/23	Mon 1/16/23	Joe Lombardi
Include any additional use cas toes that need address new or modified requirements	1 day	-	Tue 1/17/23	Joe Lombardi
Detail the integration platform to be supplied, including all configurable items and produce standard views for relevant composite models	1 day		Wed 1/18/23	Joe Lombardi
Milestone - 4th and final Iteration Deliverable 7 complete	0 days	Wed 1/18/23	Wed 1/18/23	Joe Lombardi
Sprint 1, Project 6-SOA and API Layer	34 days		Thu 12/8/22	
Interation 1: Technical Functional and Non-Functional Req.	5.5 days	Mon 11/7/22	Tue 11/15/22	
Identify technical redesign impacts on DEO staff roles, resource levels, organizational	3 days	Mon 11/7/22	Thu 11/10/22	Joe Lombardi
Identify and document any new requirment updates and add to strawman list	1 day	Thu 11/10/22	Fri 11/11/22	Joe Lombardi

Iteration 3 - Infrastructure Performance Requirements	6.5 days		Tue 1/10/23	
Re-evaluate Prioritized High Level Baseline Requirements by Domain	5 days		Mon 1/9/23	
Availability	0.5 days	Mon 1/2/23	Mon 1/2/23	Joe Lombardi
Reliability	0.5 days	Mon 1/2/23	Tue 1/3/23	Joe Lombardi
Performance	0.5 days	Tue 1/3/23	Tue 1/3/23	Joe Lombardi
Response Times	0.5 days	Tue 1/3/23	Wed 1/4/23	Joe Lombardi
Security	0.5 days	Wed 1/4/23	Wed 1/4/23	Joe Lombardi
Scaleability	0.5 days	Wed 1/4/23	Thu 1/5/23	Joe Lombardi
Useability	0.5 days	Thu 1/5/23	Thu 1/5/23	Joe Lombardi
Logging and nonrepudiation	0.5 days	Thu 1/5/23	Fri 1/6/23	Joe Lombardi
The performance requirements must ensure the To-Be System can handle high-volume traffic from the following users:	0.5 days	Fri 1/6/23	Fri 1/6/23	Joe Lombardi
Conduct measurement prior to integration and post integration to ensure performance meets of exceeds expectations		Fri 1/6/23	Mon 1/9/23	Joe Lombardi
Re-evaluate readiness criteria if necessary	0.5 days	Fri 1/6/23	Mon 1/9/23	Joe Lombardi
Re-Evalute Infrastructure and Tools	0.5 days	Mon 1/9/23	Mon 1/9/23	Joe Lombardi
Re- valuate Strategy if necessary	0.5 days	Mon 1/9/23	Tue 1/10/23	Joe Lombardi
Re-evaluate application readiness	0.5 days		Tue 1/10/23	Joe Lombardi
Milestone - Iteration 3 Deliverable 8 complete	0 days	Tue 1/10/23	Tue 1/10/23	
Iteration 3 - Performance Benchmarks	5 days		Tue 1/17/23	
Re-evaluate DW processes critical to success	1 day	Tue 1/10/23	Wed 1/11/23	Joe Lombardi

Map processes needing improvement	1 day	Wed 1/11/23	Thu 1/12/23	Joe Lombardi
Collect and Analyse Data	1 day	Thu 1/12/23		Joe Lombardi
Re-evaluate individual plans to implement change	1 day	Fri 1/13/23	Mon 1/16/23	Joe Lombardi
Re-evaluate optimal performance benchmarks by which technology integration for the DW project will be measured and accepted Milestone - Iteration 3	1 day	1/16/23	Tue 1/17/23 Tue	Joe Lombardi
Deliverable 11 complete	0 days	1/17/23	1/17/23	
Iteration 3 - Consider and incorporate, as applicable, recommendations for the USDOL's Information Technology Modernization Pre-Implementation Planning Checklist	1 day		Wed 1/11/23	Joe Lombardi
Iteration 3 - Create System	11 days	1 0 0	Wed	
Design Document	II uays	1/17/23	2/1/23	
Provide the ability to understand System behaviors, workflows, and integration architectures	2 days		Thu 1/19/23	Joe Lombardi
Identify and define if each requirement is a core System capability, a simple configurable option, a complex configurable option, or requires custom development	2 days	Thu 1/19/23	Mon 1/23/23	Joe Lombardi
Identify how any new requirement might impact functionality in the current system	1 day		Tue 1/24/23	Joe Lombardi
Include a mapping of requirements.	1 day	Tue 1/24/23	Wed 1/25/23	Joe Lombardi
Include logical, technical-level architecture documentation.	1 day	Wed 1/25/23	Thu 1/26/23	Joe Lombardi
Include all software and hardware + version, specifications, and interoperability with other software and hardware products	1 day	Thu 1/26/23	Fri 1/27/23	Joe Lombardi
Include the future cloud- based operating environment required to support the System (if applicable)	1 day	Fri 1/27/23	Mon 1/30/23	Joe Lombardi
Include any additional use cas toes that need address new or modified requirements	1 day		Tue 1/31/23	Joe Lombardi

Detail the integration platform to be supplied, including all configurable items and produce standard views for relevant composite models	1 day	Tue 1/31/23	Wed 2/1/23	Joe Lombardi
Milestone - Iteration 3 Deliverable 7 complete	0 days		Wed 2/1/23	
Sprint 4, Project 12-Data Warehouse (DW) (Final)	26 days		Tue 2/14/23	
Interation 4: Technical Functional and Non-Functional Req.	3.5 days		Thu 1/12/23	
Identify technical redesign impacts on DEO staff roles, resource levels, organizational	1 day		Tue 1/10/23	Joe Lombardi
Schedule Work Session to validate requirment updates	0.5 days	Tue 1/10/23	Tue 1/10/23	Joe Lombardi
Work Session to validate requirment updates	0.5 days	Tue 1/10/23	Wed 1/11/23	Joe Lombardi
Incorporate national best practices that have been successful in other state	1 day		Thu 1/12/23	Joe Lombardi
Update Service Now Repository	0.5 days	Thu 1/12/23	Thu 1/12/23	Joe Lombardi
Milestone - 4th and final Iteration Deliverable 6 complete	0 days		Thu 1/12/23	
Iteration 4 - Infrastructure Performance Requirements	6.5 days	Thu 1/12/23	Mon 1/23/23	
Re-evaluate Prioritized High Level Baseline Requirements by Domain	5 days		Thu 1/19/23	
Availability	0.5 days	Thu 1/12/23	Fri 1/13/23	Joe Lombardi
Reliability	0.5 days	Fri 1/13/23	Fri 1/13/23	Joe Lombardi
Performance	0.5 days	Fri 1/13/23	Mon 1/16/23	Joe Lombardi
Response Times	0.5 days	Mon 1/16/23	Mon 1/16/23	Joe Lombardi
Security	0.5 days	Mon 1/16/23	Tue 1/17/23	Joe Lombardi
Scaleability	0.5 days	Tue 1/17/23	Tue 1/17/23	Joe Lombardi
Useability	0.5 days	Tue 1/17/23	Wed 1/18/23	Joe Lombardi
Logging and nonrepudiation	0.5 days	Wed 1/18/23	Wed 1/18/23	Joe Lombardi

The performance requirements must ensure the To-Be System can handle high-volume traffic from the following users:	0.5 days		Thu 1/19/23	Joe Lombardi
Conduct measurement prior to integration and post integration to ensure performance meets of exceeds expectations		-	Thu 1/19/23	Joe Lombardi
Re-evaluate readiness criteria if necessary	0.5 days	Thu 1/19/23	Thu 1/19/23	Joe Lombardi
Re-Evalute Infrastructure and Tools	0.5 days	Thu 1/19/23	Fri 1/20/23	Joe Lombardi
Re- valuate Strategy if necessary	0.5 days	Fri 1/20/23	Fri 1/20/23	Joe Lombardi
Re-evaluate application readiness	0.5 days	Fri 1/20/23	Mon 1/23/23	Joe Lombardi
Milestone - 4th and final Iteration Deliverable 8 complete	0 days	Mon 1/23/23	Mon 1/23/23	
Iteration 4 - Performance Benchmarks	5 days	-	Mon 1/30/23	
Re-evaluate DW processes critical to success	1 day		Tue 1/24/23	Joe Lombardi
Map processes needing improvement	1 day	Tue 1/24/23	Wed 1/25/23	Joe Lombardi
Collect and Analyse Data	1 day		Thu 1/26/23	Joe Lombardi
Re-evaluate individual plans to implement change	1 day	Thu 1/26/23	Fri 1/27/23	Joe Lombardi
Re-evaluate optimal performance benchmarks by which technology integration for the DW project will be measured and accepted	1 day	Fri 1/27/23	Mon 1/30/23	Joe Lombardi
Milestone - 4th and final Iteration Deliverable 11 complete	0 days	Mon 1/30/23	Mon 1/30/23	
4th and final Iteration - Consider and incorporate, as applicable, recommendations for the USDOL's Information Technology Modernization Pre- Implementation Planning Checklist	1 day	Mon 1/23/23	Tue 1/24/23	Joe Lombardi
Iteration 4 - Create System Design Document	11 days		Tue 2/14/23	
Provide the ability to understand System behaviors, workflows, and integration architectures	2 days	Mon 1/30/23	Wed 2/1/23	Joe Lombardi

Identify and define if each requirement is a core System capability, a simple configurable option, a complex configurable option, or requires custom development	2 days	Wed 2/1/23	Fri 2/3/23	Joe Lombardi
Identify how any new requirement might impact functionality in the current system	1 day	Fri 2/3/23	Mon 2/6/23	Joe Lombardi
Include a mapping of requirements.	1 day	Mon 2/6/23	Tue 2/7/23	Joe Lombardi
Include logical, technical-level architecture documentation.	1 day	Tue 2/7/23	Wed 2/8/23	Joe Lombardi
Include all software and hardware + version, specifications, and interoperability with other software and hardware products	1 day	Wed 2/8/23	Thu 2/9/23	Joe Lombardi
Include the future cloud- based operating environment required to support the System (if applicable)	1 day	Thu 2/9/23	Fri 2/10/23	Joe Lombardi
Include any additional use cas toes that need address new or modified requirements	1 day	Fri 2/10/23	Mon 2/13/23	Joe Lombardi
Detail the integration platform to be supplied, including all configurable items and produce standard views for relevant composite models	1 day		Tue 2/14/23	Joe Lombardi
Milestone - 4th and final Iteration Deliverable 7 complete	0 days		Tue 2/14/23	
Sprint 1, Project 15-Archival and Purge (A&P)	31 days	Wed	Thu 1/26/23	
Interation 1: Technical Functional and Non-Functional Req.	5.5 days		Wed 12/21/22	
Identify technical redesign impacts on DEO staff roles, resource levels, organizational	3 days	Wed 12/14/22	Mon 12/19/22	Joe Lombardi
Identify and document any new requirment updates and add to strawman list	1 day	Mon 12/19/22	Tue 12/20/22	Joe Lombardi
Incorporate national best practices that have been successful in other state	1 day	Tue 12/20/22	Wed 12/21/22	Joe Lombardi
Update Service Now Repository	0.5 days	Wed 12/21/22	Wed 12/21/22	Joe Lombardi

Update Service Now Repository	0.5 days	Tue 1/17/23	Wed 1/18/23	Joe Lombardi
Milestone - 4th and final Iteration Deliverable 6 complete	0 days		Wed 1/18/23	
Iteration 4 - Infrastructure Performance Requirements	6.5 days		Thu 1/26/23	
Re-evaluate Prioritized High Level Baseline Requirements by Domain	5 days		Wed 1/25/23	
Availability	0.5 days	Wed 1/18/23	Wed	Joe Lombardi
Reliability	0.5 days		Thu 1/19/23	Joe Lombardi
Performance	0.5 days		Thu 1/19/23	Joe Lombardi
Response Times	0.5 days	Thu 1/19/23	Fri 1/20/23	Joe Lombardi
Security	0.5 days	Fri 1/20/23	Fri 1/20/23	Joe Lombardi
Scaleability	0.5 days	Fri 1/20/23	Mon 1/23/23	Joe Lombardi
Useability	0.5 days	Mon 1/23/23	Mon 1/23/23	Joe Lombardi
Logging and nonrepudiation	0.5 days	Mon 1/23/23	Tue 1/24/23	Joe Lombardi
The performance	0.5 days	Tue	Tue	Joe Lombardi

can handle high-volume traffic from the following users:				
Conduct measurement prior to integration and post integration to ensure performance meets of exceeds expectations		Tue 1/24/23	Wed 1/25/23	Joe Lombardi
Re-evaluate readiness criteria if necessary	0.5 days	Tue 1/24/23	Wed 1/25/23	Joe Lombardi
Re-Evalute Infrastructure and Tools	0.5 days	Wed 1/25/23	Wed 1/25/23	Joe Lombardi
Re- valuate Strategy if necessary	0.5 days	Wed 1/25/23	Thu 1/26/23	Joe Lombardi
Re-evaluate application readiness	0.5 days	Thu 1/26/23	Thu 1/26/23	Joe Lombardi
Milestone - 4th and final Iteration Deliverable 8 complete	0 days	Thu 1/26/23	Thu 1/26/23	
Iteration 4 - Performance Benchmarks	5 days	Thu 1/26/23	Thu 2/2/23	
Re-evaluate A&P processes critical to success	1 day	Thu 1/26/23	Fri 1/27/23	Joe Lombardi
Map processes needing improvement	1 day	Fri 1/27/23	Mon 1/30/23	Joe Lombardi
Collect and Analyse Data	1 day	Mon 1/30/23	Tue 1/31/23	Joe Lombardi
Re-evaluate individual plans to implement change	1 day	Tue 1/31/23	Wed 2/1/23	Joe Lombardi
Re-evaluate optimal performance benchmarks by which technology integration for the A&P project will be measured and accepted	1 day	Wed 2/1/23	Thu 2/2/23	Joe Lombardi
Milestone - 4th and final Iteration Deliverable 11 complete	0 days	Thu 2/2/23	Thu 2/2/23	
4th and final Iteration - Consider and incorporate, as applicable, recommendations for the USDOL's Information Technology Modernization Pre- Implementation Planning Checklist	1 day	Thu 1/26/23	Fri 1/27/23	Joe Lombardi
Iteration 4 - Create System Design Document	11 days	Thu 2/2/23	Fri 2/17/23	
Provide the ability to understand System behaviors, workflows, and integration architectures	2 days	Thu 2/2/23	Mon 2/6/23	Joe Lombardi
Identify and define if each requirement is a core System capability, a simple configurable option, a complex	2 days	Mon 2/6/23	Wed 2/8/23	Joe Lombardi

configurable option, or requires custom				
development				
Identify how any new	1 day	Wed 2/8/23	Thu 2/9/23	Joe Lombardi
Include a mapping of requirements.	1 day	Thu 2/9/23	Fri 2/10/23	Joe Lombardi
Include logical, technical-level architecture documentation.	1 day	Fri 2/10/23	Mon 2/13/23	Joe Lombardi
Include all software and hardware + version, specifications, and interoperability with other software and hardware products	1 day		Tue 2/14/23	Joe Lombardi
support the System (if applicable)	1 day		Wed 2/15/23	Joe Lombardi
Include any additional use cas toes that need address new or modified requirements	1 day		Thu 2/16/23	Joe Lombardi
Detail the integration platform to be supplied, including all configurable items and produce standard views for relevant composite models	1 day	Thu 2/16/23	Fri 2/17/23	Joe Lombardi
Milestone - 4th and final Iteration Deliverable 7 complete	0 days	Fri 2/17/23	Fri 2/17/23	
Sprint 1, Project 14-Master Data Management and Interoperability Project	71 days	Wed 10/26/22	Thu 2/2/23	
Interation 1: Technical Functional and Non-Functional Req.	5.5 days	Wed 12/21/22	Thu 12/29/22	
Identify technical redesign impacts on DEO staff roles, resource levels, organizational	3 days	Wed 12/21/22	Mon 12/26/22	Joe Lombardi
Identify and document any new requirment updates and add to strawman list	1 day	Mon 12/26/22	Tue 12/27/22	Joe Lombardi
Incorporate national best practices that have been successful in other state	1 day	Tue 12/27/22	Wed 12/28/22	Joe Lombardi
Update Service Now Repository	0.5 days	Wed 12/28/22	Thu 12/29/22	Joe Lombardi
Milestone - Iteration 1 Deliverable 6 complete	0 days	Thu 12/29/22	Thu 12/29/22	
Iteration 1 - Infrastructure Performance Requirements	8.5 days		Tue 1/10/23	

Prioritize High Level Baseline Requirements by Domain	5.5 days	Thu 12/29/22	Thu 1/5/23	
Availability	0.5 days	Thu 12/29/22	Thu 12/29/22	Joe Lombardi

Milestone - Iteration 1				
Deliverable 6 complete	0 days	Thu 1/5/23	Thu 1/5/23	
Iteration 1 - Infrastructure Performance Requirements	8.5 days	Thu 1/5/23	Wed 1/18/23	
Prioritize High Level Baseline Requirements by Domain	5.5 days	Thu 1/5/23	Fri 1/13/23	
Availability	0.5 days	Thu 1/5/23	Fri 1/6/23	Joe Lombardi
Reliability	0.5 days	Fri 1/6/23	Fri 1/6/23	Joe Lombardi
Performance	0.5 days	Fri 1/6/23	Mon 1/9/23	Joe Lombardi
Response Times	0.5 days		Mon 1/9/23	Joe Lombardi
Security	0.5 days	_	Tue 1/10/23	Joe Lombardi
Scaleability	0.5 days		Tue 1/10/23	Joe Lombardi
Useability	0.5 days		Wed 1/11/23	Joe Lombardi
Logging and nonrepudiation	0.5 days		Wed 1/11/23	Joe Lombardi
The performance requirements must ensure the To-Be System can handle high-volume traffic from the following users:	0.5 days		Thu 1/12/23	Joe Lombardi
Conduct measurement prior to integration and post integration to ensure performance meets of exceeds expectations		Thu 1/12/23	Fri 1/13/23	Joe Lombardi
Define readiness criteria	1 day	Thu 1/12/23	Fri 1/13/23	Joe Lombardi
Evalute Infrastructure and Tools	1 day	Fri 1/13/23	Mon 1/16/23	Joe Lombardi
Define Servicing Strategy	1 day		Tue 1/17/23	Joe Lombardi
Determine application readiness	1 day		Wed 1/18/23	Joe Lombardi
Milestone - Iteration 1 Deliverable 8 complete	1 day		Thu 1/19/23	
Iteration 1 - Performance Benchmarks	5 days		Thu 1/26/23	
Identify IMA processes critical to success	1 day	Thu 1/19/23	Fri 1/20/23	Joe Lombardi
Map processes needing improvement	1 day	Fri 1/20/23	Mon 1/23/23	Joe Lombardi

Collect and Analyse Data	1 day	Mon 1/23/23	Tue 1/24/23	Joe Lombardi
Create individual plans to implement change	1 day	Tue 1/24/23	Wed 1/25/23	Joe Lombardi
Identify optimal performance benchmarks by which technology integration for the IMA project will be measured and accepted	1 day	Wed 1/25/23	Thu 1/26/23	Joe Lombardi
Milestone - Iteration 1 Deliverable 11 complete	0 days	Thu 1/26/23	Thu 1/26/23	
Iteration 1 - Consider and incorporate, as applicable, recommendations for the USDOL's Information Technology Modernization Pre-Implementation Planning Checklist	3 days	Thu 1/19/23	Tue 1/24/23	Joe Lombardi
Iteration 1 - Create System Design Document	11 days	Thu 1/26/23	Fri 2/10/23	
Provide the ability to understand System behaviors, workflows, and integration architectures	2 days	Thu 1/26/23	Mon 1/30/23	Joe Lombardi
Identify and define if each requirement is a core System capability, a simple configurable option, a complex configurable option, or requires custom development	2 days	Mon 1/30/23	Wed 2/1/23	Joe Lombardi
Identify how any new requirement might impact functionality in the current system	1 day	Wed 2/1/23	Thu 2/2/23	Joe Lombardi
Include a mapping of requirements.	1 day	Thu 2/2/23	Fri 2/3/23	Joe Lombardi
Include logical, technical-level architecture documentation.	1 day	Fri 2/3/23	Mon 2/6/23	Joe Lombardi
Include all software and hardware + version, specifications, and interoperability with other software and hardware products	1 day	Mon 2/6/23	Tue 2/7/23	Joe Lombardi
Include the future cloud- based operating environment required to support the System (if applicable)	1 day	Tue 2/7/23	Wed 2/8/23	Joe Lombardi
Include use cases that address the requirements	1 day	Wed 2/8/23	Thu 2/9/23	Joe Lombardi
Detail the integration platform to be supplied, including all	1 day	Thu 2/9/23	Fri 2/10/23	Joe Lombardi

			1	
configurable items and produce standard views for relevant composite models				
Milestone - Iteration 1 Deliverable 7 complete	0 days	Fri 2/10/23	Fri 2/10/23	
Sprint 2, Project 17-Identity Management and Access (IMA) Control Project	26 days	Fri 12/16/22	Mon 1/23/23	i
Interation 2: Technical Functional and Non-Functional Req.	3.5 days	Fri 12/16/22	Thu 12/22/22	
Identify technical redesign impacts on DEO staff roles, resource levels, organizational	1 day	Fri 12/16/22	Mon 12/19/22	Joe Lombardi
Schedule Work Session to validate requirment updates	0.5 days	Mon 12/19/22	Tue 12/20/22	Joe Lombardi
Work Session to validate requirment updates	0.5 days	Tue 12/20/22	Tue 12/20/22	Joe Lombardi
Incorporate national best practices that have been successful in other state	1 day	Tue 12/20/22	Wed 12/21/22	Joe Lombardi
Update Service Now Repository	0.5 days	Wed 12/21/22	Thu 12/22/22	Joe Lombardi
Milestone - Iteration 2 Deliverable 6 complete	0 days	Thu 12/22/22	Thu 12/22/22	
Iteration 2 - Infrastructure Performance Requirements	6.5 days	Thu 12/22/22	Fri 12/30/22	
Re-evaluate Prioritized High Level Baseline Requirements by Domain	5 days	Thu 12/22/22	Thu 12/29/22	
Availability	0.5 days	Thu 12/22/22	Thu 12/22/22	Joe Lombardi
Reliability	0.5 days	Thu 12/22/22	Fri 12/23/22	Joe Lombardi
Performance	0.5 days	Fri 12/23/22	Fri 12/23/22	Joe Lombardi
Response Times	0.5 days	Fri 12/23/22	Mon 12/26/22	Joe Lombardi
Security	0.5 days	Mon 12/26/22	Mon 12/26/22	Joe Lombardi
Scaleability	0.5 days	Mon 12/26/22	Tue 12/27/22	Joe Lombardi
Useability	0.5 days	Tue 12/27/22	Tue 12/27/22	Joe Lombardi
Logging and nonrepudiation	0.5 days	Tue 12/27/22	Wed 12/28/22	Joe Lombardi

The performance requirements must ensure the To-Be System can handle high-volume traffic from the following users:	0.5 days		Wed 12/28/22	Joe Lombardi
Conduct measurement prior to integration and post integration to ensure performance meets of exceeds expectations			Thu 12/29/22	Joe Lombardi
Re-evaluate readiness criteria if necessary	0.5 days		Thu 12/29/22	Joe Lombardi
Re-Evalute Infrastructure and Tools	0.5 days		Thu 12/29/22	Joe Lombardi
Re- valuate Strategy if necessary	0.5 days		Fri 12/30/22	Joe Lombardi
Re-evaluate application readiness	0.5 days	Fri 12/30/22	Fri 12/30/22	Joe Lombardi
Milestone - Iteration 2 Deliverable 8 complete	0 days		Fri 12/30/22	
Iteration 2 - Performance Benchmarks	5 days	Fri 12/30/22	Fri 1/6/23	
Re-evaluate IMA processes critical to success	1 day		Mon 1/2/23	Joe Lombardi
Map processes needing improvement	1 day	Mon 1/2/23	Tue 1/3/23	Joe Lombardi
Collect and Analyse Data	1 day	Tue 1/3/23	Wed 1/4/23	Joe Lombardi
Re-evaluate individual plans to implement change	1 day	Wed 1/4/23	Thu 1/5/23	Joe Lombardi
Re-evaluate optimal performance benchmarks by which technology integration for the IMA project will be measured and accepted	1 day	Thu 1/5/23	Fri 1/6/23	Joe Lombardi
Milestone - Iteration 2 Deliverable 11 complete	0 days	Fri 1/6/23	Fri 1/6/23	
Iteration 2 - Consider and incorporate, as applicable, recommendations for the USDOL's Information Technology Modernization Pre-Implementation Planning Checklist	2 days	Fri 12/30/22	Tue 1/3/23	Joe Lombardi
Iteration 2 - Create System Design Document	11 days	Fri 1/6/23	Mon 1/23/23	
Provide the ability to understand System behaviors, workflows, and integration architectures	2 days	Fri 1/6/23	Tue	Joe Lombardi

SECTION 1 — OVERALL PROJECT PLAN

I. Project Charter

The Incremental Customer Experience/User Experience (CX/UX) Mobile-Responsive Transformation project will provide a mobile-responsive user interface for employers and Reemployment Assistance claimants that includes plain-language translation across all external-facing screens. The CX/UX project will help the Department achieve the following goals:

- 1. Improve access and equity in the delivery of Reemployment Assistance benefits.
- 2. Improve information flow with claimants, employers, and TPAs to make quicker decisions.
- 3. Leverage new technologies to improve claimants, employers, and TPAs' overall experience with the Reemployment Assistance program, including reducing the amount of time it takes to file a claim for benefits.
- 4. Enhance System usability including accessibility.
- 5. Reduce maintenance and support time and costs.

A. Scope Statement

In Scope

To implement a stand-alone Commercial-Off-The-Shelf (COTS) solution for the external-facing CX/UX screens of the System. The solution will interface with the System for Unemployment Insurance (UI) data and retrieve/submit data necessary for UI external users to perform actions. The solution will support data intake from customers even if the System is down and will sync up later once the System is available.

Out of Scope

Any work associated with modifications to staff screens or back-office workflows.

B. Project Objectives and Business Benefits

Project Objective	Business Benefit
An agile and incremental	1. Ensuring that business process improvements
approach will be utilized to	are documented prior to determining functional
ensure that business process	system change needs.
optimization (BPO) is	2. Ensuring that business requirements align with
incorporated into the	functional and CX/UX requirements before
transformation activities for each	initiating transformation.
of the four functional modules	3. Ensuring that appropriate work and resource
within scope of the CX/UX	estimates are determined prior to submitting an
project, which include Initial	updated IV-B.
Claims, Continued Claims, Core	4. Improved stability, reliability, and
Claims and Claim Status,	maintainability of the System.
Employers, and Third-Party	5. Improved Reemployment Assistance service to
Administrators.	Florida Citizens.

6. Predictable maintenance cost for the application.
application.

C. Critical Success Factors

- A suitable COTS solution can be procured which meets the requirements and constraints of the CX/UX Project.
- A contractor can complete the project by 6/30/2023.

D. Key Dates

Key Dates	Importance and Relevance to the Project	Status
(anticipated)		
10/2022	RFI Released	Completed
11/2022	RFQ Released	Completed
11/18/2022	Complete Connect Screen Captures for external screens	Completed
12/2/2022	Complete mapping of external Connect screen elements	In Progress
	to functional specifications.	
12/2/2022	Completion of documenting all external Connect screen	In Progress
	hyperlinks, help pages, and popups.	
12/30/2022	Completion of mapping all external Connect screen	In Progress
	data fields to the Connect database.	
1/2023	Vendor Award	
2/2023	Project Kick-off	

E. Major Deliverables

Major Deliverable	Deliverable Description	Deliverable Status
Implementation of	Vendor will design, develop, and

H. Significant Project Assumptions and Constraints

Project Assumptions

- The project will have access to the appropriate state management, staff, and related Program stakeholders (internal and external) and other resources as required and as needed without delay.
- A suitable COTS solution can be procured which meets the requirements of the CX/UX project.
- A contractor can complete the project by 6/30/2023.

Project Constraints

- End date of 6/30/2023 cannot be moved.
- Must be a COTS product.

II. Work Breakdown Structure

The WBS will be provided once a solution is procured, and a schedule is approved.

III. Resource Loaded Project Schedule

The CX/UX project is dependent on the procurement of a solution which meets the requirements and constraints of DEO. The System and Software Integrator is working with DEO to facilitate the procurement. A project schedule will be updated once the procurement is completed, and a contract awarded with the selected contractor.

IV. Project Spending Plan

This project is expected to be fixed priced based on contracted deliverable-based invoice events.

V. Project Organization and Methodology Project Organizational Chart

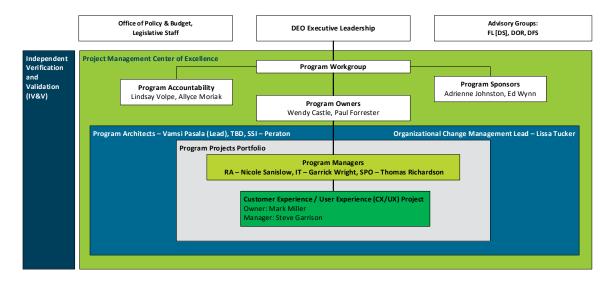

Figure 1: Project Organization Chart

Project Management Methodology

DEO will use a project management methodology in compliance with project management standard rule 60GG-2 F.A.C., project requirements and department experience with similar engagements. Predictability, accountability, and flexibility are key elements that must be embraced by the overall project management approach to ensure DEO's satisfaction and project success. Successful project management must include active and visible leadership, multiple controls and checkpoints with measurable outcomes, and engagement with all stakeholders. DEO believes strong project management is critical throughout the life of any successful project.

For this project, DEO's project management will include the following specific elements, in addition to our standard methodology:

- The project management team will advise leadership on areas of concern and will propose solutions to mitigate risk.
- Vendors will respond to inquiries or requests from DEO within one business day from receipt.
- In the case where additional time is needed for a task, vendors will provide an estimate, which must be approved by the DEO Project Manager.
- At the end of the contract, vendors will provide final copies of all reports in electronic format for archive purposes.

DEO's project management approach will utilize the technical skills, tools, and techniques needed to succeed, as well as the dedication to accountability, resource commitment, and organizational focus. Project success will be the result of active communication among all

individuals, understanding everyone's role in the project, and clear delineation of responsibilities.

DEO believes successful project management hinges on the following:

- Clearly established project goals and requirements
- Ongoing assessment of quality against established standards
- Constant measurement of success against established deliverables and milestones
- Personal presence and commitment of key project leadership
- Proactive identification and communication of risks and issues

Weekly Status Reporting

Vendors will be required to submit status reports throughout the project at several levels. The primary source of status information is the weekly written status report, which will communicate at minimum, the following information.

- **Project Status.** This section depicts the project status at a summary level using a red/yellow/green method supported by two to three essential questions that are answered to determine summary status. The red/yellow/green method is not meant to be a grading system but instead it is a way to easily identify the areas of the project that need the most attention to make the project successful.
- Overview of Project Progress. This section describes significant accomplishments achieved in the reporting period.
- Overall Status. This section provides a high-level overview of whether the project is on schedule, on budget, and on scope. A yellow or red status should be explained here in detail.
- Project Milestones, Deliverables, and Latest Tasks. This section contains the major deliverables of the project, their planned and actual completion dates, and their status.
- Risks, Action Items, Issues, and Decisions. This section will link to the project risk, action item, issue, and decision tracking tool. The project tracking tool contains all items tracked during the project.

Project Tracking

This section describes the "RAID" methodology for tracking risks, action items, issues, and decisions. DEO will follow a centralized approach that minimizes miscommunication or misinformation among project stakeholders. The Department will diligently maintain a project tracking log for each project, and a master log for the System Modernization project overall, a Microsoft Excel workbook with multiple tabs intended to capture the details and the latest attributes of items tracked by Project Managers.

VI. Project Risk Management Plan

Risk & Complexity Assessment

The Risk & Complexity Assessment will be completed at the end of every Phase in the Project lifecycle. The Project Manager is responsible to complete this assessment with the assistance of project team members.

Risk & Complexity Assessments	Category
Pre-Charter Risk & Complexity Category	3
Initiation Gate Risk & Complexity Category	3
Planning Gate Risk & Complexity Category	2
Event Driven Risk & Complexity Category	

Project Risk Management

This project will follow the risk management processes outlined in the RA Modernization Program Risk Management Plan. The master copy of this document is available in the RA Modernization Program Library in the Central Repository.

The risk management process helps the project team anticipate and respond to emerging risks throughout the duration of the project. The risk management process occurs throughout all phases of the project, from planning through execution and closeout. Project risks are logged and tracked in ServiceNow.

VII. Project Action Items

Action items are unplanned tasks that occur during a project that are too small to be added to the schedule. These items must be within the scope of the project and are often tasks that support scheduled tasks, issue resolution, risk management, or some other aspect of the project. The action item log is created and maintained in ServiceNow.

Action items will be managed in the following manner:

- During status meetings, any stakeholder can raise an action item for discussion.
- The Project team will discuss the action item and determine if it warrants being monitored in the action item log.
- The project manager will enter the item in the log.
- The team will set the priority for the action item (high/medium/low), assign an action item owner, and set a planned completion date.
- At each subsequent status meeting, the action item(s) will be reviewed until they can be closed.

VIII. Project Issue Management

This project will follow the issue management processes outlined in the RA Modernization Program Issue Management Plan. The master copy of this document is available in the RA Modernization Program Library in the Central Repository.

An issue is an immediate problem that needs resolution. Acknowledging and addressing issues quickly ensures that they do not impact the scope of the project. Project issues are logged and tracked in ServiceNow.

IX. Project Decisions

Decisions are leadership answers to questions that arise during the project. The decision log is created and maintained as part of the project tracking log. Decisions are tracked in ServiceNow.

Decisions will be managed in the following manner:

- During status meetings, any stakeholder can raise a question that requires a decision.
- If the team determines a decision needs to be made, the project manager will enter it in the decision log.
- The team will discuss the impact to the project, assign a decision maker, and set a date for when the decision is needed.
- At each subsequent status meeting, the decision item(s) will be reviewed until they can be closed.

X. Project Change Management

This project will follow the change processes outlined in the RA Modernization Program Change Management Plan. The master copy of this document is available in the RA Modernization Program Library in the Central Repository.

The RA Modernization Change Management Plan, defines the approach and provides the processes for initiating, defining, researching, evaluating, reviewing, prioritizing, managing cost, approving or rejecting the change requests (CRs), and communicating the status of the change that may affect the success of the BPO project.

XI. Project Schedule Management

The project schedule for this project will be stored in the Central Repository 11 – Incremental CX-UX Project Deliverables folder. The project schedule will also be uploaded into ServiceNow.

Schedule Maintenance

The project schedule maintenance is an on-going activity that tracks the work performed, the timeframes for when the work has been or will be completed and progress against the baseline work estimates and timelines. To effectively track the program progress, the project schedule is kept current, and reflects all work that needs to be performed, in accordance with the RA Modernization Program Schedule Management Plan.

If a change to the project schedule or scope is needed, the Project Manager may pursue a change request as described in the RA Modernization Change Management Plan.

XII. Project Cost Management

A final budget will be completed upon successful procurement of a vendor for software and to perform integration services. The costs will be deliverable based invoice events. The cost plan will be managed in ServiceNow.

XIII. Project Organizational Change Management (OCM)

The program OCM lead will work with the project manager and contracted vendor to implement organizational change management based on the identified product and its impact(s) to the organization. An initial assessment was completed but the team cannot complete a full analysis without knowing the product and its potential impacts. The expectation is to have minimal organizational change due to the project implementing externally facing screens.

OPERATIONAL WORK PLAN FOR REPORTING

FLORIDA DEPARTMENT OF ECONOMIC OPPORTUNITY DIVISION OF INFORMATION TECHNOLOGY AND DIVISION OF WORKFORCE SERVICES

FISCAL YEAR 2022-2023 QUARTER 2

PREPARED ON 12/05/2022

SECTION 1 — OVERALL PROJECT PLAN

I. Project Charter

A. Scope Statement

The Information Technology Data Architecture Team (RAD), in collaboration with the Reemployment Assistance (RA) program, is transitioning 39 active U.S. Department of Labor (USDOL) Education and Training (ETA) Reports from the Reemployment Assistance Claims and Benefits Information System (System) Application Database to the Department of Economic Opportunity (Department) Data Warehouse.

Project scope also includes the running of back/missing reports that have not yet been submitted but are required by USDOL, and the Sample Population files used by USDOL to validate some reports.

Project includes business validation of all reports to be complete by 12/31/2022.

Completing this project benefits the Division of Information Technology and the Reemployment Assistance (RA) program. It:

- 1. Facilitates DEO's Cloud Initiative Program which moves the System Application to the cloud
- 2. Removes report processing from a transactional system designed to support claimants (System), to an analytical system designed for efficient staff Unemployment Compensation analysis and reporting (Data Warehouse).
- 3. Puts DEO in compliance with USDOL; and
- 4. Develops all the required reports that correlate to federal programs launched in during the pandemic, some of which affect the RA program's funding.

B. Project Objectives and Business Benefits

Project Objective	Business Benefit
Facilitates the Department's Cloud	Achieves State of Florida requirement for
Initiative Program which moves the	state agencies to move applications to the
System Application to the cloud	cloud.
Frees up resources in System to better	Reports can be run timely and/or as
serve claimants by removing report	needed without interrupting the
processing to a more appropriately	availability or performance of the System.
designed source	
Puts the Department in compliance	Enables the Department to provide
with USDOL by submitting missing	USDOL supporting information for
pandemic reports that may affect	administrative costs incurred while
funding.	providing services to Florida claimants
	and employers.

C. Critical Success Factors

- 39 ETA reports published to RA via the Data Warehouse by 12/31/2022 including running reports according to the regularly scheduled weekly, monthly, quarterly, or annual schedule.
- All missing pandemic reports provided to RA for validation and issues are corrected as requested by 12/31/2022.
- 39 reports submitted to USDOL from data reported to RA in the Data Warehouse.
- Related USDOL report batches are stopped and retired from the System.
- Reports no longer required by USDOL are retired from the System.
- 15 data populations generated from the Data Warehouse are retired from the System.

D. Key Dates

Key Date	Importance and Relevance to the Project
04/30/2021	Project Start – Approval received after Proof of Concept
06/10/2021	RA Reports Enhancement Kick-Off Meeting – Identified: 1. IT & RA PM Assignment 2. Roles and Responsibilities Assignments – Identification of Project Sponsors, Project Owners, Subject Matter Experts 3. Confirmation of Scope and Report Priority 4. Project Sponsor Meeting Schedule 5. Sprint/Scrum Methodology and Cadence for Status Reporting 6. Confirmation of Project Timeline 7. Elevation Process for Risks, Issues, Change Requests requiring Sponsor Approval, Requirements requests to
06/10/2021	USDOL First pandemic report released (ETA 5159 PEUC)
08/26/2021	First pandemic back reports accepted by USDOL ETA 5159 PEUC – May 2020 through July 2021
10/22/2021	ETA 5130 pandemic report released, and back reports sent to USDOL ETA 902 PUA pandemic report released, and back reports sent to USDOL Weekly DARIS DUA report released Reports removed from scope: • ETA 9161 Regular • ETA 9161 Extended Benefits (EB) • ETA 2112 Regular • ETA 8401 Regular • ETA 8403 Regular • ETA 8405 Regular • ETA 8413 Regular • ETA 8414 Regular

Fri 11/11/22	ETA 539 Regular (ar539) Weekly
Fri 07/30/22	#1 Retired from the System: ETA 902 DUA (Transition to
	Operations Task)
Fri 08/05/22	Population 2, 8, 10
Fri 08/19/22	Populations 3a, 5
Fri 09/02/22	Populations 3, 6
Fri 09/16/22	Population 4
Fri 10/14/22	Completion of Report Shutdown Prioritization Plan and Timeline
Fri 09/30/22	Transition of Populations files to Folders for USDOL Upload
Fri 10/14/22	Transition of submitting populations from data warehouse
Fri 10/31/22	Completion of Technical Debt
Fri 10/31/22	Completion of testing and training for viewing Report QA
	Dashboards (Final Reporting Team Activity)
Fri 10/28/22	Benefits measures and reporting
Fri 10/28/22	Completion of UAT Process documentation
Fri 10/28/22	Completion of Incident Management Process for Scheduled
	Report Runs
Fri 12/15/22	Final Notice of Reports being removed from the System
Fri 12/15/22	Closure of remaining open issues and decisions
Fri 12/30/22	Project Management Closure Docs and activities
Fri 12/30/22	Remove Reports from the System (*Process continues until all 39
	reports' warranties have ended and are removed—may complete
	after project is closed)
Fri 12/30/22	Transition to Operations Complete

^{*}In progress – Report is in production but has not been submitted to USDOL. RA is working with the USDOL to answer questions for the transition.

E. Major Deliverables

Major Deliverables/	Deliverable Description
Reports	
ETA 5159 PEUC (Pandemic	Claims and Payment Activities (PEUC)
Emergency Unemployment	
Compensation)	
ETA 218 PEUC	Monetary Determinations and Benefit
	Years/Duration (PEUC)
ETA 5159 Regular	Claims and Payment Activities Regular
ETA 5159 Workshare (Part-Time	Claims and Payment Activities Workshare
Workers)	
ETA 5130 PEUC	Benefit Appeals (PEUC)
ETA 902 DUA Regular	Disaster Unemployment Assistance
	Report for FEMA Announced Storms
Weekly DARIS	Like DUA Regular except includes cost
	information, sent to FEMA via USDOL
ETA 5130 Regular	Benefit Appeals Regular
ETA 5130 Extended Benefits (EB)	Benefit Appeals Extended Benefits
ETA 207 PEUC	Nonmonetary Determinations (PEUC)
ETA 207 Regular	Nonmonetary Determinations-Regular
ETA 207 Extended Benefits (EB)	Nonmonetary Determinations-Extended
	Benefits
ETA 218 Regular	Monetary Determinations and Benefit

ETA 227 (FPUC) (Federal Pandemic	Overpayments Causes, Methods of
Unemployment Assistance)	Detection, Recovery/Reconciliation,

Major Deliverables/ Reports	Deliverable Description
	Criminal/Civil Actions and Benefit Aging (FPUC)
ETA 191 Regular (Page 1)	STATEMENT OF EXPENDITURES & FINANCIAL ADJUSTMENTS OF FEDERAL FUNDS FOR UCFE-UCX Page 1
ETA 191 Regular (Page 2)	STATEMENT OF EXPENDITURES & FINANCIAL ADJUSTMENTS OF FEDERAL FUNDS FOR UCFE-UCX Page 2
ETA 538 Regular	Advance Initial and Continued Claims
ETA 9050 Regular	Time Lapse for All First Payments Except Workshare
ETA 9050 Partial (Except Workshare)	TIME LAPSE OF PARTIAL/PART TOTAL FIRST PAYMENTS
ETA 9050 Workshare	FIRST PAYMENT TIME LAPSE (WORKSHARE)
ETA 9052 Regular	Nonmonetary Determination Time Lapse, Detection Date
ETA 9051 Regular	Continued Weeks Compensated Time Lapse
ETA 9051 Partial (Except Workshare)	Continued Weeks Compensated Time Lapse, Partial Excluding Workshare
ETA 9051 Workshare	Continued Weeks Compensated Time Lapse, Workshare
ETA 203 Regular	Characteristics of the Insured Unemployed
ETA 9054 (Lower Authority)	Lower Authority Appeals Time Lapse
ETA 9055 Lower Authority	Lower Authority Appeals Case Aging
ETA 9016 Regular	Alien Claims Activities
ETA 586 Regular	Interstate Arrangement for Combining Employment and Wages
ETA 9128 Regular	Reemployment Services and Eligibility Assessment Outcome
ETA 9129 Regular	Reemployment Services and Eligibility Assessment Outcome
ETA 9049 Regular	Worker Profiling and Reemployment Services Outcomes
ETA 539 Regular	Claims and Payment Activities
Populations 1, 2, 3/3a, 4, 5, 6, 8, 10, 12, 13, 14, 15	USDOL Validation Samples

Major Deliverables/	Deliverable Description
Reports	
Transition to Operations - Operations	Transition of Product Owner
Training	Responsibility/Ownership for USDOL
	Reporting & Validations/Issue Resolution
Transition to Operations - Creation &	Communications, User Transitions to data
Execution of Report Shutdown Plan	warehouse/Tableau, reports batch
-	shutdown, pre/post benefit measurements.
(Reports will continue to be shut down	
in the System after project is closed)	

F. Major Milestones

Please See D. Key Dates

G. Key Stakeholders

Key Stakeholder	Project Interest
Dane Eagle	Secretary, Department of Economic Opportunity
Adrienne Johnston	Deputy Secretary, Division of Workforce Services
Domenic DiLullo	Chief Technology Officer
Paul Forrester	Chief Information Officer
Allyce Moriak	Chief Financial Officer
Wendy Castle	RA Modernization Program Owner - Business
Nicole Sanislow	RA Modernization Program Manager - Business
Tom Richardson	RA Modernization Program Manager – Strategic Planning Office
Garrick Wright	RA Modernization Program Manager – Information Technology
Matt Mask	Project Owner
Linda Lawler	Project Manager
USDOL	Represents the Federal Unemployment Program

H. Significant Project Assumptions and Constraints

Project Assumptions

- 1. The RAD team will continue to be the production support team for ETA Reports after the project is closed.
- 2. The Project Team will not be needed as reports are being shut down in the System.

Project Constraints

1. RA and the PM continue to answer questions for the USDOL to gain approval for USDOL State System changes to allow the Q4 2021 ETA 227 Regular Quarterly Report to be submitted from the data warehouse.

II. Work Breakdown Structure

WBS	Task Name
1	Reporting
1.2	Initiation
1.2.1	Risk and Complexity Assessment
1.2.2	Deliverable: Project Charter
1.2.3	Project Charter complete
1.2.4	Project Kickoff Meeting
1.2.6	Initiation Phase complete
1.3	Planning
1.3.1	Deliverable: Resource Planning with RA & IT AppDev Completed
1.3.2	Resource Plan Complete
1.3.3	Deliverable: Project Schedule
1.3.4	Project Schedule complete
1.3.5	Deliverable: Project Management Plan
1.3.6	Project Management Plan complete
1.3.7	Deliverable: Project Budget
1.3.9	Deliverable: Project Spending Plan
1.3.11	Requirements:
1.3.12	Complete the Planning Gate R&C Assessment
1.3.14	Planning Phase complete
1.4	Execution
1.3.1	Product Deliverables - Reporting
1.5	Execution Phase complete
1.6	Monitoring and Controlling
1.6.1	Manage Project Schedule
1.6.2	Manage Project Costs
1.6.3	Manage Project Scope
1.6.4	Manage Project Risks
1.6.5	Manage Project Issues
1.6.6	Manage Decisions
1.6.7	Manage Action Items
1.6.10	Record Lessons Learned
1.6.11	Prepare Regularly scheduled Status Reports
1.6.12	Conduct Regularly scheduled Status Meetings
1.7	Monitoring and Controlling Phase Complete
1.8	Project Closeout
1.7.1	Transition to Operations (RA-IT AppDev Onboarding, Checklists, and Training)
1.8.1	Schedule Project Closeout Meeting
1.8.2	Deliverable: Project Closeout Report

WBS	Task Name
1.8.3	Project Closeout Report complete
1.8.5	Conduct Project Closeout meeting
1.9	Closeout Phase complete

III. Resource Loaded Project Schedule

The Reporting project was already in progress before the RA Modernization program was established. The project team used DEO's Agile development methodology approach for deliverables instead of the waterfall methodology required by the RA Modernization program. Therefore, a resource loaded project schedule is not available for this project.

The Project Team consists of 4 full time Data Architect contractors, 1 Business Analyst, a part time QA Tester, a part time Architect Lead contractor, a part time DBA contractor and a part time Project Manager/QA Tester.

Since the Reporting project was driven using Agile Methodology, here is how the schedule and resource assignments were created:

- 1. The BA wrote a requirements manual for each report in scope prior to turning it over for development. This was done outside of the sprint per the DEO prescribed application development process. Unlike the waterfall methodology, once a requirements manual was approved the developers could schedule the report for development and delivery as soon as possible. The customer receives value from the work much sooner than with the waterfall method which doesn't deliver value until the end of the project. (39 reports)
- 2. The team reviewed the report requirements manual and during product backlog grooming broke the report work down into 2-week sprints—as many as were needed to complete the report/deliverable.
- 3. Before every sprint, the team held a sprint planning session (up to 2-hours per week of sprint) to "task out" the work and estimate the time needed for development within the 2-week sprint.
- 4. The PM would check the teams "scrum board" to track progress and would work with the scrum master to keep tabs on team progress and for regular status reporting. The Agile methodology prevents the PM from meeting with the team because it draws focus away from the work at hand. The PM holds the team accountable through the scrum master.
- 5. The cycle of BA requirements gathering, to completion of report deliverables, continues until all reports are complete and any remaining post implementation clean-up/documentation deliverables are delivered.
- 6. Since requirements, planning, development, testing, and implementation were tasks and not project phases, for this reason, it was not possible to create a resource loaded project schedule, especially after many of the deliverables were already turned over to the customer.

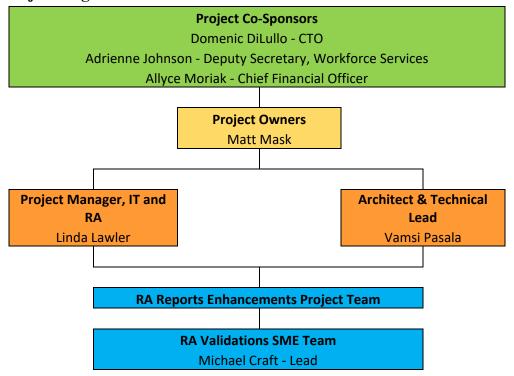

- 7. One final note, the Agile methodology does not emphasize hours as a measure of value since hours can be expended without any value being provided to the customer. Instead, the focus is on what the customer determines adds value, and by delivering that value quickly so the return on investment can be captured as soon as possible—not at the end of the project.
- 8. The project duration *for the team* consists of approximately 40 sprints ending October 31, 2022. The duration of the entire project is scheduled to end in December 2022 with the remaining 2 months of duration used to shut down report batches in the Connect application (operational work, not project team) and complete project closure activities.

IV. Project Spending Plan

Since the 13-Reporting project started before RA Modernization, project spend was tracked by IT management, not by the PM. Project spend was part of the RA-IT budget.

V. Project Organization and Methodology

A. Project Organizational Chart

B. Project Roles and Responsibilities

Role	Responsibilities
Project Sponsors:	Secures spending authority
Adrienne Johnston	• Ensures sustained buy-in from senior management and executive leadership
Domenic DiLullo	 Monitors project progress and assumes all project/program risk
Allyce Moriak	Removes barriers and assists in resolving escalated conflicts
	 Ensures project benefits are realized and risks are appropriately addressed
Project Owner: Matthew Mask	 Represents the interests of the stakeholders to the DW Team
	Monitors project progress
	Approves project definition
	 Approves plans and schedules
	Validates project deliverables meet expectations
	 Tracks project benefit recognition, risk retention and mitigation activities
	Acts as liaison between teams and Management for
	issue escalation and resolution
Lead Project Manager: Linda Lawler	• Ensures project team completes project on time and within budget
	Develops project artifacts as required by the State of Florida
	Monitors performance of project tasks
	Secures and documents acceptance of project deliverables
	Communicates project status
	• Resolves issues and/or escalates issues as necessary with Project Owner(s)
	Controls project scope and acquires necessary approvals for changes
	 Integrates partner business unit's work efforts within the project
Architect and Technical	Responsible for assisting the team in finding
Lead:	solutions to issues elevated to him
Vamsi Pasala	• Is available to project sponsors for technical
	questions regarding direction of the project and any
	dependencies/impacts of other projects
	• Assists the PM in coordinating additional technical resources/SMEs if necessary, for the team.

RA Validations Lead:	Works with the PM to provide appropriate skilled
Michael Craft	resources for validating ETA reports
	Reviews and approves report requirements with the
	BA and RA staff before report development begins
	Provides access to staff members who enter ETA
	reports into the USDOL system for requirements
	Attends report demonstrations when scheduled
	Provides staff for RA User Acceptance Testing of
	reports.

C. Project Management Methodology

DEO will use a project management methodology in compliance with project management standard rule 60GG-2 F.A.C., project requirements and DEO experience with similar engagements. Predictability, accountability, and flexibility are key elements that must be embraced by the overall project management approach to ensure DEO's satisfaction and project success. Successful project management must include active and visible leadership, multiple controls and checkpoints with measurable outcomes, and engagement with all stakeholders. DEO believes strong project management is critical throughout the life of any successful project.

For this project, DEO's project management will include the following specific elements, in addition to our standard methodology:

- The project manager and technical lead will advise leadership on areas of concern and will propose solutions to mitigate risk.
- In the case where additional time is needed for a task that exceeds an additional sprint (2-weeks), the project manager will inform the technical lead and review possible alternatives before elevating to the Deputy CIO and project sponsors.
- The project manager will report progress in Weekly RA-IT PMO Project status meetings (Tuesdays at 3PM). This keeps other RA-IT project managers aware of possible resource sharing (SMEs) contention and project/operational work dependencies (batch processing, environments, etc.)
- DEO's project management approach will utilize the technical skills, tools, and techniques needed to succeed, as well as the dedication to accountability, resource commitment, and organizational focus. Project success will be the result of active communication among all individuals, understanding everyone's role in the project, and clear delineation of responsibilities.

DEO believes successful project management hinges on the following:

- Clearly established project goals and requirements
- Ongoing assessment of quality against established standards
- Constant measurement of success against established deliverables and milestones
- Personal presence and commitment of key project leadership

Proactive identification and communication of risks and issues

VI. Business Process Organizational Change Management Plan

While an Organizational Change Manager has not been assigned to this project, the project manager routinely discusses business process changes with project sponsors since changes introduced by this project are limited to their business units. Changes to business process are usually developed by or with these resources.

Communications are sent as each report is transitioned from the System to the Data Warehouse, and project owners and sponsors are responsible for authorizing the addition or removal of staff regarding report access based on the staff member's assigned role and business unit.

Also, for external stakeholders, such as USDOL, the project team is not authorized to speak directly to them. Communications are handled by RA managers and RA executive management.

For changes that cause the removal of operational tasks, such as the retirement of report batches in the System, meetings are planned toward the end of the project to determine the best way to achieve this goal. Technology changes have an established change management process that also serves to communicate proposed changes to all areas that could be impacted. Batch changes will be submitted using this established process.

VII. Project Risk Management Plan

Risk Description/Impact	Probability of Occurrence (high, medium, low)	Risk Tolerance (high, medium, low)	Mitigation Strategy	Assigned Owner
1. Introduction of report changes by USDOL	Medium	High	Review USDOL UIPL with RA to determine if more than 1 sprint of additional work is required. If so, submit a change request to project sponsor for approval	PM, RA Lead
2. RA resources pulled due to a FEMA DUA	Low	Medium	The Reports Project Team will continue to develop reports if approved SRRs are available. RA validation process will be put on hold until resources are available	PM, RA Lead

FY 2022-2023

QUARTER 2

VIII. Capacity Plan

The 13-Reporting project was grandfathered into the RA Modernization program when it was approximately 50% complete. Therefore, capacity planning was already complete before the program started. Also, the resources on the team were 100% committed to the reporting project before being grandfathered into the RA Modernization program.

SECTION 1 — OVERALL PROJECT PLAN

I. Project Charter

The Master Data Management project establishes a solid architectural basis in support the continuous modernization by creating a Department data catalog and data dictionary to identify data elements and interoperability across business units and other departments. The development and deployment of APIs to an enterprise API management platform will be addressed as part of the continuous modernization of the Reemployment Assistance Claims and Benefits Information System (System).

Scope Statement

• Create a department data catalog, data dictionary of data elements, and business glossary.

MDM Scope Changes as per CR#0010

• The Design Develop and Deployment of APIs task, which was included as optional scope in the iSF Final Report, will be part of the continuous modernization of the System.

MDM Scope Changes as per CR#0012

• The Department will not procure an enterprise-wide master data management tool, as it is beyond the scope of the project, as stated in the iSF Report.

A. Project Objectives and Business Benefits

Project Objective	Business Benefit
Catalog data sources that are shared	Enable standardization of data elements
Define database tables and fields that	Enable interoperability across business
support common interoperable data formats	units and other Departments

B. Critical Success Factors

 Completed data catalog and data dictionary of databases that will be linked later by APIs

C. Key Dates

Key Date	Importance and Relevance to the Project
May 7, 2022	Initiation phase completed
June 30, 2022	Requirements
June 30, 2022	PMP & Resource Plan
July 24, 2022	Project Schedule
July 29, 2022	Change request submitted to CCB for approval
August 2, 2022	Change request Approved
September 21, 2022	Test Plans
September 22, 2022	Planning phase Completed
September 26, 2022	Execution phase Started

D. Major Deliverables

Major Deliverable	Deliverable Description
Build catalog of databases	Validated catalog of databases to be linked
Build dictionary of databases	Validated dictionary of databases to be linked
As-Is Working Sessions	Conduct on-site working sessions with subject
	matter experts, as identified by DEO, to go over
	Business requirements.
Requirements Traceability Matrix	Document, validate, and verify functional and
	technical requirements.
Project Management Plan	Complete and submit a detailed project
	management plan to DEO.
Potential Benefit Analysis	Develop and provide DEO with a quantitative
	analysis of potential benefits from re-engineered
	business processes and technical functional and
	non-functional requirements.
Procurement of MDM Tool	Procure, install, configure, and test toolset. Effort
	in coordination with the SSI project and Contract
	Manager.
Requirements Management Plan	Update the previously developed As-Is business
	process requirements with greater details.

E. Major Milestones

Major Milestone	Milestone Description
Initiation Phase Complete	Complete
Planning Phase Complete	Complete
Execution Phase Complete	In-progress
Closing Phase Complete	Pending

F. Key Stakeholders

Key Stakeholder	Project Interest
Dane Eagle	Secretary, Department of Economic Opportunity
Domenic DiLullo	Chief Technology Officer
Paul Forrester	Chief Information Officer
Adrienne Johnston	Deputy Secretary, Division of Workforce Services
Allyce Moriak	Chief Financial Officer
Wendy Castle	Program Owner
Thomas Richardson	Program Manager – Strategic Planning Office
Garrick Wright	Program Manager – Information Technology
Nicole Sanislow	Program Manager - Business
Alvin Sellars	Project Sponsor
Quinton Lightfoot	Technical Lead
Vamsi Pasala	Technical Architect
Prathamesh Hankare	IT Technical SME
Benjamin Beha	Business SME

William Brito	Developer
---------------	-----------

G. Significant Project Assumptions and Constraints

Project Assumptions

- 1. All identified funding is available.
- 2. The identified System requirements are correct and complete.
- 3. All the people involved at the beginning of the project will remain working on the project until the project is completed.
- 4. Members of the project team will have access to the necessary tools, hardware, and materials necessary to complete the identified tasks.
- 5. All relevant stakeholders will attend required status meetings. However, there may be instances where some stakeholders are unavailable to attend.
- 6. The project sponsor will be responsive and prepared to make decisions regarding the project cost, scope, and schedule.
- 7. Personnel with sufficient expertise will be on-boarded and allocated to the execution of this project.

Project Constraints

1. None

II. Work Breakdown Structure

WBS	Task Name
1	Master Data Management
1.1	Initiation
1.1.1	Initiate a review of the current Master Data Management
1.1.2	Review and Approve Final Proposal for Master Data
	Management
1.1.3	Determine Staff Aug Resources
1.2	Planning
1.2.1	Determine the mapping strategy of MDM
1.2.2	Procure Staff Aug Resources
1.3	Execution
1.3.1	Catalog all Databases
1.3.2	Include all Databases in the Data Dictionary
1.3.3	Validate Data Structure
1.4	Closing
1.4.1	Complete Project Closeout Report

III. Resource Loaded Project Schedule – Adjusted for CR#0012

C. Project Management Methodology

DEO will use a project management methodology in compliance with project management standard rule 60GG-2 F.A.C., project requirements and department experience with similar engagements. Predictability, accountability, and flexibility are key elements that must be embraced by the overall project management approach to ensure DEO's satisfaction and project success. Successful project management must include active and visible leadership, multiple controls and checkpoints with measurable outcomes, and engagement with all stakeholders. DEO believes strong project management is critical throughout the life of any successful project.

For this project, DEO's project management will include the following specific elements,

in addition to our standard methodology:

- The project management team will advise leadership on areas of concern and will propose solutions to mitigate risk.
- Vendors will respond to inquiries or requests from DEO within one business day from receipt.
- In the case where additional time is needed for a task, vendors will provide an estimate, which must be approved by the DEO Project Manager.
- At the end of the contract, vendors will provide final copies of all reports in electronic format for archive purposes.

DEO's project management approach will utilize the technical skills, tools, and techniques needed to succeed, as well as the dedication to accountability, resource commitment, and organizational focus. Project success will be the result of active communication among all individuals, understanding everyone's role in the project, and clear delineation of responsibilities.

DEO believes successful project management hinges on the following:

- Clearly established project goals and requirements
- Ongoing assessment of quality against established standards
- Constant measurement of success against established deliverables and milestones
- Personal presence and commitment of key project leadership
- Proactive identification and communication of risks and issues

Quality Assurance

DEO will follow a rigid quality assurance process. The project will follow these processes and procedures to ensure the highest level of execution.

Quality Management. The Strategic Planning Office's primary responsibility is to provide oversight and ensure DEO objectives are met by meeting regularly with project managers and department leadership.

The Project Manager is responsible for understanding project requirements and DEO expectations. A preliminary internal project meeting is held near the start of each project with all stakeholders. This meeting will include a discussion(s) of task assignments to clarify the scope of work and how it will be accomplished. The following quality management activities will be completed for each project:

- Internal Kickoff Meeting Prior to project commencement, the Project Manager will ensure all team members understand the project's requirements, scope, and quality control processes. This meeting includes a discussion of task assignments to clarify the scope of work and how it will be accomplished. This awareness is maintained throughout the duration of the project with ongoing and as necessary project team meetings.
- Sponsor Checkpoints Each Project Manager will schedule regular contact with the Project Sponsor. This allows the Project Manager to voice their perspective on assignment progress and communicate any relevant risks, action items, issues or decisions made or

- encountered during the project.
- **Deliverable Reviews** Prior to submission to DEO, all vendors' deliverables are required to first undergo a thorough review. This review includes technical editing, validation, clarity, and ensuring conformance to DEO standards and expectations.

Communication Management Plan

Communication management seeks to provide a comprehensive framework for all communication necessary to keep stakeholders informed about the project's direction and status. The project communication plan is to clearly identify the status of compliance efforts and to communicate the progress made in achieving a successful project outcome. The purpose of this plan is to communicate pertinent information related to discovery, design, and documentation in a clear and concise manner to the client, stakeholders, and the project team.

Communication Plan

The communication plan is designed to provide the right information, at the right level, to the right audience, at the right time. The plan addresses key audiences, messages, frequency, and methods of communication.

This plan, depicted in Table 1 below, describes the various forms of communication, appropriate channels of communication, and target audiences for this project. The communication matrix identifies the different tools that will be used to guide the planning for communication about the project to various audiences and purposes. It should be considered a general guide for the effective dissemination of information that is received, understood, and utilized by the target audiences for successful completion of the project. This communication matrix will be customized for each project to reflect the various communication forms, frequencies, and audiences that will actually be used during the course of the project and to ensure communication channels are properly maintained throughout the project and updated if communication needs to change.

Bi-Weekly Status Reporting

Vendors will be required to submit status reports throughout the project at several levels. The primary source of status information is the bi-weekly written status report, which will communicate at minimum, the following information.

- **Project Status.** This section depicts the project status at a summary level using a red/yellow/green method supported by two to three essential questions that are answered to determine summary status. The red/yellow/green method is not meant to be a grading system but instead it is a way to easily identify the areas of the project that need the most attention in order to make the project successful.
- Overview of Project Progress. This section describes significant accomplishments achieved in the reporting period.
- Overall Status. This section provides a high-level overview of whether the project is on schedule, on budget, and on scope. A yellow or red status should be explained here in detail.
- Project Milestones, Deliverables, and Latest Tasks. This section contains the major deliverables of the project, their planned and actual completion dates, and their status.
- Risks, Action Items, Issues, and Decisions. This section will link to the project risk, action item, issue, and decision tracking tool. The project tracking tool contains all items tracked during the project.

Project Tracking

This section describes the "RAID" methodology for tracking risks, action items, issues, and decisions. DEO will follow a centralized approach that minimizes miscommunication or misinformation among project stakeholders. The Department will diligently maintain a project tracking log for each project, and a master log for RA Benefits System Modernization project overall, a Microsoft Excel workbook with multiple tabs intended to capture the details and the latest attributes of items tracked by Project Managers.

Risk Management

Risks are characteristics, circumstances, or features of the environment that may have an adverse effect on the project or the quality of the work products. The risk management plan outlines the process to identify and analyze the effects of uncertainties on the project. This plan establishes a framework of working practices, which enables project team members to identify, analyze, respond to, monitor, and communicate risks before they become issues and jeopardize the success of the project. If a risk becomes an issue, DEO will work with the involved stakeholders to assess its impact on the project and assign responsibility for issue resolution, including a target date for closure.

Risks will be managed in the following manner:

- During status meetings, any stakeholder can raise a risk for discussion.
- The Project team will discuss the risk and determine if it warrants being monitored in the risk log.
- The project manager will enter the item in the risk log.

- The team will discuss mitigation strategies and assign who will own the risk item.
- At each subsequent status meeting, the risk(s) will be reviewed until the risk(s) can be closed.

Action Items

Action items are unplanned tasks that occur during a project that are too small to be added to the schedule. These items must be within the scope of the project and are often tasks that support scheduled tasks, issue resolution, risk management, or some other aspect of the project. The action item log is created and maintained as part of the project tracking log.

Action items will be managed in the following manner:

- During status meetings, any stakeholder can raise an action item for discussion.
- The Project team will discuss the action item and determine if it warrants being monitored in the action item log.
- The project manager will enter the item in the log.
- The team will set the priority for the action item (high/medium/low), assign an action item owner, and set a planned completion date.
- At each subsequent status meeting, the action item(s) will be reviewed until they can be closed.

Issue Management

An issue is defined as a current situation or event that must be resolved to avoid adverse impact to the project. Issues can originate from a risk that has materialized. DEO will document all issues that are brought up in meetings.

When issues arise, they need to be resolved in a disciplined manner in order to maintain the quality of the work products and control the schedule and costs. The issue resolution process verifies differences, questions, and unplanned requests are defined properly, escalated for management attention, and resolved quickly and efficiently.

The issue resolution process is intended to handle technical problems, requirements, or issues/conflicts, as well as to address process, organizational, and operational issues of the engagement.

Issues will be managed in the following manner:

- During status meetings, any stakeholder can raise a potential issue for discussion.
- The Project team will discuss the potential issue and determine if the item is indeed an issue.
- If the team determines the item is an issue, the project manager will enter it in the issue log.
- The team will discuss resolution steps, assign who will own the issue item, and set a target date for resolution.
- At each subsequent status meeting, the issue(s) will be reviewed until they can be closed.

Decisions

Decisions are leadership answers to questions that arise during the project. The decision log is created and maintained as part of the project tracking log.

Decisions will be managed in the following manner:

- During status meetings, any stakeholder can raise a question that requires a decision.
- If the team determines a decision needs to be made, the project manager will enter it in the decision log.
- The team will discuss the impact to the project, assign a decision maker, and set a date for when the decision is needed.
- At each subsequent status meeting, the decision item(s) will be reviewed until they can be closed.

Change Control

It is possible that the project will encounter some degree of scope or schedule change. Change control ensures that all requests for change are considered in light of the project goals and objectives and are prioritized accordingly.

The project team will employ strict control over project scope changes throughout the life of the project. The change control process will empower the project sponsor to review, decline, postpone, or authorize and prioritize requests for change. Requested changes are evaluated and a determination made on how it impacts scope, time, and cost. If there are impacts to overall project cost or final project delivery date, a formal change order will be initiated. All other changes will be handled using the project change control process.

The change control log is used to track all change requests during the project. As a change request is submitted, the change control log will be updated with a description and ongoing progress updates until a final resolution is determined.

Changes will be managed in the following manner:

- During status meetings, any stakeholder can raise a potential change to the project's scope, cost, and/or schedule.
- If the team determines a change needs to be made, the project manager will enter it in the change control log and create a formal change request.
- The team will prioritize the change, assign an owner and due date, and describe the impact to the project.
- At each subsequent status meeting, the change orders will be reviewed until they can be closed. No change order will be closed without agreement and sign-off from project sponsors.

Schedule Management

Schedule management consists of the following three areas: schedule development, schedule administration, and schedule change control.

Schedule Development

Schedule development is the process of taking the work breakdown structure (WBS) and breaking it down into activities and tasks that can be assigned and managed. Tasks that are dependent on others are linked. Work efforts and resources are assigned to each task. Once the draft is complete and correct, the schedule will be baselined so that any future changes can be tracked.

The project schedule is the definitive source of project activity, dates, and assignment information. A high-level schedule is provided below. Prior to project initiation, a resource-loaded Microsoft Project Schedule will be generated with milestones and task durations.

Schedule Administration

The schedule will be kept up to date weekly. Task progress and percent completion will be input into the schedule. Variances between planned and actual progress will be managed with particular attention to the critical path. Each week the Project Manager will evaluate the baselined schedule against current progress, identifying the following at a minimum:

- Overdue tasks and computation of the percentage of late tasks related to total tasks to date (number of overdue tasks divided by number of total tasks).
- Overall task completion trending towards an overall project variance equal to or greater than 10%.

The Project Manager will communicate the variance explanation to the project's key stakeholders. This information will be used as input into the weekly status reporting. Any variance where the critical path is significantly behind will automatically result in a red status on the weekly status report.

Corrective actions will be developed as needed to resolve schedule variances. Schedule management techniques of crashing, fast-tracking, and compression will be considered as will other solutions like resource shifting or work rescheduling. Schedule forecasting will be used to look beyond the current status so that, to every extent possible, corrective actions can be applied before there are schedule variances.

Schedule Changes

Once the schedule has been developed, approved, and baselined any significant changes will have to be approved through the change control process. All other schedule changes can be made at the discretion of project leadership and will be reported and discussed with the weekly status report.

Procurement Management

The Procurement Management Plan seeks to outline how the project will procure resources necessary to complete the project objectives. It defines the procurement methodology for this project, lays out the process for managing procurement throughout the life of the project, and will be updated if project needs change. This plan identifies and defines the goods and services to be procured, the types of contracts to be used in support of this project, the contract approval process, and the decision criteria. The importance of coordinating the procurement activities, establishing

firm contract deliverables, and metrics in measuring procurement activities is included in the following subsections.

Procurement Management Approach

The DEO Purchasing Office and any vendors contracted for procurement assistance will provide oversight and management along with the Project Manager for all procurement activities under this project. The Project Manager will work with the project team to identify all items to be procured for the successful completion of the project. The Department Strategic Planning Office (SPO) will then review any procurement requests prior to approving the development of procurement documentation.

Procurement Definition

The following table will be completed to record any procurement goods and/or services determined to be essential for any RA Modernization project's completion and success. The Project Manager and/or SPO must approve any procurement before inclusion in this table.

Procurement	Description	Justification	Needed By

Cost Management

The tables below will be completed and used to define and track project costs during each specific RA Modernization Project.

Cost Management Plan							
Category							

Column	Definition
Category	Type of expense
Description	Description of expense
Frequency	Describe whether the expense is annual or recurring or a onetime expense
Deliverable	List the deliverable associated with the expense
Cost	List the total expense in dollars e.g. \$0.00

Staffing Management

The purpose of this section is to outline how the project is to manage staffing requirements and resource tasks appropriately. This project plans to procure additional staffing through "Staff Augmentation" contracts. The needs for each individual project have been estimated before the

project and will be refined during requirements gathering and procurement of services.

Quality Management

Quality Management details the processes to ensure quality services and deliverables. DEO will use disciplined processes and inspections to confirm quality throughout the life of the project. These inspections are performed at key points in the creation and review of documents and confirmation of the value of services the Project Team provides. Quality Management includes two components, Deliverable Quality Control and Services Quality. The purpose of this section is to provide instructions on these processes. DEO commits to the highest quality in project execution and project team members' performance. To achieve a positive outcome, these processes will be carried out, so expectations are understood, aligned, and met.

VI. Business Process Organizational Change Management Plan

This project intends to improve the delivery, execution, security, or convenience of DEO's lines of business through the implementation of modern processes and tools based on industry best practices and frameworks.

The project team aims to maximize communication, engagement, adoption, and performance of these new processes, roles, and responsibilities through a combination of tools, templates, and techniques such as:

- Stakeholder identification and engagement plans
- Process identification and improvement plans
- Educational assessment and training plans
- Change risk assessment
- Change Advocate networks
- Change Management
- Business Relationship Management
- IT Service Management

VII. Project Risk Management Plan

Identified in above Project Management Approach section.

Risk Description/Impact	Probability of Occurrence (high, medium, low)	Risk Tolerance (high, medium, low)	Mitigation Strategy	Assigned Owner
Hurricane impacting the state delays the schedule	Low	High	Adjust schedule accordingly	PM
Necessary tools, hardware, or materials need to be procured for the successful completion of the project.	Medium	Medium	Identify needs early on and involve management and budget staff throughout engagement	PM
Insufficient knowledge transfer of new process	Medium	Medium	Involve impacted staff throughout engagement to increase participation and knowledge of new processes	PM
RSK0001154	High	High	Work with contracts team to develop the SOW.	Vendor/P M

VIII. Capacity Plan

This project does not involve the purchase/lease, configuration, and installation of significant computer hardware. For purposes of capacity planning, computer hardware includes servers, storage, and network infrastructure. Accordingly, a Capacity Plan is not required. Once the claim volume starts to go down as the claims volume decreases, capacity can be reduced. Also moving to an auto-scaling configuration will additionally reduce needed capacity.

Section 1 — Overall Project Plan

I. Project Charter

A. Scope Statement

The Archive & Purge Project Team will determine the state and federal criteria for purging Reemployment Assistance data that can be purged in the Reemployment Assistance Claims and Benefits Information System (System); establish archival storage; archive and purge database storage; and archive and purge file storage. Phase 2: Tool Selection and Installation for the project must be completed by June 30, 2023.

B. Project Objectives and Business Benefits

Since the System went live in 2013, its relational database has been growing exponentially. It is estimated that upwards of 80% of the monthly generated data stored is replicated and is not being used, and that copies of these large volumes of data continue to consume more and more space. The consumption of space and an absence of an archival and purge process has degraded System performance and increased batch processing windows and operational and maintenance costs.

The success of the Department's archival and purge process is dependent on improvements to the System's data management and operational schema. The data contained in that schema is data vital to the operation of the System; however, some of this data can be archived. This initiative identifies which data should no longer reside in the operational schema of the production database and moves it into an archival schema. The archival schema contains data that has been classified as 'archivable' and is typically hosted on a slower drive (lower-tier, and thus cheaper). Eventually, the data in the archival schema is reviewed by data owners to determine what data is ready to be purged from the System.

Project Objective	Business Benefit
Stabilize the growth of stored data on the online transactional processing environment, i.e., reduce the size.	 Improved System performance (data access) and stability Shorter batch windows Less RTO = Recovery-Time-Objective, RPO = Recovery Point Objective, i.e., less to recover
Less tier 1 storage required	Reduced storage costs due to cheaper archival storage
Fewer maintenance costs (no need to maintain multiple copies for reporting purposes)	Less data to maintain

C. Critical Success Factors

- No less than a 30% reduction in Tier 1 storage (6 Terabyte reduction)
- Creation and population of archival storage
- Elimination of duplicate file shares
- Reduction in batch windows
- Compliance with state and federal laws for storing information

D. Key Dates

Key Date	Importance and Relevance to the Project
06/10/22	Project Charter Completed
06/23/22	Initiation Risk Assessment Completed
07/07/22	Project Kick-Off
11/18/22	Stakeholder Registry Completed
11/18/22	Resource Plan Completed
11/25/22	Project Schedule Completed
11/25/22	Project Management Plan Completed
12/30/22	Project Budget Completed
12/30/22	Project Spending Plan Completed
12/30/22	Tool Request for Information Completed
01/27/23	Tool/Vendor Selection Completed
03/31/23	Procurement of Tool Completed
06/30/23	Tool Installation Completed

E. Major Deliverables

Major Deliverable	Deliverable Description		
Reduced Operational Transactional Database	Transactional Benefit System Footprint		
	reduced to 8 Terabytes		
Archival File and Data Stores Completed	Tier 2 or below storage archive implemented		
Elimination of duplicate databases	Single data source for reporting		

A. Major Milestones

Key Date	Importance and Relevance to the Project
06/10/22	Project Charter Completed
06/23/22	Initiation Risk Assessment Completed
07/07/22	Project Kick-Off
11/18/22	Stakeholder Registry Completed
11/18/22	Resource Plan Completed
11/25/22	Project Schedule Completed
11/25/22	Project Management Plan Completed
12/30/22	Project Budget Completed
12/30/22	Project Spending Plan Completed
12/30/22	Tool Request for Information Completed
01/27/23	Tool/Vendor Selection Completed
03/31/23	Procurement of Tool Completed
06/30/23	Tool Installation Completed

B. Key Stakeholders

Key Stakeholder	Project Interest	
Dane Eagle	Secretary, Department of Economic Opportunity	
Adrienne Johnston	Deputy Secretary, Division of Workforce Services	
Domenic DiLullo	Chief Technology Officer	
Paul Forrester	Chief Information Officer	

Allyce Moriak	Chief Financial Officer
Wendy Castle	RA Modernization Program Owner - Business
Tom Richardson	RA Modernization Program Manager – Strategic Planning Office
Garrick Wright	RA Modernization Program Manager – Information Technology
Timothy Giesecke	Project Sponsor/Owner
Linda Lawler	Project Manager
USDOL	Represents the Federal Unemployment Program

C. Significant Project Assumptions and Constraints

Project Assumptions

1. Maintenance of Archive & Purge Processing will be transitioned to the Department's Office of Information Technology once the project is complete.

Project Constraints

1. Phase 1: Tool Selection and Installation must be completed by June 30, 2023.

II. Work Breakdown Structure

WBS	Task Name	% Complete	Duration	Start	Finish	Resource Names
1	15-DEO-Archive and Purge-OWP-11.04.2022	21%	325 days	Mon 4/4/22	Fri 6/30/23

IV. Project Spending Plan

Archive & Purge Budget		
Total	\$2,835,058	
Hardware	\$200,000	
Software	\$926,850	
Services	\$1,708,208	

V. Project Organization and Methodology

A. Project Organizational Chart

B. Project Roles and Responsibilities

Role	Responsibilities
Program Management Group	Secures spending authority
	• Ensures sustained buy-in from senior management and
	executive leadership
	 Monitors project progress
	 Removes barriers and assists in resolving escalated conflicts
	• Ensures project benefits are realized and risks and issues
	are appropriately addressed
Project Owner Timothy Giesecke	 Represents the interests of the stakeholders to the DW Team
	 Monitors project progress
	 Approves project definition
	 Approves plans and schedules
	Validates project deliverables meet expectations
	 Tracks project benefit recognition, risk retention and mitigation activities
	• Acts as liaison between teams and Management for issue
	escalation and resolution
Project Manager	• Ensures project team completes project on time and within
Linda Lawler	budget
	 Develops project artifacts as required by the State of Florida
	 Monitors performance of project tasks
	• Secures and documents acceptance of project deliverables
	Communicates project status
	 Resolves issues and/or escalates issues as necessary with Project Owner(s)
	 Controls project scope and acquires necessary approvals for changes
	• Integrates partner business unit's work efforts within the project
Business Analyst	Works with the PM in business unit and IT meetings for
Yella Mopuru	requirements gathering
	• Assists the PM in the creation of the Requirements
	Traceability Matrix (RTM).
	• Writes the Requirements Document for the project.
Enterprise Solution Architect	• Responsible for assisting the team(s) in coordinating the
Vamsi Pasala	most appropriate solution for archiving and purging based
	on requirements collected.
	 Assists the team with identifying integration points with other projects and evaluating any risks.
	• Is available to executive management, the program team,
	and the project team for technical questions regarding

	direction of the project and any dependencies/impacts of other projects
	- ·
	Assists the PM in coordinating additional technical (SMF): Grant of the coordinate of the coordi
	resources/SMEs if necessary, for the team.
	 Has historical knowledge of the Connect system since Go Live
Lead Database Administrator	
Anand Kothandan	• Responsible for assisting the Enterprise Solution Architect
Anand Kotnandan	in coordinating the most appropriate solution for archiving
	and purging based on requirements collected.
	• Is available to executive management, the program team,
	and the project team for technical questions regarding
	direction of the project and any dependencies/impacts of
	other projects
	 Assists the PM in coordinating additional technical
	resources/SMEs if necessary, for the team.
	Has years of historical knowledge of the Connect system
Records Management and	Assists business units with requests for ruling and
General Counsel Liaison	decisions on exceptions to records retention policy and
Karen Gates, Erik Sayler	appropriate state and federal laws.
,	 Provides written resolution results and next steps to
	business unit, PM and project team.
Business Unit Subject Matter	Provides project team with their business units' data
Experts	inventory
Appeals:	 Participates in testing, validating, and approving the
Jamie Dattoli	Archival and Purge processes per requirements
MaryGordon Gavalas	
Alessandra Zupan	
Monica Jackson-Marcotte	Counsel Liaison to obtain rulings on exceptions to purge requirements.
Adjudication:	•
Jonathan Hill	Updates the project team on new inventory created during project progress.
Benny Collazo	project progress
Aaron Arnold	
Nicholas Lent	
Alice McCartney	
RA Quality Management:	
Nicole Sanislow	
Claims Processing:	
El' Lise Bethel	
RA Operations:	
Mark Miller	
Samantha Caban	
Robin Hess	
Rebecca Whittaker	
Brett Riley	
Dian Thompson	
IT Subject Matter Experts	Provides insight into types of items being stored that
Becky Leckinger (Interfaces)	might be useful to investigate for the purpose of archiving
	or purging.
	or purging.

Lewis Goode (Batch	
processing)	
Al Rehwinkel	
(Correspondence, 1099s)	
Barry Robinson (Release	
Management, Connect	
Environments)	
TBD – (FileNet)	
Purchasing Department	Responsible for assisting the project team with tool
Tina Peacock	selection if there is a "buy" decision.
Greg Turral	ĺ

C. Project Management Methodology

The Archive and Purge project follows DEO's Center of Excellence requirements for projects according to best practices found in the PMBOK v6.0.

VI. Business Process Organizational Change Management Plan

Currently there are no changes to business processes. Organizational Change Management will be revisited after the Build or Buy decision is made.

VII. Project Risk Management Plan

Risk Description/Impact	Probability of Occurrence (high, medium, low)	Risk Tolerance (high, medium, low)	Mitigation Strategy	Assigned Owner
Incomplete data dictionary will impact project schedule	High	Low	Move forward with project using existing data dictionary	Linda Lawler
2.				
3.				
4.				
5.				

VIII. Capacity Plan

Capacity will be determined once a decision has been made for a tool.

SECTION 1 — OVERALL PROJECT PLAN

I. Project Charter

The Department of Economic Opportunity's (DEO) processes for Identity and Access Management (IAM) are not consistently and uniformly applied to all systems, applications, and users, posing confidentiality, integrity, and availability risk to DEO. As a result, the Reemployment Assistance Claims and Benefits Information System (System) Modernization Program Roadmap calls out a need for a comprehensive review and update of the IAM process for the System, particularly in the context of cloud migration, where logical security boundaries are often represented by user access controls rather than physical system delineation and network segregation.

The purpose of this project is to address the need for IAM process improvements to the System in the context of modernization and cloud migration, while considering that IAM processes are, by necessity and design, standard for the agency enterprise, and not system-specific. Therefore, to avoid additional risk to the agency and the System, this project does have dependency with agency efforts to improve IAM across the enterprise.

Additionally, due to the urgency of DEO's need to address widespread fraud and cyber-attacks threatening the System, elements of this project were performed ahead of plan development that encompassed the majority of IAM controls specific to the Reemployment Assistance claimant-to-application access flow. While the work was significant, those components were implemented in such a way to maximize compatibility and prevent re-work for the remainder of the effort.

A. Scope Statement

In Scope

- Processes The project will involve significant updates to the IAM governance process, including identity creation, modification, and destruction; auditing and alerting; role definition; access authorization; and access provisioning
- People All IAM process roles involved in governance and execution will be addressed. Governance will require System and Data Owners from the Reemployment Assistance program, as well as subject matter expertise and IT Service Management functions from IT. Execution of the process will impact all users and administrators of the system (including the application and underlying infrastructure), whether they have an account in pre-project state or not. All who interact with the system will be expected to have a uniquely identifiable account protected by an authentication mechanism that provides access to only the data and components of the system and application to which their role(s) are authorized. This includes, but may not be limited to:
 - o External users of the application (benefits seekers, employers, partners, etc.)

- Internal users of the application (DEO staff, contractors, privileged partners, etc.)
- o Internal IT operational and development staff responsible for the operation and maintenance of the system(s) and their components on which the application relies.
- o Program staff or partners responsible for gathering information and/or reporting from components of the system not available through the application.
- External support partners, contractors, etc. that may assist in the operation, maintenance, analysis, auditing, or security response activities associated with the system or application.
- o Internal auditors, security staff, or other program support roles.
- o System Administrator and Service Accounts.

Out of Scope

- Development of any components of the IAM process already addressed by enterprise efforts.
- Development and integration of any applications or systems into the IAM process other than those involved in administering the RA program.

B. Project Objectives and Business Benefits

Project Objective	Business Benefit
Implementation of enterprise compatible IAM process for the System.	 Greatly reduces risk to confidentiality, integrity, and availability of System and data. Resolves long-standing audit issues. Provides opportunity for easier integration with identity verification (first- and second-party fraud mitigation).
Centrally managed identities for the System.	 Decreases workload across DEO for managing access. Reduces risk by improving consistency, automation, audit, and control of users and access.
Modernized authentication for the public and other external entities accessing the System.	 Mitigates third-party fraud and helps address insider threats. Resolves long-standing audit issues.
Capability for alerting on and auditing current and historical identity activity/access within the System.	 Reduces information security and fraud risk. Improved troubleshooting of access issues. More timely/accurate responses to audits. Lowers risk of audit findings.

C. Critical Success Factors

- A documented, enterprise compatible IAM process is identified or created.
- System and enterprise IAM processes are aligned.
- Logging/audit information is accessible in central platform (to be determined).
- Redundant system roles have been removed.
- System owner(s) and other relevant process roles are updated, and an ongoing process is in place to track and update them.
- Stale accounts are appropriately expired.
- All accounts meet DEO password/access control requirements.

D. Key Dates

Key Date	Importance and Relevance to the Project
January 11 – March 11, 2022	2022 Legislative Session
January 31, 2023	Issue purchase order
January 31, 2023, to February 27,	Vendor onboarding
2023	
May 11, 2023	Vendor completes audit, analysis, and
	documentation on DEO system
June 2, 2023	Vendor delivers Continuous Modernization Plan
	and Roadmap
June 9, 2023	Vendor delivers Transition Plan and Project
	Closeout Report
June 16, 2023	Closeout Phase complete; project complete

E. Major Deliverables

Deliverable	Major	Deliverable Description
ID	Deliverable	
1	Project Kickoff	The vendor conducts the IAM project kickoff
	Meeting	meeting and provides agenda and materials.
2	Project	The vendor provides the final version of the PMP
	Management Plan	after review and approval by DEO
3	Working Sessions,	The vendor conducts a series of work sessions to
	Audit, and Report	discuss, evaluate, and develop IAM processes and
		requirements. The work sessions are part of the
		vendor's overall audit of the same, with the report
		being the output of the audit and working
		sessions.
4	System Resource	The vendor provides an inventory of existing
	Map	DEO roles, teams, and resources, and documents
		how existing resources are currently producing
		deliverables.
5	IAM policies and	The vendor analyzes, updates, and creates DEO
	processes	security policies and processes.

Deliverable	Major	Deliverable Description				
ID	Deliverable	_				
6	IAM Process	The vendor provides "as is" and "to be" process				
	Roles and	roles and responsibilities documentation.				
	Responsibilities					
7	Identity	The vendor reviews existing documentation on				
	Governance	applications, roles, access, and responsibilities;				
	Model	updates that documentation; and delivers a final				
		version of that documentation after review and				
		approval by DEO.				
8	IAM Continuous	As part of the transition into continuous				
	Modernization	improvement, which begins after go-live, the				
	Plan and	vendor delivers the Continuous Modernization				
	Roadmap	Plan and corresponding roadmap after review and				
		approval by DEO.				
9	Transition Plan	As part of the transition into continuous				
		improvement, which begins after go-live, the				
		vendor delivers the Transition Plan after review				
		and approval by DEO.				
10	Project Closeout	The vendor provides the Project Closeout Report				
	Report	after review and approval by DEO.				

F. Major Milestones

Milestone ID	Major Milestone	Milestone Description
1	Project Kickoff Meeting	The vendor conducts the IAM project kickoff meeting and provides agenda and materials.
2	Project Management Plan	The vendor provides the final version of the PMP after review and approval by DEO
3	Working Sessions, Audit, and Report	The vendor conducts a series of work sessions to discuss, evaluate, and develop IAM processes and requirements. The work sessions are part of the vendor's overall audit of the same, with the report being the output of the audit and working sessions.
4	System Resource Map	The vendor provides an inventory of existing DEO roles, teams, and resources, and documents how existing resources are currently producing deliverables.
5	IAM policies and processes	The vendor analyzes, updates, and creates DEO security policies and processes.
6	IAM Process Roles and Responsibilities	The vendor provides "as is" and "to be" process roles and responsibilities documentation.

Milestone	Major Milestone	Milestone Description				
ID						
7	Identity Governance	The vendor reviews existing documentation				
	Model	on applications, roles, access, and				
		responsibilities; updates that documentation;				
		and delivers a final version of that				
		documentation after review and approval by				
		DEO.				
8	IAM Continuous	As part of the transition into continuous				
	Modernization Plan and	improvement, which begins after go-live, the				
	Roadmap	vendor delivers the Continuous				
		Modernization Plan and corresponding				
		roadmap after review and approval by DEO.				
9	Transition Plan	As part of the transition into continuous				
		improvement, which begins after go-live, the				
		vendor delivers the Transition Plan after				
		review and approval by DEO.				
10	Project Closeout Report	The vendor provides the Project Closeout				
	_	Report after review and approval by DEO.				

G. Key Stakeholders

Key Stakeholder	Project Interest
Dane Eagle	Secretary, Department of Economic Opportunity
Adrienne Johnston	Deputy Secretary, Workforce Services
Domenic DiLullo	Chief Technology Officer
Paul Forrester	Chief Information Officer
Allyce Moriak	Chief Financial Officer
Wendy Castle	RA Modernization Program Owner - Business
Nicole Sanislow	RA Modernization Program Manager - Business
Tom Richardson	RA Modernization Program Manager – Strategic Planning
	Office
Garrick Wright	RA Modernization Program Manager – Information Technology
Mark Miller	Project Owner
Christian Stephens	Project Manager

H. Significant Project Assumptions and Constraints

Project Assumptions

- 1. The identified requirements are correct and complete.
- 2. The assigned IT resources possess relevant knowledge and skills to complete the identified tasks.
- 3. Members of the project team will have access to the necessary tools, hardware, and materials necessary to complete the identified tasks.
- 4. All relevant stakeholders will attend required status meetings. However, there may be instances where some stakeholders are unavailable to attend.

- 5. The project sponsor will be responsive and prepared to make decisions regarding the project cost and scope.
- 6. Funding will be available for necessary procurements, if any.
- 7. Even though the individual access flows have not been identified/assigned resources, the project is achievable within the allotted time with the available resources.
- 8. The claimant IAM process already developed and implemented will be compatible with any additional solutions implemented as part of this project.

II. Work Breakdown Structure

	Contract Deliverab					
WBS •	Numbers •	Task Name	% Complete •	Duration •	Start -	Finish

Vendor	Strategic Planning Office (SPO)	 change requests Monitors project progress Facilitates DEO Leadership Team Governance meetings Provides guidance and support to project manager and project team members
Vendor	IAM Experts	Provides expertise in auditing, analyzing, documenting, and recommending IAM technologies

C. Project Management Methodology

DEO will use a project management methodology in compliance with project management standard rule 60GG-1 F.A.C., project requirements and department experience with similar engagements. Predictability, accountability, and flexibility are key elements that must be embraced by the overall project management approach to ensure DEO's satisfaction and project success. Successful project management must include active and visible leadership, multiple controls and checkpoints with measurable outcomes, and engagement with all stakeholders. DEO believes strong project management is critical throughout the life of any successful project.

For this project, DEO's project management will include the following specific elements, in addition to our standard methodology:

- The project management team will advise leadership on areas of concern and will propose solutions to mitigate risk.
- Vendors will respond to inquiries or requests from DEO within one business day from receipt.
- In the case where additional time is needed for a task, vendors will provide an estimate, which must be approved by the DEO Project Manager.
- At the end of the contract, vendors will provide final copies of all reports in electronic format for archive purposes.
- DEO's project management approach will utilize the technical skills, tools, and techniques needed to succeed, as well as the dedication to accountability, resource commitment, and organizational focus. Project success will be the result of active communication among all individuals, understanding everyone's role in the project, and clear delineation of responsibilities.

DEO believes successful project management hinges on the following:

- Clearly established project goals and requirements
- Ongoing assessment of quality against established standards
- Constant measurement of success against established deliverables and milestones
- Personal presence and commitment of key project leadership
- Proactive identification and communication of risks and issues

VI. Business Process Organizational Change Management Plan

This project intends to improve the delivery, execution, security, or convenience of DEO's lines of business through the implementation of modern processes and tools based on industry best practices and frameworks.

The project team aims to maximize communication, engagement, adoption, and performance of these new processes, roles, and responsibilities through a combination of tools, templates, and techniques such as:

- Stakeholder identification and engagement plans
- Process identification and improvement plans
- Educational assessment and training plans
- Change risk assessment
- Change Advocate networks
- Change Management
- Business Relationship Management
- IT Service Management

VII. Project Risk Management Plan

Risk	Probability of Occurrence (high, medium,	Risk Tolerance (high, medium,	Mitigation	Assigned
Description/Impact Hurricane impacting	low) Medium	low) High	Strategy Adjust schedule	Owner PM
the state delays the schedule			accordingly	
Divisional and/or Bureau resistance of new process	Medium	Involve management and impacted staff throughout engagement to increase adoption rate and ensure a successful transition	PM	
Insufficient knowledge transfer of new process	Medium	Medium	Involve impacted staff throughout engagement to increase participation and knowledge of new processes	PM
Identified technical solutions do not address requirements	Low	Medium	Procure necessary solution(s)	SME/ Implementation Teams, Owner
Procurement(s) are outside of available budget.	Low	Medium	Identify alternative solutions, seek additional funding	SME Team, Owner
Resource requirements for execution of roadmap are beyond original expectations.	Medium	Medium	Prioritize highest-risk access flows, adjust schedule, plan additional phases.	PM/SME
Procurement Delays for IAM Services	High	Medium	Communication with Senior Leadership and Procurement Team(s).	PM/Project Owner/Senior Leadership

VIII. Capacity Plan

Utilization of a single tool for software development provides a single source of truth for work tracking and resource allocation which can then be utilized for capacity planning for the development environment, tools, and developers.

Project Capacity Planning

- Establish Cross-Functional Team: To collaborate and communicate about production capacity and resource management, you want a cross-functional team with different levels and different functions.
- Calculate Resource Capacity: Before you can create a production capacity plan, you need to have an idea of your current capacity and your available resources.
- Determine Resource Requirements: For each project, look at the scope and what resources are required to do the task for the project.
- Prioritize Projects: Which projects are most important, and which can be put aside for the time being? You can't do everything at once.
- Allocate Resources Based on Project Priority: Now allocate those prioritized projects and make sure that they are aligned with the goals of the organization.
- Keep the Lines of Communications Open: Communicate between executives, project management leaders and stakeholders.
- Document Known Risks: Monitor risks such as union strikes, weather, government regulations that stop a project or create new ones unexpectedly.
- Plan for How to Handle Too Much Capacity: Understand where it is and how to resolve it (such as reassigning), or not enough capacity (again, where/how).

REEMPLOYMENT ASSISTANCE SYSTEM MODERNIZATION

FROM GENERAL REVENUE FUND 36,000,000

From the funds in Specific Appropriation 2202A, \$36,000,000 in nonrecurring funds from the General Revenue Fund is provided for the modernization of the reemployment assistance system that complies with section 282.206, Florida Statutes. Of these funds, \$19,320,000 is provided for increased maintenance and operations of the system, \$15,510,000 is provided for system modernization, and \$1,170,000 is provided to competitively procure a private sector provider with experience in conducting independent verification and validation (IV&V) services of public sector information technology projects to provide IV&V services for all department and vendor staff working to modernize and maintain the system. From these funds, \$31,170,000 shall be held in reserve, and \$4,830,000 is released to the department for ongoing maintenance and operations. The department is authorized to submit quarterly budget amendments requesting release of these funds pursuant to the provisions of chapter 216, Florida Statutes, and based on the department's planned quarterly expenditures. Release is contingent upon the procurement of the IV&V vendor and the approval of a detailed operational work plan and monthly spend plan that identifies all work activities and costs budgeted for Fiscal Year 2021-2022.

Quarterly IV&V reports shall include technical reviews of project deliverables submitted or accepted within the reporting period and assessments of the department's project management and governance. The IV&V contract shall require that all deliverables be simultaneously submitted to the executive director of the department, the Executive Office of the Governor's Office of Policy and Budget, the chair of the Senate Appropriations Committee, the chair of the House Appropriations

Committee, and the Florida Digital Service. The contracted provider shall be made readily available to provide all project related data to the Florida Digital Service in support of their project oversight responsibilities pursuant to section 282.0051, Florida Statutes. The department shall provide monthly project status reports to the Executive Office of the Governor's Office of Policy and Budget, the chair of the Senate Appropriations Committee, the chair of the House Appropriations Committee, and the Florida Digital Service. Each status report must include ongoing system maintenance activities and progress made to date for each project milestone, deliverable, and task order, planned and actual completion dates, planned and actual costs incurred, and any current project issues and risks.

REEMPLOYMENT ASSISTANCE SYSTEM MODERNIZATION
The nonrecurring sum of \$56,400,000 from the General Revenue Fund is appropriated to the Department of Economic Opportunity for the modernization of the Reemployment Assistance system that complies with section 282.206, Florida Statutes. These funds shall be held in reserve.
Release of these funds is contingent upon the full release of funds provided for system modernization in Specific Appropriation 2202A. The department is authorized to submit quarterly budget amendments requesting release of these funds pursuant to the provisions of chapter 216, Florida Statutes, and based on the department's planned quarterly expenditures. Release is contingent upon the approval of a detailed operational work plan and monthly spend plan that identifies all work

activities and costs budgeted for Fiscal Year 2021-2022.
